

Pharma's Vaccines: The Untold Story

# Pharma's Vaccines: The Untold Story

**No Liability For Injury or Death; No Liability For Withholding or Giving False Information; Fraudulent Safety Testing; Over \$4.1 Billion Paid Out By Taxpayers for Vaccine Injuries and Deaths; Millions Permanently Damaged or Killed; Government Bribery, Infiltration & Control; Kickbacks, Financial Favors & Payouts; \$741 Million "Donated" to the CDC Foundation; Covert "Non-Profit" Pharma Front Groups; Research Misconduct & Scientific Fraud; Manipulation & Suppression of Data; Destruction of Documents; Contaminated Lots Discovered, Covered Up & Yet Still Distributed; Pharma/Government/Media Collusion, Lies, Fake News Stories, Fear Mongering, Censorship Of Vaccine Dangers, CDC Whistleblower Blackout, Smear Campaigns to Destroy the Careers of Prominent Doctors; Hired Shills & Trolls; Bullying; Coercion; Murder**

## **INTRODUCTION: READ THIS FIRST**

The story about vaccines told to us by government institutions, the medical establishment and the media is that vaccines are safe and effective; vaccines save lives; vaccines are necessary for herd immunity; and vaccines are necessary for public health and your health. In fact, these messages have been pounded into our minds over and over for decades! But are what they telling us about vaccines accurate and truthful? Are we being told the whole story? Many people say we are not!!

In this document, you're going to learn a very different story about vaccines than the one you're being told. You will see with *undeniable* proof, and in more ways than you could ever imagine that you've been deceived and outright lied to when it comes to vaccine history, vaccine science, vaccine risks, and vaccine safety and efficacy!

This incredible information is not from me. It comes from scientists, medical doctors, medical journalists, researchers, attorneys, insiders and whistleblowers! This is the other side of the vaccine story that's been hidden from you by the CDC, FDA, Congress, the medical establishment, and the mainstream media -- all who are being manipulated and controlled by the multi-hundred billion dollar pharmaceutical industry! It's the other side of the vaccine story that even your doctor doesn't know!!

**WARNING: What you are about to read will fly in the face of everything you think you know about vaccines and the world.** It will likely challenge your core beliefs, and even upset and infuriate you. (But it will also equip you with priceless, hard to find knowledge.) You're going to learn about such massive deception, corruption and disregard for human life that it will seem too unbelievable to be true! Things such as blatant research misconduct and scientific fraud that would knowingly harm or kill millions of children; contaminated, carcinogenic vaccines that were discovered, covered-up and still administered to tens of millions of people; clandestine mainstream media and pharmaceutical collusion that literally creates fake, propaganda "news"

stories in order to increase vaccine uptake and demand; hired armies of internet trolls to manipulate you and disrupt the vaccine risk awareness narrative; covert “nonprofit” pharma front groups and media shills who underhandedly push the pro-pharma/vaccine agenda. Proof of all of these are presented below plus many, many others that will astound you!

Only until you know and understand the critical information that’s presented here, can you truly make an informed and intelligent decision about vaccines for yourself and your children. Anything else is complete blind faith and is playing Russian roulette with your health and your child’s health!!

*“Sometimes people hold a core belief that is very strong. When they are presented with evidence that works against that belief, the new evidence cannot be accepted. This is called cognitive dissonance. And because it is so important to protect their core belief, people will rationalize, ignore and even deny anything that doesn’t fit in with their core belief.”* -Dr. Frantz Fanon, psychiatrist

If you are new to the vaccine risk awareness issue, start with [A Beginners Guide to Vaccines: The Untold Truth](#). If you choose to go through this document, read through the first section - *40 Shocking Facts About Vaccines*. The second section, *Shills, Trolls, Front Groups, PR Smear Tactics & More* is important because it shows you the many different ways in which the game is rigged against you from discovering the truth!

To make a copy of this document on your computer, go to “File” (top left menu) and scroll to “Make a copy”. On your phone, using the Google Doc app, tap on the three dots and go to “Share and Export”. Click on the right facing arrow and “Make a copy”.

All the information here has been presented accurately to the best of my ability. Nothing here constitutes medical advice. Please share this document or parts of it freely with friends, family, doctors, nurses, teachers, school principals, PTA members, etc. **Please share this information because the truth needs to get out!**

## **40 Shocking Facts About Vaccines**

### **Your Doctor Didn't Know or Never Told You**

*"Before the truth can set you free, you need to realize which false belief is holding you hostage." -Anonymous*

1. Did you know that in the United States you cannot sue a vaccine manufacturer (pharmaceutical company), your doctor or the CDC for the death or harm a vaccine does to your child? This is because prior to 1986 drug companies were at risk for bankruptcy due to the enormous awards they were forced to pay (and would need to continue to pay) because their vaccines were injuring and killing so many children.

So instead of making safer vaccines that didn't cause injuries or deaths, after heavy lobbying from pharmaceutical drug makers, on November 14, 1986, Congress passed and President Reagan signed into law the [National Childhood Vaccine Injury Act of 1986](#) (NCVIA) or NCVIA of 1986 or sometimes referred to as the '1986 Act'.

On October 1, 1988, this law went into effect and states that vaccine manufacturers CANNOT be held legally responsible for ANY harm their vaccine does to a child, whether it be brain damage, autism, seizure disorder, cancer, autoimmune disease, asthma, diabetes, or even death (SIDS). Even though these conditions are listed as adverse effects on numerous vaccine inserts.

*"In addition to broad liability protection, the 1986 Law also provides another shield to manufacturers under federal law. The 1986 Law permits them the right to NOT DISCLOSE KNOWN RISKS to parents or guardians of those being vaccinated.*

*Resting on the "learned intermediary" doctrine, manufacturers BEAR NO LIABILITY for giving, or failing to give, accurate or complete information to those vaccinated, and have only to provide RELEVANT information to doctors, who must give patients CDC Vaccine Information Statements. The Court of Appeals for the Federal Circuit has established a petitioner's burden of proof in a series of cases."*

Starting in 1988, no vaccine manufacturer was liable for a vaccine-related injury or death from one of the recommended vaccines “if the injury or death resulted from side effects that were unavoidable even though the vaccine was properly prepared and was accompanied by proper directions and warnings.”<sup>45</sup> This language stems from the Second Restatement of Torts.<sup>46</sup> The U.S. Supreme Court decided *Bruesewitz v. Wyeth*, which dealt specifically with this provision in February 2011.<sup>47</sup>

In addition to broad liability protection, the 1986 Law also provides another shield to manufacturers under federal law.<sup>48</sup> The 1986 Law permits them the right to not disclose known risks to parents or guardians of those being vaccinated. Resting on the “learned intermediary” doctrine, manufacturers bear no liability for giving, or failing to give, accurate or complete information to those vaccinated, and have only to provide relevant information to doctors, who must give patients CDC Vaccine Information Statements.<sup>49</sup>

Source: *Unanswered Questions from the Vaccine Injury Compensation Program: A Review of Compensated Cases of Vaccine-Induced Brain Injury*. Pace Environmental Law (PELR) Review, Vol. 28, No. 2, 2011 <https://bit.ly/2EiZRTB> or <https://bit.ly/2V7ra91>

So, the NCVIA of 1986 not only shields vaccine manufacturers from liability, but also allows them to lie or withhold information without any legal ramifications about known vaccine dangers in order to dupe people into thinking their vaccines are safer than they actually are. (I wish I was making this up. Sadly, I am not!) Attorney, Robert F. Kennedy, Jr. stated on Fox News, “What you have to understand is that the vaccine regimen changed dramatically around 1989. The reason it changed, Tucker, is that Congress, drowning in pharmaceutical industry money, did something they have never done for any other industry – they gave blanket legal immunity to all the vaccine companies. So that no matter how sloppy the line protocols, no matter how absent the quality control, no matter how toxic the ingredients, or egregious the injury to your child, you cannot sue them. So there’s no depositions, there’s no discovery, there’s no class action suits. All of a sudden vaccines became enormously profitable.”

Since vaccine manufacturers were now legally shielded, the US National Vaccine Injury Compensation Program (VICP) was created and a vaccine tax was added to vaccines (paid for by US taxpayers, not vaccine manufacturers) to compensate those children harmed or killed by vaccines.

Since the 1986 National Childhood Vaccine Injury Act has been in effect, all financial incentives for manufacturers to produce safer vaccines have been taken away. In fact, there is a huge incentive for pharmaceutical companies to rush to get their vaccines on the CDC (US Center for Disease Control & Prevention) childhood vaccine schedule. This is because once their vaccine makes it on to the CDC schedule, it then gets injected into millions of children, creates a billion dollars or more in new revenue while the pharmaceutical company is now held harmless for any injury or death that occurs from their vaccine. All the upside with zero downside!

1. No Pharma Liability? No Vaccine Mandates <https://bit.ly/2Ergqxc>
2. Dr. Jim Meehan, MD speaks about the National Childhood Vaccine Injury Act <https://youtu.be/Qphc4L-A9V0?t=31>

Moreover, there are no parameters for safety studies. In fact, vaccine manufacturers aren't even required to do safety studies on their vaccines! More on this in #4 below.

NOTE: The US ban against suing vaccine manufacturers only applies to vaccines that are on the [CDC schedule](#) and does not apply to adults injured by vaccines.

Here's how you can sue a vaccine manufacturer <https://bit.ly/25SoDzC>

2. With a \$250,000 cap, the United States National Vaccine Compensation Program, as of January 2019, has paid out over \$4 BILLION (\$4,060,857,713.42) to families for vaccine related injuries and deaths as a result of vaccines that are considered safe on the CDC schedule. If this isn't definitive proof that vaccines can cause substantial harm, have great risks and are not 100% safe for 100% of the population, then I don't know what is!

The over \$4 billion and counting paid out for vaccine injuries and deaths comes from a vaccine tax that is added to the cost of each vaccine paid for by US taxpayers, not the vaccine manufacturers. The US government allows pharma to get a free ride for vaccine death and damage!!

Each one of these payouts represents a child's life (and a family) that has been destroyed by something that their doctor said was safe and effective, and each day this number quietly increases as more children get injured or die with zero reporting from the mainstream media. In fact, most people, including those in the US Congress, don't even know that this vaccine injury compensation program even exists, nor do they know about a Vaccine Adverse Events Reporting System, (VAERS) that is discussed in fact #3.

- The Vaccine Court: The Dark Truth of America's Vaccine Injury Compensation Program <https://www.thevaccinecourt.com/the-vaccine-court>
- How does the NVICP work? <https://www.mctlaw.com/vaccine-injury/national-vaccine-injury-compensation-program/>

The following is a list of vaccine injuries that have been compensated for in vaccine court with the pharmaceutical companies taking no responsibility or liability privately or publicly: *Guillain Barre syndrome, transverse myelitis, encephalopathy seizure disorder, brachial neuritis acute disseminated encephalomyelitis, chronic inflammatory demyelinating polyradiculoneuropathy (CIDP), premature ovarian failure, Bell's palsy, juvenile diabetes, thrombocytopenic*

*purpura, rheumatoid arthritis, multiple sclerosis, fibromyalgia, infertile spasms, ocular myasthenia gravis, hypoxic seizures, anaphylaxis, death.*

  2. National Vaccine Injury Compensation Report and Table <https://bit.ly/2MybgSd>
  3. Vaccine Claims/Office of Special Masters <https://bit.ly/NRD8ki>
3. Did you know that there is a US government reporting system for vaccine injuries and deaths? The Vaccine Adverse Event Reporting System or VAERS was created in 1990 by the CDC and FDA as a means to collect and analyze adverse effects (injuries and deaths) associated with vaccines. Doctors, nurses, vaccine manufacturers, and any member of the public can submit a report to VAERS. However, VAERS is a passive reporting system, meaning that it is completely voluntary, so there is no requirement for pharmaceutical companies, doctors or nurses to report adverse reactions or deaths from vaccinations. HHS estimates that only about 1% of adverse events are actually reported to VAERS!

Adverse events from drugs and vaccines are common, but underreported. Although 25% of ambulatory patients experience an adverse drug event, less than 0.3% of all adverse drug events and 1-13% of serious events are reported to the Food and Drug Administration (FDA).

Likewise, fewer than 1% of vaccine adverse events are reported. Low reporting rates preclude or slow the identification of “problem” drugs and vaccines that endanger public health. New surveillance methods for drug and vaccine adverse effects are needed. Barriers to reporting include a lack of clinician awareness, uncertainty about when and what to report, as well as the burdens of reporting: reporting is not part of clinicians’ usual workflow, takes time, and is duplicative. Proactive, spontaneous, automated adverse event reporting imbedded within EHRs and other information systems has the potential to speed the identification of problems with new drugs and more careful quantification of the risks of older drugs.

Source: Electronic Support for Public Health–Vaccine Adverse Event Reporting System (ESP:VAERS) <https://bit.ly/2I249Hk>

In 2016, the Vaccine Adverse Event Reporting System received 59,117 vaccine adverse event reports. Among those reports were 432 deaths, 1,091 permanent disabilities, 4,132 hospitalizations and 10,274 emergency room visits. What if these reports represent only 1% as HHS estimates? Doing simple math this means that vaccine adverse events in 2016 numbered about 5,911,700 people (almost 6 million people!) This includes 43,200 people, including babies/children that are now dead and 109,100 that are now permanently disabled and these numbers are just for one year and only represent the United States! Keep in mind that most, if not all of these people, mostly children, were getting vaccinated as a prevention. They didn't have a health condition that

needed medical care. It is highly likely that they were perfectly healthy and were being vaccinated to avoid the *chance* of getting an illness, most likely an illness that is benign! They (or the child's parents) likely never considered the risk-benefit ratio either and neither did their doctor who didn't know and/or never explained it to them.

1. Here is a short video on how to access the VAERS database <https://bit.ly/2Q9xmFD>
2. Here is the CDC database where you can find numbers on VAERS (Vaccine Adverse Event Reports) <https://wonder.cdc.gov/vaers.html>

2017 reported events for vaccine injuries and deaths (screenshot May 17, 2019)

- 462 deaths, 1,149 permanent disabilities. Multiply these numbers by 100.

Event Category ↓	⇒ Events Reported ↑↓	⇐ Percent (of 46,340) ↑↓
Death	462	1.00%
Life Threatening	613	1.32%
Permanent Disability	1,149	2.48%
Congenital Anomaly / Birth Defect *	22	0.05%
Hospitalized	3,994	8.62%
Existing Hospitalization Prolonged	44	0.09%
Emergency Room / Office Visit **	4,331	9.35%
Emergency Room *	2,089	4.51%
Office Visit *	6,341	13.68%
None of the above	30,506	65.83%
<b>Total</b>	<b>49,551</b>	<b>106.93%</b>

2018 reported events for vaccine injuries and deaths (screenshot May 17, 2019)

- 484 deaths, 1,338 permanent disabilities. Multiply these numbers by 100.

Event Category ↓	⇒ Events Reported ↑↓	⇐ Percent (of 56,692) ↑↓
Death	484	0.85%
Life Threatening	656	1.16%
Permanent Disability	1,338	2.36%
Congenital Anomaly / Birth Defect *	29	0.05%
Hospitalized	4,719	8.32%
Existing Hospitalization Prolonged	106	0.19%
Emergency Room / Office Visit **	921	1.62%
Emergency Room *	4,514	7.96%
Office Visit *	13,572	23.94%
None of the above	35,188	62.07%
<b>Total</b>	<b>61,527</b>	<b>108.53%</b>

The following list of conditions/diseases and causes of death are listed on vaccine inserts as complications or adverse events from vaccines: *autoimmune disease, food allergies, eczema, juvenile diabetes, asthma, ADD/ADHD, autism, speech delays, narcolepsy, seizure disorder, neurodevelopmental disorder, SIDS - sudden infant death syndrome*

Has your doctor or your child's pediatrician ever shown you a vaccine insert or discussed any of these possible vaccine induced diseases/conditions or reactions with you prior to vaccination and especially before simultaneously injecting your child with *multiple untested vaccines*?

By the way, in 2009, HHS attempted to upgrade the VAERS reporting system so that it would be more accurate and easier to report injuries and deaths and hopefully improve vaccine safety. A million dollars was put towards this project

called the Harvard Pilgrim Healthcare Project. After the results came in, the CDC decided to abandon the project. Read the full story here -- Why Did the CDC Silence the Million Dollar Harvard Project Charged With Upgrading Our Vaccine Safety Surveillance System? <https://bit.ly/2WLW9ZK>

***"Vaccination stimulates the immune system, the body's defense mechanism. Repeated, vaccination exhausts the immune system. It gives a false sense of security and, in doing so, it opens the door wide to all kinds of illnesses".***

**-Guylaine Lanctot, M.D.**

4. How are vaccines tested? Pharmaceutical drugs go through safety and efficacy studies, often for years, in double-blind placebo controlled studies using an *inert* placebo (such as sugar pills or saline injection.) Even still, many drugs even after FDA approval are pulled from the market because of serious health problems, permanent injuries and deaths. In fact, properly prescribed FDA APPROVED drugs are the THIRD LEADING CAUSE OF DEATH in the United States!

In addition, as crazy as it may sound, the FDA allows the same pharmaceutical companies that have been convicted of fraud to do their own research studies on the very drugs these companies are trying to get FDA approved! The same is true for vaccines, except the testing is different because vaccine "safety" studies don't use an *inert* placebo like saline. In the fraudulent world of vaccine research, a "placebo" is another vaccine, vaccines, or toxic ingredients known to induce autoimmunity in laboratory animals.

This is done by design.

The toxic ingredients in vaccines (discussed below in numbers seven through 12) injure and kill healthy children. If new vaccines were tested against an *inert* placebo group, vaccine-induced injuries and deaths couldn't be hidden. I repeat for emphasis: **Vaccine researchers intentionally injure and sometimes kill healthy children in their fraudulent "placebo" groups to hide injuries and deaths in their new vaccines.**

Then they write off the injuries and deaths as "New Medical Events" unrelated to the new vaccine or to the toxic "placebo", and they pronounce the new vaccine to be safe. The FDA approves new vaccines fully aware that industry "safety tests" are nothing more than scientific treachery. In addition, double blind randomized controlled trials are ignored by the vaccine industry and have never been done on any vaccine!

Below is a list of each vaccine on the US CDC childhood vaccine schedule. The far right column indicates whether or not an inert placebo was used in safety testing prior to FDA approval and licensure. As you can see, each vaccine under "Placebo Control?" in red is a "NO". The only partial and small true placebo study using an inert placebo was for Gardasil-9 in green. See the footnote below the chart for an explanation .

HHS'S CHILDHOOD SCHEDULE: ONE DAY TO 6 MONTHS OF LIFE			
VACCINE TYPE	TEST GROUP RECEIVED	CONTROL GROUP RECEIVED <sup>15</sup>	PLACEBO CONTROL?
DTaP	Infanrix (GSK) <sup>16</sup>	DTP	NO
	Daptacel (Sanofi) <sup>17</sup>	DT or DTP	NO
Hib	ActHIB (Sanofi) <sup>18</sup>	Hepatitis B Vaccine	NO
	Hiberix (GSK) <sup>19</sup>	ActHIB	NO
	PedvaxHIB (Merck) <sup>20</sup>	Lyophilized PedvaxHIB <sup>21</sup>	NO
Hepatitis B	Engerix-B (GSK) <sup>22</sup>	No control group	NO
	Recombivax HB (Merck) <sup>23</sup>	No control group	NO
Pneumococcal	Prevnam 13 (Pfizer) <sup>24</sup>	Prevnam <sup>25</sup>	NO
Polio	Ipol (Sanofi) <sup>26</sup>	No control group	NO

HHS'S CHILDHOOD SCHEDULE: ONE DAY TO 6 MONTHS OF LIFE			
VACCINE TYPE	TEST GROUP RECEIVED	CONTROL GROUP RECEIVED <sup>15</sup>	PLACEBO CONTROL?
Combination Vaccines	Pediarix (GSK) <sup>27</sup>	ActHIB, Engerix-B, Infanrix, IPV, and OPV	NO
	Pentacel (Sanofi) <sup>28</sup>	HCPDT, PolioVAX, ActHIB, Daptacel, and IPOL	NO

HHS'S CHILDHOOD SCHEDULE: 6 TO 18 MONTHS OF LIFE			
VACCINE TYPE	TEST GROUP RECEIVED	CONTROL GROUP RECEIVED	PLACEBO CONTROL?
Hepatitis A	Havrix (GSK) <sup>29</sup>	Engerix-B	NO
	Vaqta (Merck) <sup>30</sup>	AAHS and Thimerosal	NO
MMR	M-M-R II (Merck) <sup>31</sup>	No control group	NO
Chicken Pox	Varicella (Merck) <sup>32</sup>	Stabilizer and 45mg of Neomycin	NO
Combo Vaccine	ProQuad (Merck) <sup>33</sup>	M-M-R II and Varivax	NO
Flu <sup>34</sup>	Fluarix (IIV4) (GSK) <sup>35</sup>	Prevnam13, Havrix and/or Varivax or unlicensed vaccine	NO
	FluLaval (IIV4) (ID Bio) <sup>36</sup>	Fluzone (IIV4), Fluarix (IIV3) or Havrix	NO
	Fluzone (IIV4) (Sanofi) <sup>37</sup>	Fluzone (IIV3)	NO

HHS'S CHILDHOOD SCHEDULE: 18 MONTHS TO 18 YEARS OF LIFE			
VACCINE TYPE	TEST GROUP RECEIVED	CONTROL GROUP RECEIVED	PLACEBO CONTROL?
Tdap	Boostrix (GSK) <sup>38</sup>	DECAVAC or Adacel	NO
	Adacel (Sanofi) <sup>39</sup>	Td (for adult use)	NO
HPV	Gardasil (Merck) <sup>40</sup>	AAHS or Gardasil carrier solution (Sodium Chloride, L-histidine, Polysorbate 80, Sodium Chloride, and Yeast Protein) (594 subjects)	NO
	Gardasil-9 (Merck) <sup>41</sup>	Gardasil or Placebo (306 subjects that recently received 3 doses of Gardasil)	YES <sup>42</sup>
Meningococcal	Menactra (Sanofi) <sup>43</sup>	Menomune	NO
	Menveo (GSK) <sup>44</sup>	Menomune, Boostrix, Menactra, or Mencevax	NO
Combination Vaccines	Kinrix (GSK) <sup>45</sup>	Infanrix and Ipol	NO
	Quadracel (Sanofi) <sup>46</sup>	Daptacel and Ipol	NO
Flu <sup>47</sup>	Afluria (IIV3) (Seqirus) <sup>48</sup>	Fluzone (IIV3)	NO
	Afluria (IIV4) (Seqirus) <sup>49</sup>	Fluarix (IIV4)	NO
	Flucelvax (IIV4) (Seqirus) <sup>50</sup>	Flucelvax (IIV3) or a (Seqirus) investigational vaccine	NO

- Footnote #42, HPV/Gardasil-9 (Merck) -- In only one clinical trial, (Gardasil-9) 306 controls received a true inert placebo, and Merck required the 618 subjects in this trial receiving Gardasil-9 to have recently received 3 doses of Gardasil and be in good health.  
<https://clinicaltrials.gov/ct2/show/NCT01047345>. Generalized safety

conclusions therefore cannot be made from this small trial since it only included subjects with a proven record of receiving Gardasil without health complications. This trial does, however, prove that a saline placebo can be used in vaccine clinical trials.

Source: Letter to U.S. Department of Health & Human Services – Re: HHS Vaccine Safety Responsibilities <https://icandecide.org/hhs/ICAN-Reply.pdf>  
Vaccines aren't required to be tested for: mutagenicity (being known or suspected of causing mutations in our DNA, which can lead to cancer), carcinogenicity (being known or suspected of being able to cause cancer) or impairment of fertility. Lastly, vaccines aren't "tested" for years. In fact, some vaccines have been approved to be on the CDC's recommended childhood vaccine schedule when "testing" was done for just 4 and 5 days! This is true of the two different Hep B vaccines. Merck's MMR II vaccine was tested for just 42 days and on only a few hundred subjects!

**To see a list of vaccines and how each one was tested [click here](#).**

The United States CDC, FDA and HHS have completely entrusted vaccine manufacturers to do their own vaccine safety studies. Simultaneously, vaccine manufacturers are legally shielded from any harm their vaccines cause. They also have the right to NOT DISCLOSE KNOWN RISKS to parents or guardians of those being vaccinated and BEAR NO LIABILITY for giving, or failing to give, accurate or complete information to those vaccinated.

**Here's a quick look at some of the pharmaceutical companies making vaccines who are also responsible for doing their own their safety studies.**

- **Merck** makes 11 of the 17 vaccines recommended on the CDC schedule. They are the second largest vaccine maker in the world next to GSK. Merck agreed to pay \$4.85 billion to settle injury claims for their drug Vioxx that killed upwards of 60,000 people and caused over 100,000 heart attacks and strokes. Merck knew of these adverse events, covered up the data and lied about it in their marketing to physicians. Merck even made a "hit list" of doctors who criticized Vioxx. One email said, "*we may need to seek them out and destroy them where they live...*" Merck spent five years trying to cover up the lethal side effects of Vioxx. Then it paid its fines. None of its executives went to prison <https://bit.ly/2KalryB>. Merck has also been involved and charged with bribing doctors to the tune of \$18.8 million, deceiving investors in its Vytorin drug trials, and currently there is a lawsuit against Merck for colluding with the FDA and falsifying data in their mumps vaccine trials.
- **Pfizer** in 2009 paid \$2.3 billion to resolve criminal and civil liability arising from the illegal promotion of certain pharmaceutical products <https://bit.ly/2G2Xq8z>
- **GSK (GlaxoSmithKline)** is the largest vaccine maker in the world. In 2012 GSK pleaded guilty and paid \$3 billion to resolve fraud allegations and failure to report safety data <https://bit.ly/2nPN8xf>. GSK has also been involved or charged with hiding side effects, bribing doctors and agreed to pay the US government \$750 million to settle civil and criminal charges

that it knowingly manufactured and sold adulterated drug products  
<https://youtu.be/NJh9o-MCPXw>

These are three main vaccine manufacturers that have vaccines on the US CDC childhood vaccine schedule. Americans are supposed to trust these companies with overseeing the manufacturing, safety and efficacy studies of their vaccines and report on them honestly.

Vaccine safety white paper about the undeniable and shocking failures of the US vaccine safety program. Presented to the heads of National Institutes of Health (NIH) by Robert F. Kennedy, Jr. in May 2017.

- An Introduction To Vaccine Safety And Policy In The United States  
<https://bit.ly/2u1j9qK>

5. As you read in #1 above, in 1986, the United States government granted pharmaceutical companies complete legal immunity for any harm that may occur from their vaccines. This is called *The National Childhood Vaccine Injury Act (NCVIA) of 1986*.

Now that vaccine manufacturers were legally shielded, President Reagan knew that there was no incentive for pharmaceutical companies to make safer vaccines, and so within the "Act of 1986" Reagan required HHS (US Dept. of Health and Human Services) to put together a task force to oversee testing and studies to make vaccines safer.

An excerpt of this mandate (below) states that the vaccine testing and safety task force must be started, "*Within 2 years after December 22, 1987, and periodically thereafter... the Secretary shall prepare and transmit...a report describing the actions taken pursuant to subsection (a) during the preceding 2-year period.*"

=====

(b) Task force

1. The Secretary shall establish a task force on safer childhood vaccines which shall consist of the Director of the National Institutes of Health, the Commissioner of the Food and Drug Administration, and the Director of the Centers for Disease Control.
2. The Director of the National Institutes of Health shall serve as chairman of the task force.
3. In consultation with the Advisory Commission on Childhood Vaccines, the task force shall prepare recommendations to the Secretary concerning implementation of the requirements of subsection (a).

(c) Report

Within 2 years after December 22, 1987, and periodically thereafter, the Secretary shall prepare and transmit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Labor and Human Resources of the Senate a report describing the actions taken pursuant to subsection (a) during the preceding 2-year period.

Source: [42 U.S. Code § 300aa-27 - Mandate for safer childhood vaccines](#).

=====

On August 25, 2017, Robert F. Kennedy, Jr. and ICAN (Informed Consent Action Network) sent HHS a FOIA (Freedom of Information Act) request to see all the vaccine safety testing data performed and reported by the HHS task force over the last 30+ years.

After no response, they sent a follow-up [letter on October 12, 2017 to HHS Secretary](#). After six months and still no response to their requests, [ICAN filed a lawsuit against HHS on April 12, 2018 to finally obtain this information](#). When HHS finally replied to ICAN's demands the result was – THERE WAS NO VACCINE SAFETY TASK FORCE CREATED AND NO VACCINE SAFETY TESTING OVER THE LAST 30 YEARS! THE US GOVERNMENT HAD VIOLATED ITS OWN '1986 ACT' FOR SAFER VACCINES!!

HHS Violates 1986 Act and Admits - "No Safety Review for Children's Vaccines" Robert F. Kennedy, Jr. states in this [five minute video](#), "we filed a FOIA request and they [HHS] could not produce any documents. We sued, and they now have admitted they have never done any tests and they have never filed any reports. What it really shows is the lackadaisical, the cavalier, the casual attitude that HHS has towards vaccine safety."

Catharine Layton, COO of ICAN released this statement on July 13, 2018 "The 1986 Act granted unprecedented, economic immunity to pharmaceutical companies for injuries caused by their products and eviscerated economic incentive for them to manufacture safe vaccine products or improve the safety of existing vaccine products. Congress therefore charged the Secretary of HHS with the explicit responsibility to assure vaccine safety.

Hence, since 1986, HHS has had the primary and virtually sole responsibility to make and assure improvements in the licensing, manufacturing, adverse reaction reporting, research, safety and efficacy testing of vaccines in order to reduce the risk of adverse vaccine reactions. In order to assure HHS meets its vaccine safety obligations, Congress required as part of the 1986 Act that the Secretary of HHS submit biennial reports to Congress detailing the improvements in vaccine safety made by HHS in the preceding two years. ICAN therefore filed a Freedom of Information Act, FOIA, request on August 25th, 2017 to HHS seeking copies of the biennial reports that HHS was supposed to submit to Congress, starting in 1988, detailing the improvements it made every two years to vaccine safety. HHS stonewalled ICAN for eight months refusing to provide any substantive response to this request.

ICAN was forced to file a lawsuit to force HHS to either provide copies of its biennial vaccine safety reports to Congress or admit it never filed these reports. The result is that HHS had to finally and shockingly admit that it never, not even once, submitted a single biennial report to Congress detailing the improvements in vaccine safety. This speaks volumes to the seriousness by which vaccine safety is treated at HHS and heightens the concern that HHS doesn't have a clue as to the actual safety profile of the now 29 doses, and growing, of vaccines given by one year of age.

In contrast, HHS takes the other portions of the 1986 Act, which require promoting vaccine uptake, very seriously, spending billions annually and generating a steady stream of reports on how to improve vaccine uptake. Regrettably, HHS has chosen to focus on its obligation to increase vaccine uptake and defend against any claim vaccines cause harm in the National Injury Vaccine Compensation Program (aka, the Vaccine Court) to such a degree that it has abandoned its vaccine safety responsibilities. If HHS is not, as confirmed in Court this week, even fulfilling the simple task of filing a biennial report on vaccine safety improvements, there is little hope that HHS is actually tackling the much harder job of actually improving vaccine safety." Source: <https://bit.ly/2Jty8yT> on July 9, 2018

Do you think the United States government, HHS, FDA and CDC take vaccine safety seriously? Do you think that vaccines have been proven to be safe as touted over and over again by the media? Here is Del Bigtree of ICAN and host of the show Highwire discussing his lawsuit <https://youtu.be/8OkZhR7AVWg?t=830>

1. HHS Sued for Not Upholding Vaccine Safety Testing Mandated by Law <https://bit.ly/2Rjtp8c>
2. ICAN vs. HHS: Key Legal Win Recasts Vaccine Debate <https://prn.to/2Tc0anW>

This is a landmark lawsuit won against the US government and it was never covered by any major media outlet!

6. Did you know that the CDC childhood vaccine schedule has never been studied for safety or efficacy? The CDC vaccine schedule was created based on no scientific data! In addition, did you know that the practice of injecting multiple vaccines in a single doctor's visit has also never been studied? In one catch up "well baby" visit, it is common for a child to have injected into them six to nine vaccines, and sometimes as many as 13 vaccines. Within that one doctor's visit that child has received a potentially dangerous concoction of known carcinogens and neurotoxins.

1. Combining Childhood Vaccines at One Visit Is Not Safe <https://www.jpands.org/vol21no2/miller.pdf>

***"The CDC is lying to you. This combination of eight vaccines administered during a single physician visit was never tested for safety in clinical trials."***

***-Neil Miller, author and medical research journalist***

***"So many vaccines piled into the growing body of the young overstimulate the immune system and actually cause a number of other maladies such as asthma, diabetes, obesity, and autoimmune diseases."***

***-Dr. Mayer Eisenstein, MD, Pediatrician***

7. What's in vaccines? Along with the antigen (a live or killed virus or bacteria to stimulate an immune response) vaccines also contain adjuvants, preservatives and stabilizers. Adjuvants help stimulate a stronger immune response and minimize the dose of antigen needed. Preservatives extend the life of the vaccine and stabilizers help the vaccine remain unchanged when the vaccine is exposed to heat, light, acidity, or humidity. Standard ingredients in vaccines are

known carcinogens, neurotoxins as well as animal organ tissue or human organ tissue from aborted fetuses.

Vaccines may contain aluminum (a neurotoxin known to cause Alzheimer's, Parkinson's, neurodevelopmental disorders (NDD), i.e., autism, ADD, ADHD, learning disabilities, etc.), mercury (a neurotoxin and one of the most toxic substances on the planet), formaldehyde (a carcinogen used as embalming fluid), phenol (used as a disinfectant), MSG (monosodium glutamate), polysorbate 80, polysorbate 20, sulfates, yeast proteins, Triton X-100 (detergent), acetone (used in nail polish remover), antibiotics, etc.

Vaccines are grown and strained through either animal or human tissue - monkey and dog kidney tissue, chick embryo, calf serum, pig blood, horse blood and rabbit and mouse brains, human diploid cells (the dissected organs of forcibly aborted male and female fetuses), all of which may cause unknown problems by altering our DNA.

1. The developer of many vaccines, and paid consultant to vaccine manufacturers, Sanofi, Merck, GSK and others, Dr. Stanley Plotkin, discusses under oath that various organs from aborted fetuses are used in the making of vaccines [https://youtu.be/fr\\_o\\_XXoJ3M](https://youtu.be/fr_o_XXoJ3M) or <https://youtu.be/NACBHtFMIIA>
2. Dr. Alvin H. Moss Testifies on the Use of Aborted Human Fetus in Vaccine Production <https://youtu.be/Mkz2cWleGh4>
3. Vaccines That Contain Human DNA <https://youtu.be/dlqFOLL0TEU>

In Italy, a [study conducted of 44 different vaccines](#) in 2017 showed serious quality control problems across ALL vaccine manufacturers tested. Researchers found contaminants such as lead or stainless steel (nickel, iron and chromium) in every single vaccine and all contaminants were both non biodegradable and non biocompatible.

*"The analyses carried out show that in all samples checked, contain non biocompatible and bio-persistent foreign bodies, which are not declared by the producers... that means that they are biopersistent and can induce effects that can become evident either immediately close to injection time or after a certain time from administration."*

*"Aggregates can be seen (stable composite entities) containing particles of Lead in the Meningitec vaccine, of stainless steel (Iron, Chromium and Nickel), and of Copper, Zinc and Lead in the Cervarix vaccine. Similar aggregates, though in different situations (patients suffering from leukemia or cryoglobulinemia), have already been described in literature. The link between these two entities generates an unfolding of the proteins that can induce an autoimmune effect once those proteins are injected into humans."*

*"As happens with all foreign bodies, particularly that small, they induce an inflammatory reaction that is chronic because most of those particles cannot be degraded. Furthermore, the protein-corona effect (due to a nano-bio-interaction [18]) can produce organic/inorganic composite particles capable of stimulating the immune system in an undesirable way [19-22]. It is impossible not to add that particles the size often observed in vaccines can enter cell nuclei and interact with the DNA [23]."*

In vaccine [testing conducted in Germany](#), vaccines were found to be contaminated with the following:

- ALL vaccines tested contained mercury in small amounts (even the ones that were supposedly “mercury free”)
- ALL tested vaccines contain minor traces of aluminum, \*even if not labeled\*. Gardasil, Gardasil 9 and Synflorix contain TWICE as much aluminum as indicated
- Half the vaccines contained toxic, carcinogenic nickel in small amounts
- Slightly over 1/3 of the vaccines contained small amounts of arsenic
- Over 90% of the tested vaccines contained uranium (the stuff used to make nuclear bombs)
- The aluminum content in the so-called attenuated vaccines were 1,000-6,000 times above the safe limits for drinking water!

Source: Six Reasons To Say NO to Vaccination <https://bit.ly/2z14axy>

8. In addition to giving vaccine manufacturers blanket legal immunity from harm and allowing them to get away with fraudulent and deceptive testing, the FDA doesn't require them to test vaccine adjuvants for safety. Aluminum is the most common vaccine adjuvant and is a known neurotoxin that when *injected* can cause encephalitis (brain inflammation). CpG 1018 is a new vaccine adjuvant currently used in the new Heplisav-B vaccine. It is a synthetic form of DNA that mimics bacterial and viral genetic material. It too has never been safety tested. In a comparative study, the Heplisav-B vaccine caused seven times more heart attacks than the aluminum adjuvanted, Engerix-B vaccine. The CDC, FDA and HHS will be using the public, babies included, as guinea pigs to see if the Heplisav-B vaccine is safe enough to keep on the market. In vaccine-land, this insanity is called post marketing data. More on this in #32 below.

Several different adjuvants are used in U.S. vaccines.

Adjuvant	Composition	Vaccines
<u>Aluminum</u>	One or more of the following: amorphous aluminum hydroxyphosphate sulfate (AAHS), aluminum hydroxide, aluminum phosphate, potassium aluminum sulfate (Alum)	Anthrax, DT, DTaP (Daptacel), DTaP (Infanrix), DTaP-IPV (Kinrix), DTaP-IPV (Quadracel), DTaP-HepB-IPV (Pediatrix), DTaP -IPV/Hib (Pentacel), Hep A (Havrix), Hep A (Vaqta), Hep B (Engerix-B), Hep B (Recombivax), HepA/Hep B (Twinrix), Hib (PedvaxHIB), HPV (Gardasil 9), Japanese encephalitis (Ixiaro), MenB (Bexsero, Trumenba), Pneumococcal (Prevnar 13), Td (Tenivac), Td (Mass Biologics), Tdap (Adacel), Tdap (Boostrix)
<u>AS04</u>	Monophosphoryl lipid A (MPL) + aluminum salt	Cervarix
<u>MF59</u>	Oil in water emulsion composed of squalene	Fluad
<u>AS01g</u>	Monophosphoryl lipid A (MPL) and QS-21, a natural compound extracted from the Chilean soapbark tree, combined in a liposomal formulation	Shingrix
<u>CpG 1018</u>	Cytosine phosphoguanine (CpG), a synthetic form of DNA that mimics bacterial and viral genetic material	Hepilisav-B
No adjuvant		ActHIB, chickenpox, live zoster (Zostavax), measles, mumps & rubella (MMR), meningococcal (Menactra, Menveo), rotavirus, seasonal influenza (except Fluad), single antigen polio (IPOL), yellow fever

What is the risk of aluminium as a neurotoxin?

<https://www.tandfonline.com/doi/full/10.1586/14737175.2014.915745>

***“Aluminium is neurotoxic. Its free ion, Al<sup>3+</sup> (aq), is highly biologically reactive and uniquely equipped to do damage to essential cellular (neuronal) biochemistry. This unequivocal fact must be the starting point in examining the risk posed by aluminium as a neurotoxin in humans.”***

**-Dr. Chris Exley, PhD**

9. Ingestion vs. injection what's the difference? Any doctor, media pundit or journalist who compares *ingesting* aluminum or mercury from breast milk, fish or Chinese food (a source of MSG) or anything else to *injecting* mercury, aluminum, MSG, formaldehyde or any toxin in vaccines and says it's perfectly fine, is either ignorant or is intentionally lying to you!

Route of entry is critical when looking at toxicity and injection of mercury, aluminum or any toxin into the bloodstream is very different than ingesting it. Digestion is an *open* system from mouth to anus and excretion is relatively easy. Injection via the circulatory system is a *closed* system and is 100% taken up by the body. Dr. Toni Bark, former pediatric ER physician and long time vaccine researcher will explain further the importance of 'route of entry' in this important video <https://youtu.be/F8uradn98Ls?t=3859>

1. Aluminum - Ingestion vs Injection <https://youtu.be/qmvOjMVMSo4>
2. Ethyl Mercury vs. Methylmercury, Ingestion vs. Injection <https://youtu.be/qx7fW52rHtM>

To take this point further, if you drink a fruit and vegetable smoothie, it would be healthy for you. *But, it doesn't mean you're going to be stupid enough to inject it into you because that would likely have dire consequences!!*

The FDA and CDC however, often cite as the Gold standard of "proof" that "aluminum in vaccines is safe", a 2011 FDA study by toxicologist, Dr. Robert Mitkus, PhD. However, Mitkus, (working for the FDA) before doing this study had an agenda to "prove that aluminum in vaccines is safe" and therefore used *ingested* aluminum and not *injected* aluminum in his study! (Are you still wondering whose interest the FDA and CDC are protecting?!)

JB Handley, author of *How to End the Autism Epidemic*, states, "Dr. Mitkus' published study, "[Updated aluminum pharmacokinetics following infant exposures through diet and vaccination](#)" from 2011 is the Gold standard and the primary document the FDA relies upon to declare injected aluminum safe for use in infants. It is, quite literally, the *SOLE* defense the FDA and CDC cite for any concerns raised about injected aluminum. In fact, Dr. Mitkus' study was in part a response to safety concerns about aluminum, as he writes in the Abstract of his study: "Because concerns have been expressed by the public that aluminum in vaccines may pose a risk to infants, we developed an up-to-date analysis of the safety of aluminum adjuvants."

As you can guess, Dr. Mitkus' paper gave aluminum the "all clear" sign." ...for infants, our study demonstrates that there is little risk for aluminum toxicity following immunizations administered according to ACIP recommendations even with maximal exposures to aluminum adjuvant. For the general population of infants, who receive less than the maximal dose, the risk is even lower."

"To the layperson, this study would probably be reassuring. To scientists who are closely studying the issue of injected aluminum adjuvant, and particularly to scientists who are doing their own [independent] biological studies of aluminum adjuvant, Dr. Mitkus' study is somewhere between a professional disgrace and a fraudulent disaster ... "

  2. Part 2: FDA’s Flawed Study of Aluminum Adjuvant Toxicity (The Mitkus study) <https://bit.ly/2RfBEVP>

Many of these toxins when injected can enter into the brain. In fact, deceased autistic children have been autopsied and identified as having *extremely high brain levels of aluminum*. In most children, the blood brain barrier isn't fully formed until age 7, yet the average child in America has already received over three dozen vaccines that contain aluminum. <https://bit.ly/2EQyHVP>

In addition, it was shown in a study by Bishop that developmental delays or brain damage can begin in newborns at 4 - 5 micrograms of injected aluminum per kilogram of body weight per day. The average newborn weighs 3 kilograms. So that means for the average weight baby, 15 micrograms of injected aluminum could cause brain damage. For example, the hepatitis B vaccine contains 250 mcg of aluminum. So when a newborn is injected with the hepatitis B vaccine, they are getting over 16 times the aluminum that was proven to cause brain damage and developmental delays. The Hep B vaccine is designed for intravenous drug users and those having sex with high risk individuals like prostitutes and are a completely unnecessary vaccine for babies!

12. NEW STUDY: Aluminum In Vaccines <https://youtu.be/a-XdRvBV9Y>
13. Aluminum Vaccine Adjuvants: Are they Safe? <https://bit.ly/1MyPeaK>  
*“Aluminum is an experimentally demonstrated neurotoxin and the most commonly used vaccine adjuvant. Despite almost 90 years of widespread use of aluminum adjuvants, medical science's understanding about their mechanisms of action is still remarkably poor. There is also a concerning scarcity of data on toxicology and pharmacokinetics of these compounds. In spite of this, the notion that aluminum in vaccines is safe appears to be widely accepted.*

*Experimental research, however, clearly shows that aluminum adjuvants have a potential to induce serious immunological disorders in humans. In*

*particular, aluminum in adjuvant form carries a risk for autoimmunity, long-term brain inflammation and associated neurological complications and may thus have profound and widespread adverse health consequences. In our opinion, the possibility that vaccine benefits may have been overrated and the risk of potential adverse effects underestimated, has not been rigorously evaluated in the medical and scientific community."*

According to a recent study published in *Current Medical Chemistry*, children up to 6 months of age receive 14.7 to 49 times more aluminum from vaccines than FDA safety limits allow.

Lastly, there is a synergistic toxicity that occurs in the simultaneous *injection* of so many toxins and foreign substances. (But we will never know because the CDC and the vaccine manufacturers refuse to do any real safety testing.) If aluminum *injected* into the bloodstream has shown to be toxic and cause health problems, then the addition of other toxins injected simultaneously and cumulatively over time can only be worse, i.e. more toxic!

14. Synergism in aluminum and mercury neurotoxicity

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6013271/>

10. As mentioned in #7 above, some vaccines are derived from live animal hosts including cow, chicken, pig, mouse and monkey embryos. This can result in [foreign DNA being injected](#) into the recipient's blood and has the possibility of altering our DNA structure! In addition, animal viruses can be passed on to humans in this manner.

In fact, in the early 1960s it was discovered that lots of Merck's polio vaccine manufactured on rhesus monkey kidney tissue contained a simian virus known as simian virus 40 or SV40, which has been associated with a number of rare human cancers. In recent years, dozens of scientific studies have found SV40 in a steadily increasing number of rare brain, bone and lung-related tumors -- the same malignant cancer SV40 that causes cancer in lab animals. The polio vaccine contaminated with SV40 has been said to have been administered to as many as 98 million Americans from 1955 to 1963.

1. The Virus and the Vaccine <https://bit.ly/2GqwqCh>

**The true history and shocking story about polio and the vaccine are covered in a separate section below.**

11. Pathologist, Dr. Sin Hang Lee, MD of Milford Hospital in Connecticut found viral DNA complexed with Merck's proprietary aluminum adjuvant in Gardasil (HPV vaccine). Dr. Lee's findings were also confirmed by a lab in Paris, France. Says Dr. Lee, *"I can't imagine a better way of creating autoimmunity than complex aluminum with DNA and sticking it in to your brain."*

This critical news was ignored by CDC, FDA and the all of the mainstream media

1. Gardasil Contaminant Confirmed By Independent Lab

<https://bit.ly/RElvq2>

2. TVNZ Network -- <https://bit.ly/2SNbt5Y>

In addition, research scientist, Dr. Theresa Deisher of Sound Choice pharmaceuticals also discovered DNA fragments in vaccines. *"Drugs and vaccines are too large to produce in a test tube, and therefore, they must be*

manufactured using cell lines. The final products contain contaminants from the cell line used to manufacture the drug or vaccine. When animal cell lines are utilized, these contaminants are recognized by our immune systems as 'foreign' and are eliminated from our bodies. However, when primitive human cell lines (such as an aborted fetal cell line) are used, these contaminants have the potential to trigger autoimmune diseases or genomic instability. When we use human fetal produced vaccines or cosmetics, we are also injecting or transferring DNA and viruses from the human fetus used to create the cell line into our own bodies.... The contaminants found in vaccines and drugs that are manufactured using human fetal cell lines present the perfect storm of contaminants to cause genomic instability." Source: DNA Mutations in Pharmaceutical Drugs and Vaccines <http://soundchoice.org/research/>

**"In 1979 we started injecting our children with vaccines that are contaminated with human fetal DNA fragments and a retrovirus."**

#### **DNA Fragments Research**

1. [Vaqta Hepatitis A Vaccine is contaminated with MRC5 human fetal DNA and proteins](#) (page 1)
2. [MMR II is manufactured in WI 38 human fetal cell line](#)
3. [Hepatitis A vaccine contaminated with MRC5 human fetal debris](#) (page 8)
4. [Chickenpox Contaminated with Human Fetal DNA](#) (page 3)
5. [Chickenpox and MMR II vaccines are contaminated with a retrovirus](#)

New Study in Journal of Public Health and Epidemiology Correlates Autism Disorder Increase and Human Fetal DNA, Retroviral Agents in Vaccines "Using statistical analysis and data from the US Government, UK, Denmark and Western Australia, scientists at Sound Choice Pharmaceutical Institute (SCPI) found that increases in autistic disorder correspond with the introduction of vaccines using human fetal cell lines and retroviral contaminants.

Even more alarming, Dr Theresa Deisher, lead scientist and SCPI founder noted that, "Not only are the human fetal contaminated vaccines associated with autistic disorder throughout the world, but also with epidemic childhood leukemia and lymphomas."

Their study comes on the heels of recent breaking news that the CDC deliberately withheld evidence of the significant increase in autism among African-American boys who were vaccinated prior to 36 months of age.

So it should come as no surprise that the FDA has known for decades about the dangers of insertional mutagenesis by using the human fetal cell lines and yet, they chose to ignore it. Instead of conducting safety studies they regulated the amount of human DNA that could be present in a vaccine to no greater than 10ng.

Unfortunately, Dr. Deisher's team discovered that the fetal DNA levels ranged anywhere from 142ng - 2000ng per dose, way beyond the so-called "safe" level.

"There are a large number of publications about the presence of HERV (human endogenous retrovirus - the only re-activatable endogenous retrovirus) and its

association with childhood lymphoma," noted Dr Deisher. "The MMR II and chickenpox vaccines and indeed all vaccines that were propagated or manufactured using the fetal cell line WI-38 are contaminated with this retrovirus. And both parents and physicians have a right to know this!"

Which vaccines contain human protein and DNA? <https://bit.ly/2TU05lv>

***"Vaccination is total nonsense! More than that, it is what's hidden from people about vaccines. They are dangerous. One child out of five has overwhelming disabilities from vaccines -- neurological problems, seizures."***

**-Dr. Guylaine Lanctot, MD**

12. The FDA was called upon by the non-profit group, *Moms Across America*, to test vaccines for glyphosate contamination. Glyphosate is the main chemical in Monsanto's (now Bayer AG) weedkiller, RoundUp, which is a class-2 carcinogen. Monsanto has been covering up its [cancer link](#) for over 30 years - caught lying and literally ghost writing its own fraudulent safety studies.

The FDA refused to do testing for glyphosate so *Moms Across America* used their own funds and sent five vaccines to a lab to be tested. The results were that ALL five vaccines were contaminated with glyphosate with the Merck's MMR II vaccine having the highest amount up to 25 times the level of the other vaccines.

French scientist and glyphosate expert Gilles-Eric S  ralini has shown in his research that glyphosate is never used alone. It is always used with adjuvants (co-formulants/other chemicals) and he has found those adjuvants to make Roundup 1,000 times more toxic. The detection of glyphosate in vaccines with this methodology would indicate the presence of other co-formulants which are also toxic.

On Aug. 31, *Moms Across America* sent a letter to the U.S. Food and Drug Administration, Center for Disease Control and Prevention, EPA, National

Institutes of Health, California Department of Health and Sen. Barbara Boxer requesting that they make it a priority to test vaccines for glyphosate, recall contaminated vaccines and the EPA revoke the license of glyphosate to prevent further contamination.

1. **FDA Hides Information on Glyphosate in Vaccines** <https://bit.ly/2R7ktE>

I want to sum up some important information. VAERS is the Vaccine Adverse Event Reporting System database set up by the Dept. of Health and Human Services (HHS). It is the database system for reporting adverse events (injuries and deaths) due to vaccines. VAERS is a passive/voluntary reporting system and HHS has estimated that less than 1% of all adverse events are being reported to VAERS. In 2016, there were 59,117 vaccine adverse event reports that included 432 deaths and 1,091 permanent disabilities. If 1% being reported is accurate, then in reality there were approximately 5.9 million vaccine adverse events including 43,200 deaths and 109,000 people that have been permanently disabled from vaccines in the US in 2016 alone.

The NCVIA of 1986 mandated that HHS create a vaccine safety task force and release updated reports every two years. However, HHS has been in violation of its lawful duty to the American people and has done nothing to assess or improve vaccine safety for over 31 years. During this time, HHS also has not created any standards or protocols for testing vaccines for their safety or efficacy.

Vaccine testing is done by the vaccine manufacturer. This testing is done by some of the very same pharmaceutical companies that have pleaded guilty to multiple accounts of fraud, and have paid out many billions of dollars to injured victims and families of those that have been killed by their drugs!

In addition, pharmaceutical companies don't test their vaccines against an inert placebo in double blind trials – the gold standard of safety testing. Vaccines are being “safety” tested against: another vaccine, other vaccines or a non-antigen injection of toxic ingredients known to induce autoimmunity in laboratory animals. Vaccines aren't required to be tested for mutagenicity, carcinogenicity or impairment of fertility.

Vaccines contain neurotoxic and carcinogenic ingredients, and have been found to be contaminated with lead, uranium, glyphosate and cancer causing viruses. Vaccines are grown on mammalian tissue such as the organs of a dog, monkey, mouse, etc. or on aborted human fetuses that can induce autoimmunity.

Vaccines aren't being thoroughly tested for years. Many vaccines have been approved to be on the CDC's childhood vaccine schedule when testing was done for just days. The two Hep B vaccines were FDA approved after just four and five days of testing. The three HIB (haemophilus influenzae type b) vaccines were approved after just 3, 30 and 31 days of testing. Merck's MMR vaccine trials lasted only 42 days. There has also never been any testing for injecting multiple vaccines at one time, yet this practice is done by pediatricians regularly. The CDC has also never tested its childhood vaccine schedule for safety or efficacy.

Pharmaceutical companies also have the right to not disclose a vaccine's known risks to parents or guardians of those being vaccinated. Furthermore,

pharmaceutical companies, the CDC, doctors and anyone else who administers vaccines are legally shielded from any harm or death caused by vaccines. Think about all this for a moment. When you take ALL OF THESE things into account, what do you think about vaccines so far? What do you think of the US vaccine program? Do you think you're getting a well tested and safe product? Do you believe media pundits, doctors and government officials when they repeatedly tell you that vaccines go through rigorous safety studies and that vaccines are extremely safe? Do you have confidence in the untested CDC childhood vaccine schedule with 43 vaccines before age six and 72 vaccines before age 18?

13. What would happen if we did a study of unvaccinated children vs. vaccinated children to see which population is healthier? I can tell you that both HHS and CDC have been asked to do these studies, but have refused stating that it would be unethical to do such a study.

- Dr. Paul Thomas, MD - a pediatrician for over 30 years states, "I have over 13,000 children in my pediatric practice and I have to say, as unpopular as this observation might be, my unvaccinated children are by far the healthiest," says I've had a team compiling data for a research study that is now undergoing peer review—some of which is published in my book, *The Vaccine-Friendly Plan*.

*The data is surprising and counter-intuitive, perhaps, but it shows very clearly that the incidence of chronic disease and brain abnormalities in the entirely unvaccinated children in my practice, even those with siblings with autism, is much much lower than in children following the CDC's recommended schedule. I observed that my unvaccinated children were healthier, hardier and more robust than their vaccinated peers. Allergies, asthma and pallor and behavioral and attentional disturbances were clearly more common in my young patients who were vaccinated. My unvaccinated patients, on the other hand, did not suffer from infectious diseases with any greater frequency or severity than their vaccinated peers: their immune systems generally handled these challenges very well."*

Update 2019: Dr. Thomas hired a health informatics specialist to go through his current patient population and compare three groups of children for prevalence of autism: Unvaccinated, vaccinated according to Dr. Thomas's "Vaccine Friendly" Plan (partially vaccinated), and fully vaccinated according to the CDC schedule.

# Autism Rates for 3,344 Patients At Integrative Pediatrics

## Dr. Paul Thomas's practice data showed the following:

- One case of autism in the unvaccinated group—a rate of 1 in 715
- Six cases of autism in the partially vaccinated group (Dr. Thomas's "Vaccine Friendly" Plan)—a rate of 1 in 438
- In comparison, government data from the National Health Interview Survey (NHIS) show a diagnosed autism rate of 1 in 45 children (aged 3-17 years) as of 2014 and, by 2016, a rate of 1 in 36.  
<https://bit.ly/2q7hXjo>

- The Mawson homeschool study – Vaccinated vs. Unvaccinated: Mawson Homeschooled Study Reveals Who is Sicker <https://bit.ly/2pOTajm>  
"Mothers were asked to complete an anonymous online questionnaire on their 6- to 12-year-old biological children with respect to pregnancy-related factors, birth history, vaccinations, physician-diagnosed illnesses, medications used, and health services. Neurodevelopmental disorders (NDD), a derived diagnostic measure, was defined as having one or more of the following three closely-related diagnoses: a learning disability, Attention Deficit Hyperactivity Disorder, and Autism Spectrum Disorder. A convenience sample of 666 children was obtained, of which 261 (39%) were unvaccinated. The vaccinated were less likely than the unvaccinated to have been diagnosed with chickenpox and pertussis, but more likely to have been diagnosed with pneumonia, otitis media, allergies and NDD. After adjustment, vaccination, male gender, and preterm birth remained significantly associated with NDD. However, in a final adjusted model with

interaction, vaccination but not preterm birth remained associated with NDD, while the interaction of preterm birth and vaccination was associated with a 6.6-fold increased odds of NDD (95% CI: 2.8, 15.5)."

- From Bologna, Italy – Open Letter of 120 Doctors : "Healthier Unvaccinated Children" <https://bit.ly/2S1LF5V> (Google translate was used.) "More than 120 doctors who, after weeks of debates and polemics on the subject, come out into the open with an open letter to the Higher

Institute of Health. The conclusion is destined to provoke a sensation: "Unvaccinated children appear undoubtedly and globally healthier, less susceptible to infectious diseases, airway species, less prone to intestinal disorders and chronic diseases, less prone to neurological and behavioral and poor pathologies drug users and health interventions".

- Dr. Toni Bark, MD a former pediatric ER physician, and now family doctor in private practice and expert on VACCINES talks about her patient population of vaccinated vs. unvaccinated. "The kids that come to me from other practices and are fully vaccinated often are the kids, well they are the kids in my practice with asthma, panic disorders, OCD, PANDAS [pediatric autoimmune neuropsychiatric disorders associated with streptococcal infections], autism, Asperger's. My kids who never have been vaccinated in my practice, I don't see those issues. I don't have one child who was not vaccinated who also has asthma or food allergies or Asperger's or autism or Crohn's or ulcerative colitis." The entire video is worth watching <https://youtu.be/PSoZg0jZLjU>
- Françoise Berthoud, MD (pediatrician) -- "THE LESSON LEARNED ON VACCINATION -- As a concerned, compassionate and considerate paediatrician, I can only arrive at one conclusion. Unvaccinated children have by far the best chance of enjoying marvellous health. Any vaccination at all works to cripple the chances of this end." The Marvellous Health of Unvaccinated Children by Françoise Berthoud, MD <https://bit.ly/2Tk0JvL> or <https://bit.ly/2Wi8eoR>
- Lawrence B. Palevsky, MD (pediatrician) "One of the things I've noticed over the years is how so many people believe that unvaccinated babies and toddlers are developmentally advanced for their age, as compared to the other children around them. Parents of vaccinated children look at these unvaccinated children in awe, and often wonder to their parents, "gee, what are you doing that your children are so advanced?"  
Most parents of vaccinated children don't want to know the real reason these children are so advanced, because they're afraid to know the truth. And, if they hear the truth, they usually disagree with it or even walk away and stop talking to these parents. And, I understand that. They trust their physicians to do the right thing, and believe they are making the right decision. They don't want to know they might have been complicit in hurting their children, or admit that something is wrong with their children, or accept that their children's development is behind the other children. But, the reality is, and I don't mean to break parent's hearts- most of these unvaccinated children are not more developmentally advanced. They're just neuro-typical for their age.  
They've read the section on normal development in the pediatric textbooks. At least the textbooks I read when I trained in pediatrics. These 'advanced' children are developing the way we used to expect them to, before we started creating the new norm of children with neurodevelopmental delays. See the transcript of the Simpsonwood Conference for starters <https://bit.ly/2uFLXFR>

The vaccinated children, as a whole, have become so neuro-developmentally delayed that their peer group of unvaccinated children now appear to be more advanced. 1 in 6 children in the US has some developmental disability according to a Pediatrics journal article in March 2011

<https://bit.ly/2OMgY46>

And, 1 in 45\* children in the US is diagnosed with autism, according to the CDC, another developmental delay.. The bar has been lowered.....

When I was training in Pediatrics in the 1980's, we were taught that 2 word sentences and a vocabulary of over 100 words was normal speech development for 2 year-old children. Parents are now being told by their pediatricians that it is acceptable if their 2 year-old children are only speaking 20 words. Forget about 2 word sentences. That is a milestone that is expected to come much later than 2 years of age. These children with 20 words at 2 years of age won't get speech services because twenty words at 2 years of age is now considered normal speech development. This is a far cry from what constitutes normal speech development. But, more and more people are accepting this new norm. Were my textbooks, and teachers, and mentors wrong 25+ years ago about what constitutes normal child development? Are we now getting it right after all these years by saying 20 words at 2 years of age is acceptable speech development? No, to both questions.

Our society doesn't have the capacity to accept that so many children are now speech & developmentally delayed, and can't address the role vaccines may play in contributing to this problem. Since the resources to help these delayed children are scarce, and there are more and more of these delayed children, we just lower the bar, and accept a new normal, i.e., speech & other developmental delays are normal. At the same time, however, we continue to produce the new norm of more and more children with speech & other developmental delays every day.....If people don't think vaccinations are contributing to their children's neuro-developmental delays, see the following study, which suggests that motor reflexes may already be impaired in newborn monkeys right after they receive a single dose of a thimerosal-containing Hepatitis B vaccine at birth, as compared to a control group. <https://www.ncbi.nlm.nih.gov/pubmed/20711932>. The same may be true for human infants who now receive the aluminum-containing, thimerosal-free Hepatitis B vaccine, since "aluminum is now being implicated as interfering with cellular and metabolic processes in the nervous system and in other tissues." <https://bit.ly/2Uz2J88>

In addition, all of the following vaccines contain aluminum - DTP (diphtheria-tetanus-pertussis vaccine), DTaP (diphtheria-tetanus-acellular pertussis vaccine), some but not all Hib (Haemophilus influenzae type b) conjugate vaccines, Pneumococcal conjugate vaccine (Prevnar or PCV-13), Hepatitis B vaccines, all combination DTaP, Tdap, Hib, or Hepatitis B vaccines, Hepatitis A vaccines, Human Papillomavirus vaccine (Gardasil), anthrax vaccine and rabies vaccine. Those vaccines that do not contain aluminum - IPV, MMR,

Varicella, and Influenza (many of which still contain thimerosal) - are often given in tandem with the vaccines that do contain aluminum. Tell your pediatricians that aluminum injection leads to motor deficits and motor neuron degeneration. So sad." <https://bit.ly/2uKtmZ7>

\*Note: This social media post by Dr. Lawrence Palevsky, MD has been updated to reflect the current autism number of 1 in 45 children.

- Dr. Kelly Sutton, MD "I see daily in my practice evidence of vaccine injury and I hear stories almost every day of families that vaccinate children and then decide not to vaccinate and the unvaccinated children within the same family are healthier, more socially adjusted and more capable academically even though their parents are older than the siblings who were born first and were fully vaccinated."
- Dr. Bob Zajac, MD (board-certified pediatrician) "Doing this for 15 years now, I will share with you that the vaccinated kids are the sickest, the partially vaccinated kids are not as sick, and the unvaccinated kids are the healthiest."
  - Why This Former "Vaccine Bully" Pediatrician No Longer Vaccinates His Own Children <https://bit.ly/2q4hv64>
- Dr. Cornelia Franz, 30 year pediatrician <https://bit.ly/2Wloagt> "The children I have who are unvaccinated are, across the board, healthier; and I can just tell you that."
- Vaccinated children have up to 500% more disease than unvaccinated children <https://bit.ly/2UNfRDt>
- The 1992 IAS Survey of Vaccinated and Unvaccinated Children  
Unvaccinated children are healthier.
  1. <http://www.whale.to/v/ias1992study.pdf>
- Studies Prove Vaccinated Children Are at Greater Risk of Serious Illness and Neurological Disorders <https://bit.ly/2KrgukF>
- Survey: State of health of unvaccinated children <https://bit.ly/2Ln1YaX>  
"The results of our survey with currently 17,036 participants show that unvaccinated children are far less affected by common diseases than vaccinated children. This survey showed that in German children, 11 percent of those vaccinated reported having ear infections, compared to less than 0.5 percent of unvaccinated children. Similarly, sinusitis was reported in over 32 percent of vaccinated children, while the prevalence in unvaccinated children was less than one percent." In other words, vaccinated children were 22 times more likely to have ear infections and 32 times more likely to have sinusitis! Think about all the courses of antibiotics these kids were given as well!  
"Due to the fact that the majority of children in the survey are between 0 and 2 years of age and some diseases generally do not appear in this age group, [they appear later in life] the results are subdivided into different age groups. Information about country, gender, age, age distribution, breastfeeding, preferred treatment can be found [here](#)."

<https://bit.ly/2WUb3NQ>

*"People will tell you they believe in vaccines. But when you ask them what they know about vaccines, it will be almost nothing!"*

**-Dr. Suzanne Humphries, MD**

14. In 1962, US children received 5 doses from 3 vaccines by age 18. With no major epidemics, by 1983 the number of vaccines increased almost 500% to 24 doses. In 2018, 72 doses of 16 vaccines are on the CDC schedule, almost a 15 fold increase from 1962. Three more vaccines are supposed to be added to the CDC schedule in 2019 for a total of 75 vaccines by age 18.

## VACCINE DOSES for U.S. CHILDREN

1962	1983	2018
<b>5</b> Doses	<b>24</b> Doses	<b>72</b> Doses
Polio Smallpox DTP	DTP (2 months) OPV (2 months) DTP (4 months) OPV (4 months) DTP (6 months) MMR (15 months) DTP (18 months) OPV (18 months) DTP (4 years) OPV (4 years) Td (15 years)	Influenza (pregnancy) DTaP (pregnancy) Hep B (birth) Hep B (2 months) Rotavirus (2 months) DTaP (2 months) Hib (2 months) PCV (2 months) IPV (2 months) Rotavirus (4 months) DTaP (4 months) Hib (4 months) PCV (4 months) IPV (4 months) Hep B (6 months) Rotavirus (6 months) DTaP (6 months) Hib (6 months) PCV (6 months) IPV (6 months) Influenza (6 months) Influenza (7 months) Hib (12 months) PCV (12 months) MMR (12 months) Varicella (12 months) Hep A (12 months) DTaP (18 months)
		Influenza (18 months) Hep A (18 months) Influenza (30 months) Influenza (42 months) DTaP (4 years) IPV (4 years) MMR (4 years) Varicella (4 years) Influenza (5 years) Influenza (8 years) Influenza (7 years) Influenza (8 years) Influenza (9 years) HPV (9 years) Influenza (10 years) HPV (10 years) Influenza (11 years) HPV (11 years) DTaP (12 years) Influenza (12 years) Meningococcal (12 years) Influenza (13 years) Influenza (14 years) Influenza (15 years) Influenza (16 years) Meningococcal (16 years) Influenza (17 years) Influenza (18 years)

*"In 1986, pharmaceutical companies producing vaccines were given full federal protection from lawsuits resulting from vaccine injury or death via the Childhood Vaccine Act passed by Congress. If vaccines are so safe, why did they need a law to protect from liability? After this law, vaccines became **HIGHLY** profitable. There are almost 300 vaccines in development, and mandatory vaccine laws for children – and **ADULTS** – being pushed in most states.*

The US gives 2-3x more vaccines to children than most developed countries, yet we have skyrocketing rates of childhood issues that are **NOT** seen in other countries. Things like asthma, childhood diabetes, food allergies, childhood leukemia, developmental delays, tics, ADHD, autism, lupus, arthritis, eczema, epilepsy, Alzheimers, brain damage, etc... **It's NOT a coincidence**

Vaccines contain toxic chemicals that do **NOT** belong in our bodies, such as aluminum, (known to cause brain and developmental damage even in small doses), polysorbate 80, MSG and formaldehyde (known to cause cancer in humans).

**RESEARCH, don't REGRET**

**www.LearnTheRisk.org**

There are [over 271 vaccines in pharma's pipeline](#) and by 2020 the vaccine industry is expected to be worth \$60 billion – 350-times larger that it was before the 1986 Act that holds them harmless for injury or death. As the NY Times reports, *“Once a loss leader for manufacturers, because they are often more expensive to produce than conventional drugs, vaccines now can be very profitable... since 1986, they have pushed up the average cost to fully vaccinate a child with private insurance to the age of 18 to \$2,192 from \$100, according to data from the Centers for Disease Control and Prevention.”*

With no major disease epidemics in the United States, why is it that the United States CDC vaccine schedule has increased almost 15 fold? Part of the answer to this question is in #15 below.

15. Did you know that the US Center for Disease Control & Prevention or CDC as well as its vaccine approval committee called ACIP (Advisory Committee On Immunization Practices), are often financially involved and may own patents on vaccines?

Unbeknownst to almost all of the public, including doctors and other health professionals, CDC holds over 20 vaccine patents and generates over \$4 billion in revenue from vaccines each year.

5. Examining RFK, Jr.'s claim that the CDC “Owns over 20 vaccine patents.”

<https://bit.ly/2BUxwQj>

6. Patents that CDC owns for VACCINES – Conflict of Interest --Biased

Towards Profit and NOT Public Health <https://bit.ly/2rZZmH4>

In addition, a significant number of ACIP committee members receive direct financial returns when more vaccinations are added to the current schedule.

Many own vaccination related patent(s) and/or stock shares of the pharmaceutical companies responsible for supplying new vaccines to the public. Others receive research grant money, funding for their academic departments, or payments for the oversight of vaccine safety trials. In total, 56 individual patents were found to be owned or shared by one or more members of the ACIP committee or other committees within the CDC.

Source: CDC Members Own More Than 50 Patents Connected to Vaccinations

<https://bit.ly/2J41nvZ>

Like any for-profit entity, the CDC promotes and markets the use of their products (vaccines) by creating marketing and training materials, and hiring outside marketing/PR firms to create social media and other marketing campaigns. Below is an example (article and screenshot) of the CDC using mommy bloggers to promote the use of vaccines along with CDC's social media toolkit and their guide to writing for social media.

1. When the Trolls Don't Get the Job Done, Pay the Pro-Vax Mommies

<https://bit.ly/2Brq7J2>

2. Honest Disagreement in A Pro-Vaccine World <https://bit.ly/2EAPUma>

## Is Anonymous a real mom?

This may sound like a cold question but our savvy readers know that the CDC and other pro-vaccine stakeholders routinely pay "mommy bloggers" to write (and comment) about the benefits and advantages of vaccination. Here's an ad circulating last month from Megan Media:

The image shows a screenshot of a form titled "Megan Media (SocialMoms) | CDC Vaccination Awareness Paid Blogging Opportunity". The form has a colorful geometric pattern header. The text on the form reads: "We are looking for Moms with kids under the age of 2 years old (or who can reach that audience) who want to raise awareness around childhood vaccinations. The recommended immunization schedule is designed to protect infants and children early in life, when they are most vulnerable and before they are exposed to potentially life-threatening diseases. Please fill in the form below if you are interested and feel free to forward this on to any other influencers you may know who would be interested in spreading the word! Please click here for more information: <http://1.usa.gov/1MmMVfB> This campaign begins on or around April 11th and will last approximately one month. Thanks for your consideration! Megan Media \* Required First Name \*

5. CDC presentation to promote the HPV vaccine -- *Harnessing the Power of Social Networks, Mommy Bloggers, and Google (and improving HPV vaccination awareness at the same time)*

Note: The CDC presentation has been removed from their website. Here is the screenshot from Google and front page of the presentation

### **Harnessing the Power of Social Networks, Mommy Bloggers - CDC**

[https://www.cdc.gov/cancer/breast/.../harnessingpowersocialnetworks\\_jrourk\\_final.pdf](https://www.cdc.gov/cancer/breast/.../harnessingpowersocialnetworks_jrourk_final.pdf) ▼

Sep 21, 2011 - **Harnessing the Power of Social Networks,. Mommy Bloggers, and Google.** (and improving HPV vaccination awareness at the same time).

***"A system is corrupt when it is strictly profit-driven, not driven to serve the best interests of its people, but those of multinational corporations."***

**-Suzy Kassem, Rise Up and Salute the Sun**

In actuality, the CDC operates more like a deceptive front group selling and marketing vaccines to the public, except it's not for public's best interest, it's for their own!

16. The Department of Health and Human Services (HHS), through the National Institutes of Health (NIH), owns patents on all HPV (human papillomavirus) vaccines, and receives a percentage of the profits for each dose of Merck's Gardasil and GlaxoSmithKline's (GSK) Cervarix administered anywhere in the world.

7. How A Public-Private Partnership Made the Government Merck's Gardasil Partner <https://bit.ly/2LIUgOc>

17. Did you know that in the United States pediatricians make money administering vaccines? Insurance companies like Blue Cross, Blue Shield pay pediatricians bonuses based on the percentage of children in their practice who are fully vaccinated by age two.

When a pediatrician's before age two patient population reaches 63% fully vaccinated, including the flu shot, that physician is paid by Blue Cross Blue Shield \$400 per fully vaccinated child. The average pediatrician in the US has 1,546 children in their practice. If a pediatrician has 10% of their practice or 150 children before the age of two fully vaccinated, the incentive for the physician could be an extra \$60,000 in bonus money! Two hundred patients fully vaccinated before the age of two, and their bonus money is \$80,000!

This also means that under Blue Cross Blue Shield's rules, pediatricians lose the whole bonus unless at least 63% of their before age two patients are fully vaccinated. So it's not just \$400 for your child. It could be the pediatrician's entire bonus. To the average US pediatrician, your decision to vaccinate your child might be worth \$40,000, \$60,000, \$80,000 or more in financial incentives depending on the size of his or her practice.

Moreover, this financial model incentivizes pediatricians to deter parents from spacing out vaccines for their child (which many parents want to do) and instead to covertly persuade parents to get their child vaccinated in the timeframe of the CDC schedule, which by the way has NEVER been studied for safety or efficacy! In addition, this is likely one of the main reason why many pediatricians are kicking families out of their practice who don't want to vaccinate their children because it negatively affects their percentage of vaccinated children in their practice.

Depending on how many doses of the flu vaccine are given in the first two years of life, in 2018, a baby could receive as many as 29 to 31 vaccines with multiple untested vaccines in one visit. Think about ALL of this the next time your pediatrician wants to force vaccines on your child!

The image below is from Blue Cross, Blue Shield's *Performance Recognition Program*, page 16, CHILDHOOD IMMUNIZATIONS. Notice the yellow highlights for TARGET: 63% and PAYOUT: \$400 paid out per eligible member, aka per child.

## HEALTH CARE OUTCOMES: PREVENTIVE HEALTH

CHILDHOOD IMMUNIZATIONS – COMBO 10	
Product lines	BCN Commercial
Source	HEDIS
Description	<p>The percentage of children 2 years of age who meet the combination 10 criteria on or before their second birthday:</p> <ul style="list-style-type: none"> <li>• (4) DTaP* vaccinations</li> <li>• (3) IPV* vaccinations</li> <li>• (1) MMR vaccination</li> <li>• (1) VZV vaccination</li> <li>• (3) HiB* vaccinations</li> <li>• (3) Hepatitis B vaccinations</li> <li>• (4) PCV* vaccinations</li> <li>• (1) HepA vaccination</li> <li>• (2 or 3) RV* vaccinations</li> <li>• (2) Influenza** vaccinations</li> </ul> <p>*Vaccinations administered prior to 42 days after birth are not counted as a numerator hit.  **Vaccinations administered prior to 180 days after birth are not counted as a numerator hit.</p>
Continuous enrollment	Must be continuously enrolled 12 months prior to child's second birthday
Age criteria	Children who turn 2 years of age during 2016
Exclusionary criteria	Children who are documented with an anaphylactic reaction to the vaccine or its components
Numerator	The number of children who completed vaccinations as defined above
Denominator	The eligible population
Level of measure	Provider level
Target: COMM	63%
Payout: COMM	\$400 per Combo 10 completed for each eligible member

Link to [Blue Cross, Blue Shield's 2016 Performance Recognition Program booklet](#).

On page 4, you will also see there are physician financial incentives for breast cancer screening (mammograms - emit radiation that increase a woman's chance of breast cancer by 1-2% with each mammogram), diabetes drugs, hypertension drugs, cholesterol lowering drugs (dangerous statins), etc. Lastly, it is a joke to call this a performance recognition program when it is really a financial incentive program. It exists so that physicians administer more vaccines, more pharmaceutical drugs and more medical tests and procedures onto their patients. (It also jacks up health insurance costs.) These "incentives" are really bribes and should be illegal, or at the very least, known by every patient in every physician's practice!!

3. Ten Questions for Your Doctor on Vaccines <https://bit.ly/2Qg415q>

#### 4. How Your Pediatrician Will Pressure You To Vaccinate

<https://bit.ly/2CtX603>

18. For parents who question the safety of vaccines, the CDC gives pediatricians a playbook or “training guide” with scripts to convince parents that vaccines are safe and necessary for their child. Many of these scripts were written by pharmaceutical executives as well as the CDC who takes money from the pharmaceutical companies through its separate entity called the CDC Foundation. In the training manual it states, “Make a strong case for vaccines to your patients.” <https://vactruth.com/2015/01/22/expect-from-doctor/>
19. Let’s talk about the supposed non-profit CDC Foundation, which few people even know exists, except of course Congress and the pharma/vaccine related companies that “donate” money. The CDC Foundation was formed in 1995, and is a separate entity of the CDC, set up for the sole purpose to allow industries to donate (bribe) and influence the CDC through its Foundation. (The last part may be my opinion, but you can decide for yourself if you think that’s accurate.)
  - In 2010, the CDC and the CDC Foundation formed the *Viral Hepatitis Action Coalition*. Manufacturers of hepatitis C tests and treatments have donated more than \$26 million to the coalition. (How sweet of them!) Just two years later, the CDC issued guidelines recommending expanded screening for hepatitis C for everyone born between 1945 and 1965, saying newer antiviral drugs can effectively halt disease progression. These newer drug can cost in excess of \$84,000 per treatment course!
  - In 2014, the CDC Foundation received \$12 million from private corporations. In that same year, The CDC itself received another \$16 million in funding earmarked for special projects from companies, manufacturers, and various philanthropists.
  - In 2017, the CDC Foundation received over [\\$86 million in contributions and in-kind donations](#) – goods or services not involving money.
  - Since 1995, donations have been received by 603 corporations totaling over \$741 million.
  - In the list of corporate sponsors, there are at least 107 pharmaceutical related companies, by far the most represented industry.

What is just as worrisome as how much influence pharma related industries have over the CDC, is the fact that the CDC has drawn tons of money and favors from over 54 corporate donors in the PR, advertising, marketing, media and communication industries. These entities control the media and are responsible for the information that gets out to the millions of people through hundreds of media outlets across the US. It's no wonder the massive amount of corruption and conflicts of interest at the CDC have never been exposed throughout the mainstream media!

Here is a [partial donor list based on industry](#). Here is the [complete list of CDC Foundation corporate donors](#).

1. Conflicts of Interest Have Corrupted the CDC <https://bit.ly/2ArJcvs>  
***"Despite the agency's disclaimer [that they have] 'no financial interests... and does not accept commercial support', the CDC receives millions of dollars in***

*industry gifts and funding, both directly and indirectly, and several recent CDC actions and recommendations have raised questions about the science it cites, the clinical guidelines it promotes, and the money it is taking."*

**-Jeanne Lenzer, BMJ Associate Editor, May 2015**

20. CBS News Reports: Some of the most "trusted" voices in the vaccine "safety" movement are really *paid shills* for promoting vaccines with strong financial ties to pharma [https://youtu.be/K1Hw-Q23S\\_s](https://youtu.be/K1Hw-Q23S_s)
  8. CDC Vaccine Advisor (Dr. Paul Offit) Made \$29 Million Or More After Using Role to Create Market. Offit is also on Merck's payroll <https://bit.ly/2TfGeAw>
  9. This 9 second video shows a brief glimpse inside a private pro-vaccine meeting. Dr. Paul Offit, who has financial ties to Merck, accidentally speaks truthfully about the MMR vaccine and autism <https://youtu.be/c2cHZa8t98w>
  10. Dr. Paul Offit, who is on Merck's payroll, an advisor to the CDC and is a vaccine advocate has stated, "*Parents can be reassured that the trace quantities of aluminum in vaccines can't possibly do harm.*" Dr. Paul Offit's Aluminum Deceptions and Academic Misconduct <https://bit.ly/2WxoVxc>
  11. Watch this >>> See Dr. Paul Offit and The Children's Hospital of Philadelphia (CHOP) lying about the safety of aluminum in vaccines in this 2 minute video <https://youtu.be/bfyNgFxygLc> (Read #7 above where I discuss route of entry to understand the lies in this video. And just for good measure here is a study on aluminum injection:
    1. Aluminum hydroxide injections lead to motor deficits and motor neuron degeneration <https://bit.ly/2uKtmZ7>.)

To learn more about Dr. Paul Offit and how other paid pharma/vaccine shills operate to manipulate you, be sure to see the section *Shills, Trolls, Front Groups, PR Smear Tactics & More.*
21. In 2014, Dr. William Thompson, a Senior Scientist in the Immunization Dept, at the CDC, after a decade of silence, admitted in over two hours of [recorded telephone conversations](#) that he, along with four other CDC scientists, committed scientific fraud by omitting data and destroying evidence that showed that Merck's MMR vaccine had caused a statistically significant increase (340%) in autism in black boys when compared to other populations in the Atlanta area.

*"I regret that my coauthors and I omitted statistically significant information in our 2004 article published in the journal Pediatrics. The omitted data suggested that African American males who received the MMR vaccine before age 36 months were at increased risk for autism. Decisions were made regarding which findings to report after the data were collected, and I believe that the final study protocol was not followed."* - Dr. William W. Thompson, CDC Scientist

All five scientists got together in a room with a big garbage can and destroyed hard copies of all documents related to this study. However, unbeknownst to his CDC colleagues, Dr. Thompson did not destroy his documents or hard drive because he thought it was a crime that would violate both DOJ (Dept. of Justice)

and FOIA (the Freedom of Information Act.) (Dr. Thompson is right. It is a crime!) When the leak was about to come out Dr. Thompson was warned and hired an attorney, and was granted whistleblower immunity. Dr. Thompson turned over all his documents (around 10,000) to Florida Congressman Bill Posey who presented preliminary information before Congress begging to subpoena Dr. Thompson (video below.) Congress so far have done NOTHING.

1. Rep. Bill Posey Presenting Before Congress and Calling for an Investigation of the CDC MMR Vaccine Fraud <https://youtu.be/wJKzkKw20kk> or <https://youtu.be/ctLqzE3szLQ> *"I regret that my co-authors and I omitted statistically significant information in our 2004 article published in the journal, Pediatrics.... The co-authors scheduled a meeting to destroy documents related to the study... and put them in a huge garbage can."*
2. AUTISM -- The Lies Being Told & Truths Being Hidden | Dr. Paul Thomas, MD <https://youtu.be/ddCNIhN3TT4>
3. Screenshot from Facebook: image of CNN's article, now pulled from their website -- *CDC Autism Whistleblower Admits Vaccine Study Fraud*

August 22, 2014 · Oak Harbor, WA · 🌐

Just now from CNN

William W. Thompson, PhD, Senior Scientist with the CDC has stepped forward and admitted the 2004 paper entitled "Age at first measles-mumps-rubella vaccination in children with autism and school-matched control subjects: a population-based study in metropolitan Atlanta," which has been used repeatedly by the CDC to deny the MMR-autism connection, was a fraud.

IREPORT.CNN.COM

## **CDC Autism Whistleblower Admits Vaccine Study Fraud**

William W. Thompson, PhD, Senior Scientist with the CDC has stepped...

***"If you tell a big enough lie and tell it frequently enough, it will be believed."***

**-Adolf Hitler**

These revelations from CDC scientist Dr. William Thompson are stunning. Thompson has admitted that he and his CDC co-authors removed data and destroyed documents from a 2004 study that showed a 340% increase in African-American children who received the MMR vaccine. This conduct violated the study's original design and was clearly done to bury the link between the MMR vaccine and autism!!

If the CDC's Division of Vaccine Safety altered data in this study to conceal connections between autism and vaccine injury, one must question the integrity of ALL research that the CDC has produced and sponsored and ask, *"where else has the CDC altered data in vaccine safety studies to maintain the US government's talking point that "vaccines don't cause autism"?"*

22. On February 2, 2004, (10 years before Dr. Thompson admitted that the CDC committed scientific fraud with their 2004 MMR-autism study in the journal *Pediatrics*), Dr. Thompson jumped rank and sent a letter (shown below) to CDC Director Julie Gerberding about his concerns related to the MMR-autism link that their study found. In his letter, Dr. Thompson states that he was dissatisfied with the CDC correspondence to the public about the study's autism link and asked what he should do when he appears on a panel on February 9, 2004 and states, "*I will have to present several problematic results relating to statistical associations between receipt of the MMR vaccine and autism.*" CDC director, Dr. Julie Gerberding's decision was to remove Dr. Thompson from speaking and replace him with Dr. Frank DeStefano who lied in front of the panel. When Dr. Thompson's letter leaked to the press, it was released by NaturalNews.com, while the mainstream media did nothing, censoring this critical information from the public, while protecting the CDC, pharma (Merck). See screenshot below or read [Dr. Thompson's letter here.](#)

For more on this incredible cover-up that all of mainstream media censored (CNN, ABC, NBC, CBS, FOX, etc.), see the section below: [Vaccine Fraud at the](#)

## **CDC, Part 1 -- MMR Vaccine Fraud and the CDC Whistleblower**

February 2nd, 2004

Dear Dr. Gerberding,

We've not met yet to discuss these matters, but I'm sure you're aware of the Institute of Medicine Meeting regarding vaccines and autism that will take place on February 9<sup>th</sup>. I will be presenting the summary of our results from the Metropolitan Atlanta Autism Case-Control Study and I will have to present several problematic results relating to statistical associations between the receipt of MMR vaccine and autism.

It's my understanding that you are aware of several news articles published over the past two weeks suggesting that Representative David Weldon is still waiting for a response from you regarding two letters he sent you regarding issues surrounding the integrity of your scientists in the National Immunization Program. I've repeatedly asked individuals in the NIP Office of the Directors Office why you haven't responded directly to the issues raised in those letters and I'm very disappointed with the answers I've received to date. In addition, I've repeatedly told individuals in the NIP OD over the last several years that they're doing a very poor job representing immunization safety issues and that we're losing the public relations war.

On Friday afternoon, January 30<sup>th</sup>, I presented the draft slides for IOM presentation to Dr. Steve Cochi and Dr. Melinda Wharton. The first thing I stated to both of them was my sincere concern regarding presenting this work to the Institute of Medicine if you had not replied to Representative Weldon's letters. I have attached the draft slides for your review. I have been told that you have suggested that the science speak for itself. In general I agree with that statement, but as you know, the science also needs advocates who can get the real scientific message out to the public.

In contrast to NIP's failure to be proactive in addressing immunization safety issues, you have done an amazingly effective job addressing the press on a wide range of controversial public health issues including SARS, Monkey Pox and Influenza. The CDC needs your leadership here because I may very well be presenting data before a hostile crowd of parents with autistic children who have been told not to trust the CDC. I believe it is your responsibility and duty to respond in writing to Representative Weldon's letters before the Institute of Medicine meeting and make those letters public. Otherwise, you give the appearance of agreeing with what he has been suggested in those correspondences and you're putting one of your own scientists in harms way. This is not the time for our leadership to act politically. It is a time for our leadership to stand by their scientists and do the right thing. Please assist me in this matter and respond to Representative Weldon's concerns in writing prior to my presentation on February 9<sup>th</sup>.

Sincerely,

William W. Thompson, PhD  
Epidemiologist  
Immunization Safety Branch

23. In December 2014, Merck (pharmaceutical giant, the second largest vaccine maker in the world and makers of the MMR vaccine) hired [former Director of the CDC Julie Gerberding, MD](#) as their Executive Vice President in their vaccine division. Gerberding was involved in the scientific fraud and cover-up of the MMR-autism study in 2004. Now she works for Merck making millions. Her annual salary is estimated to be \$2.5 million and she was awarded \$38 million in stock options.

1. Merck Purchases Former "Public Servant" Dr. Julie Gerberding of CDC and Makes Her Vaccine President <https://bit.ly/2RiINV5>

2. Julie Gerberding, MD became a millionaire when she sold over 38,000 shares of Merck stock <https://bit.ly/2rFQlTF> and <https://bit.ly/2PK8usW>

6. (CBS News) Vaccines and autism: a new scientific review <https://cbsn.ws/2DvCfHJ>
7. GlaxoSmithKline's 1,271 PAGE CONFIDENTIAL REPORT TO REGULATORY OFFICIALS -- See chart on page 626 -- notice AUTISM is listed twice <https://bit.ly/1D9jqpr>

25. In 1975, autism rates in the United States were 1 in 5,000 children. Ten years later in 1985, the new cases of autism doubled to 1 in 2,500. Ten years later in 1995, the rate increased by a whopping FIVE times to 1 in 500 children. In 2014, 19 years later, the CDC released data on the prevalence of autism in the United States and an astonishing 1 in 68 children are newly diagnosed with autism. However, the CDC had not included children younger than eight years of age.

In 2016, the CDC surveyed differently and included children between three years to 17 years. The rate of autism now has been estimated to be 1 in 45 children!! In New Jersey, an unbelievable 1 in 9 boys is diagnosed with autism. Autism continues to be over four times more common among boys (1 in 37) than among

girls (1 in 151). FACT: Regardless of what you hear or who you hear it from: epidemics are not genetic!!

## US explosion of Autism

It's not just autism! US children are experiencing a host of health problems as compared to children in other industrialized countries. More than 1 child in 6 has a learning disability; 1 in 9 children has asthma; 1 in 25 has a severe food allergy, and more children than ever before are getting cancer. I was born in 1961 and no one in school, who I knew, or heard about had as a child – diabetes, food allergies, ADHD, ADD, asthma, cancer or autism. What about you?

***"I am no longer trying to dig up evidence to prove vaccines cause autism. There is already abundant evidence.... This debate is not scientific but is political."***

***-Dr. David Ayoub, M.D.***

26. As I mentioned earlier, there has never been large double-blind *inert* placebo controlled study on any vaccine. However, many drug companies like Merck, have *pretended* to create a placebo controlled study as Merck has done this with their HPV vaccine, Gardasil, but instead of using saline, Merck used its patented adjuvant, amorphous aluminum hydroxyphosphate or AAHS as the placebo in the large majority of the subjects in the control group. (Note: The definition of a

placebo is an *inert* substance that has *no* effect on the human body. For a vaccine this would be saline.)

1. The BMJ - RIAT restoration of a previously unpublished methodology in Gardasil vaccine trials <https://bit.ly/2Cl6pZW> *“Both trial publications state that they are reports of “placebo-controlled” trials.[1,2] However participants in the control arm of these trials did not receive an inert substance, such as saline injection. Instead, they received an injection containing amorphous aluminium hydroxyphosphate (AAHS), a proprietary adjuvant system that is used in Gardasil to boost immune response.*

*The use of a comparator that was neither an inert substance nor an efficacious vaccine against another disease demands explanation. The clinical rationale for such a decision is unclear, as the trial arms do not mimic the real life choice of deciding whether or not to receive HPV vaccine, and it is incompatible with established ethical principles regarding the use of placebo in vaccine trials.[4] However, in at least two key trial publications, of the FUTURE II[1] and FUTURE III[2] trials, the rationale for the use of AAHS-containing control is unstated.”*

Video Explanation

<https://www.facebook.com/VaXismNEWS/videos/vb.669084493234593/275952453098910/?type=2&theater>

In addition, of those that were in this study, within three years 30 boys and girls died. Seventeen who got the HPV vaccine and 13 who got Merck's aluminum “placebo”. Most of them died within 4 to 6 weeks of being injected. Merck decided this “study” was a wash since the death numbers in both groups were basically the same.

In Gardasil's trials a category of harm called, new medical conditions -- infections, reproductive disorders, autoimmunity, was also reported and as much as 10% of previously healthy young women developed reproductive disorders.

Merck is the second largest vaccine maker in the world and has 11 of the 17 vaccines on the US CDC childhood vaccine schedule. They are the manufacturers of the MMR vaccine as well as the arthritis drug Vioxx. Merck is in court right now for falsifying data related to the mumps part of their MMR vaccine. With their drug Vioxx, Merck lied to doctors and the public, and marketed Vioxx hiding the fact that their drug caused heart attacks and strokes in their own studies. Vioxx ended up causing upwards of 189,000 strokes or heart attacks and killed over 55,000 people! No one at Merck went to jail or was even tried in a court of law.

2. Lead Developer Of HPV Vaccines Comes Clean, Warns Parents & Young Girls It's All A Giant Deadly Scam <https://bit.ly/2w7mRiS>
  3. What the Gardasil Testing May Have Missed <https://bit.ly/2ATG0pY>
27. Gardasil, Merck's HPV vaccine, does not reduce the rate of cervical cancer or any other type of cancer as you may have heard from your doctor, your mother, Merck's PR machine or one of the media talking heads aka “hired guns”, such as

The Today Show's Dr. Nancy Snyderman, MD. In fact, even the FDA has ruled -- *"Efficacy of high-grade cervical cancer was not established."*

The HPV vaccine reduces the rate of neoplasia. However, 97% of those who get neoplasia, (abnormal growth of tissue), clear without any incident. For the remaining 3%, there is a cream that shuts down HPV.

In addition, the [Gardasil insert](#) states, *"GARDASIL 9 has not been evaluated for the potential to cause carcinogenicity, genotoxicity or impairment of male fertility."*

(By the way, vaccine manufacturers aren't required to test for carcinogenicity, mutagenicity or impairment of fertility.)

There is even evidence that the HPV vaccine can make you susceptible to more serious strains of HPV that could lead to cancer and trial data from Merck shows that Gardasil vaccinations may actually increase your risk of cervical cancer.

1. <https://bit.ly/2rJ7oUA>
2. <https://bit.ly/2LnbaMt>
3. <https://bit.ly/2PINPWf>

28. There are 209 strains of the human papillomavirus or HPV that have been identified. The Gardasil 9 vaccine covers nine of these strains. Of the 200 or so strains the vaccine doesn't address, some of these strains are rare and there is a possibility that the vaccine can increase their prevalence, which can make the vaccinated person as much as 60% more susceptible to HPV.

*"In the US, statistics show that out of 100,000 women, eight women will get cervical cancer and two will die. However, if 100,000 women get the HPV vaccine, 2,300 will have a life threatening adverse event."* Del Bigtree, One Conversation Conference On Vaccines <https://oneconversationatatime.com/>

*"In Merck's own study, out of those who received the HPV vaccine (Gardasil), 1 in 792 died. Accordingly, in the US, we would kill 99 women to get one less cervical cancer death."* Dr. Toni Bark, MD, One Conversation Conference On Vaccines <https://oneconversationatatime.com/>

29. Because it is recommended every year, the flu vaccine is the most profitable vaccine for the CDC and pharma. Each year during "flu season" the CDC colludes with the media and creates fake demand for the flu vaccine using fear, anxiety and worry -- fear mongering tactics. Below is the link to the CDC presentation entitled -- *Increasing Awareness and Uptake of Influenza Immunization* that details their strategy. Make sure you also watch the 2-minute video below as well -- *LA Times False Flag Operation Exposed Promoting Flu Pandemic*. Here's the CDC's full slide presentation in PDF form [Increasing Awareness and Uptake of Influenza Immunization](#) or on the web <https://bit.ly/2DMOgvO> Starting on slide #5, are three slides called "Recipe" for Fostering Public Interest and High Vaccine Demand. The second bullet point in the eighth slide (page 8) below states:

*"Fostering demand, particularly among people who don't routinely receive an annual flu vaccination requires creating concern, anxiety and worry."*

- *A perception or sense that many people are falling ill:*
- *A perception or sense that many people are experiencing bad illness:*

- *A perception or sense of vulnerability to contracting and experiencing bad illness"*

## Implications of the "Recipe"

- ❖ A large component of consumer demand for flu vaccination is contingent upon things we can't control (e.g., timing, severity, extent, duration of the disease and resulting illness).
- ➔ Fostering demand, particularly among people who don't routinely receive an annual influenza vaccination, requires creating concern, anxiety, and worry. For example:
  - A perception or sense that many people are falling ill;
  - A perception or sense that many people are experiencing bad illness;
  - A perception or sense of vulnerability to contracting and experiencing bad illness.

In other words, no matter what is going on in the US with the flu, each and every year the CDC colludes with the mainstream media to create the *perception* that many people are falling ill to the flu so that they can create high demand for the vaccine. They do this, as the CDC slide states by, "*creating concern, anxiety and worry*" (false fear mongering) so that as many people as possible get the flu vaccine; even though in 2017 the flu vaccine was proven to be only 10% effective!

***"It is easier to fool people than to convince people that they have been fooled".***  
**-Unknown**

30. Since 2012, it's been known that the flu vaccine for pregnant women is seriously problematic and that the CDC's own vaccine injury data collection (VAERS) revealed a 4,250% increase in fetal deaths after the flu shot!

*"The CDC's own vaccine injury data collection revealed a 4,250% increase in fetal deaths after the flu shot. The VAERS statistics were confirmed later by Dr. Gary Goldman and published in the Human and Environmental Toxicology Journal showing that the H1N1 swine flu vaccine did in fact cause a 4,250% rise in spontaneous abortions."*

*The CDC has refused to provide further information under a Freedom of Information Act filing until after a three year period, a direct violation of FOIA law. When confronted and queried about the rise in fetal deaths among vaccinated pregnant mothers, the CDC's Dr. Shimabkuru confirmed the agency knew of this increase."*

1. Source: A New Flu Season of Pain, Profit and Politics  
<https://bit.ly/2HORljK> or <https://bit.ly/2WvLq5V>

*"Dr. Gary Goldman's study on the 4,250% spike in fetal death reports during the 2009/10 H1N1 "pandemic" originally rejected by the American Journal of Obstetrics & Gynecology (AJOG) is charged by the National Coalition of Organized Women (NCOW) as complicit in a massive cover-up and manipulation of data associated with the 2009/10 flu season fetal deaths..."*

*Despite an apparent trail of documented collusion and misconduct amongst the CDC, American Journal of Obstetrics & Gynecology (AJOG), Elsevier (a huge medical publishing company who publishes more than 430,000 articles annually in 2,500 journals), and 9 non-profits including the March of Dimes, this alarmingly poor outcome of the 2009/10 H1N1 vaccine experiment on the fetuses of pregnant women was successfully covered up by the CDC until Goldman exposed the statistics, documenting the harm in his recent publication."*

2. Must read >>> CDC Misleads Nation's Ob/Gyns, Colludes with American Journal of Obstetrics & Gynecology and Nine Non-Profits, Covers-up the Most Massive Fetal Death Reports Associated with the Influenza Vaccine

in the History of Vaccine Adverse Events Reporting System  
<http://nancymullanmd.com/trust-the-cdc-think-again/>

*"The rejection of Goldman's manuscript in January 2012 leads NCOW to believe that the publishing of the CDC's "Moro" studies, replete with false and biased science, was purposeful. And that AJOG, if not stopped by its publisher or through public exposure, audaciously intends to continue to mislead its readers and perpetuate a cover up."*

*AJOG's publication of the CDC's agenda-driven pseudoscience coupled with its rejection of Goldman's critical manuscript serves to: confirm its complicity with the CDC, discredit the journal and its parent publisher, and tarnish AJOG's status as a "peer reviewed" journal. Without demanding integrity from its journals, opportunities to help mankind in science are lost and the value of Elsevier's assets are diminished."*

3. Source: Letter from Director of National Coalition for Women to Elsevier Publisher [http://vaccineliberationarmy.com/?attachment\\_id=9463](http://vaccineliberationarmy.com/?attachment_id=9463)
31. Did you read all of #30 above? You must! After the influenza vaccine VAERS - Vaccine Adverse Events Reporting System data in 2012 showed a whopping 4,250% increase in fetal deaths.... and after it was covered-up by the CDC, the CDC published its own study on pregnant women who received the flu shot in September 2017.  
Here's what the 2017 CDC study revealed. *"The flu vaccine increased a woman's chance of miscarriage 7.7 times when given in the first trimester if the year previously she had been given a flu vaccine."*  
The CDC and the medical establishment (American Academy of Pediatrics and others) say they are waiting for more data, ignoring this study and the VAERS reports collected in 2012. In CDC vaccineland, this is called post-marketing data which uses the public, in this case pregnant women and their unborn babies, as experimental guinea pigs in order to collect more data on the vaccine and its effects.
  4. Devastating Flu Vaccine-Miscarriage Study Sparks Ridiculous Spin <https://bit.ly/2RtydLg>
  5. CDC Study Shows Up to 7.7 Times the Risk of Miscarriage After Influenza Vaccine <https://bit.ly/2rJd40W>
  6. Flu Vaccination During Early Pregnancy Linked to Nearly Eightfold Risk of Miscarriage <https://bit.ly/2PGYOPP>

Before I show you how the media handled the alarming findings in this new CDC study (2017), I want you to ask you...of the 24 different flu vaccines the FDA has licensed, guess how many have been tested for safety and effectiveness on pregnant women and her unborn baby?

How about NONE!! Are Flu Shots Safe for Your Unborn Baby?

<https://youtu.be/C9OskP-G2Mg>

Below is the video of NBC's Dr. Natalie Azar, MD on the *Today Show* telling pregnant women to ignore the new CDC study (2017) and to listen to your Ob/Gyn and get a flu vaccine while pregnant! As you watch her, ask yourself, how on Earth can this medical doctor tell women to ignore this alarming study?

Ask yourself why didn't TV talking head Dr. Natalie Azar mention the 4,250% increase in fetal deaths from the 2012 VAERS reports data in her television reporting? Ask yourself, why didn't she mention that none of the 24 different flu vaccines that are being injected into millions of pregnant women have ever been tested for safety or effectiveness? I sit because ALL of these media trained doctors are shills for the networks they work for who must protect, lie, kowtow to and spin stories for their numero uno advertiser, pharma?!

7. Video: NBC's Dr. Natalie Azar on the new CDC flu shot study for pregnant women <https://youtu.be/gBoXp0lZ4oM>
8. For OB/GYN doctors, the CDC has created marketing materials -- a [poster](#) to hang in their office as an advertisement for the flu vaccine. Here is their [marketing toolkit](#) to persuade pregnant women into getting the flu vaccine. Here is another called *Making a strong vaccine referral to pregnant women - CDC Strategies for healthcare professionals* <https://bit.ly/2Ci3k42>

Here is an article about the whooping cough (pertussis) vaccine for pregnant women for you to read -- Pregnancy-Friendly Protection? The Truth About Whooping Cough Vaccine by Dr. Kelly Brogan, MD <https://bit.ly/2QRphQj>

32. Vaccine shedding is the dirty little secret that the CDC, pharma and other vaccine proponents don't want you to know about. After an adult or child is vaccinated, for up to four weeks and sometimes even longer, the vaccinated person can spread to others the very disease they are trying to prevent and protect the "herd" from. There was a man who had shed polio from the live polio vaccine for 30 years!

33. According to the CDC schedule, a newborn baby gets the hepatitis B vaccine on or around the first day of life and around 1- 2 months. Yet, hepatitis B can only be only transmitted through sexual contact and intravenous drug use. In addition, newly expecting mothers are prescreened in their first trimester for the hepatitis B virus, which makes this vaccine completely unnecessary. As I mentioned earlier, the hepatitis B vaccine was studied for only five days before it was released to be injected in millions of newborns and adults.

Dr. Jane Orient, M.D., internist and Executive Director of the Association of American Physicians & Surgeons (AAPS) states, *"For most children, the risk of a serious vaccine reaction may be 100 times greater than the risk of hepatitis B. Overall, the incidence of hepatitis B in the U.S. is currently about 4 per 100,000. The risk for most young children is far less; hepatitis B is heavily concentrated in groups at high risk due to occupation, sexual promiscuity, or drug abuse. VAERS (Vaccine Adverse Reporting System) contains 25,000 reports related to hepatitis B vaccine, about one-third of which were serious enough to lead to an emergency room visit, hospitalization, or death."*

Dr. Toni Bark, MD states, *"That vaccine [hepatitis B] was created for high risk sex workers and I.V. drug users. They could not get that population to take the vaccine. The committee met and decided, "what we should do is push this vaccine on newborns". It was never created with newborns in mind."*

### **2018 Update -- ACIP Approves New Hepatitis B Vaccine Despite Sevenfold Increased Risk of Heart Attack**

The US Advisory Committee on Immunization Practices (ACIP) approves vaccines for public use in the United States. ACIP met in October of 2018 to vote on a new hepatitis B vaccine, Heplisav-B by Dynavax.

This hepatitis vaccine has in it a new adjuvant. The new adjuvant is a synthetic DNA - cytidine-phosphate-guanosine oligodeoxynucleotide (CpG-ODN) motifs (1018 adjuvant). The supposed main advantage of this new vaccine is that it is two doses 30 days apart as opposed to the old vaccine, three dosages within 6

months. Dynavax's new hepatitis B vaccine will be given to adults 18 – 70 years of age.

To quote Dr. Milton Packer, MD, an expert in cardiovascular science, *"during the trial, 14 people in the new hepatitis B Dynavax group had heart attacks compared to just one in the conventional vaccine group. Since the Dynavax group was twice as large, the heart attack risk was seven times higher with the new vaccine.*

*To know if the 7-1 heart attack imbalance represented a real risk, we'd need comparative data in 50,000 people. The fastest way of obtaining that evidence would be through a post-marketing trial. But a post-marketing trial would be possible only if the vaccine was approved for public use. [using the public as test trial subjects.]*

*The FDA asked the committee if there was reasonable evidence that the vaccine was safe. Twelve committee members voted in favor of the safety of the new vaccine, one voted against it, and three abstained. I was one of those who abstained."* [Dr. Milton Packer, M.D. was the only expert in cardiovascular science.] Source: <https://bit.ly/2Ew5pus>

Additionally, the new hepatitis B vaccine trials were not true safety studies comparing it to an inert placebo. The three trials all compared their vaccine with the current hepatitis B vaccine from GSK called Engerix-B®.

1. Three minute video (edited for brevity) shows ACIP voting on the new hepatitis B vaccine <https://youtu.be/5CKK1JFcx2Q>
  2. Full Story -- CDC Advisory Committee ACIP Unanimously Approves New Hep-B Vaccine Even After Admitting "There Has Been NO Safety Testing!" <https://bit.ly/2Gcmmls>
  3. ACIP meetings are held three times a year in February, June and October. Here is the [ACIP schedule](#). Anyone can attend ACIP meetings. Here is a Facebook page about the ACIP meetings <https://bit.ly/2Erqh6f>
34. Have you been lead to believe that vaccination is the same as immunization? Vaccination does not equal immunization. Vaccines just increase antibodies. Just because someone gets a vaccine does not mean that they are immune from getting that illness. If anyone told you that it is incorrect. <http://kellycsjohnson.com/immunization-not-equal-vaccination/>. Antibody (humoral) immunity stops the body from producing cell-mediated immunity. The antibody arm of immunity and the cell-mediated arm of immunity usually work together in synergy. But after a vaccine the antibody arm gets ramped up and those antibodies actually paralyze the immune system from creating memory immunity and cell-mediated immunity. Antibody creation is not immunization and in fact, when attempted via vaccines, actually weakens and can even destroy the innate intelligence of the body's immune system.
1. Vaccine Makers Spend Millions Every Year Pushing the Public to Believe That Vaccines Create Immunity and Save Lives... But Do They? <https://www.learntherisk.org/IMMUNITY/>  
*"Science has long known that antibodies alone do NOT create real immunity. Some people with high levels of antibodies can be exposed to an illness and still get sick, while others without antibodies can be exposed and not get*

*sick. Dr. Merrill Chase, nicknamed the Grandfather of Immunology for his pioneering work, did clear-cut research on this issue back in the 1950s. His results are clear: antibody levels don't determine immunity."*

35. There is a difference between natural immunity when a child gets the measles and artificial immunity from a vaccine. Natural immunity lasts for a lifetime, strengthens the immune system and can be passed on from mother to fetus. Her baby then has a stronger immune system.

On the flip side, artificial immunity from a vaccine lasts maybe 5, 10 or possibly 20 years, does not provide lifetime protection, does not strengthen the immune system (it weakens it), it contains known neurotoxins and carcinogens, and has tremendous risks and side effects -- neurodevelopmental disorders, seizures, autism, autoimmune disease, and death to name a few, and this "immunity" is not passed on from mother to fetus.

1. Great video for parents >>> Natural Immunity Fundamentals -- Lecture 1 -- What Doesn't Kill You Makes You Stronger: Risks and Benefits of Viral Infections -- How to Build A Strong Immune System and Understand the Difference Between Natural Immunity and Vaccine Immunity by Tetyana Obukhanych, PhD <https://youtu.be/EXvqF9-dill>

36. Let's talk about the measles. (Make sure you check out this guide [MEASLES: Facts to Counter the Fear](#))

According to the CDC's own data, in 1963 BEFORE the measles vaccine was introduced in the United States, mortality from the measles was extremely minimal and had dropped 98% to just 1 in 500,000 people. READ THIS LETTER <https://physiciansforinformedconsent.org/wp-content/uploads/2019/02/PIC-Re-OI-Subcommittee-Memorandum-Final.pdf>

Since 2003, guess how many people in the US have died from the measles?

Answer: 2. (one of these two deaths was a woman on immunocompromising drugs, so she didn't die just from measles.)

Since 2003, how many people have died from the MMR vaccine?

Answer: 127 and counting.

Overall, at least 459 deaths in the US (as of Feb 2019) have been reported to VAERS, the US vaccine adverse events reporting system, from just one vaccine, the MMR, and these deaths are mostly children under 6 years of age. These are just the reported deaths. The actual number is much higher as HHS states that only 1% of vaccine injury and deaths are reported to VAERS. Doing simple math, the number of MMR vaccine deaths in the US would be 45,900 people, mostly children!! This does not include the millions that have been injured or disabled with asthma, autism, learning disabilities, adhd, cancer, autoimmune disease, eczema, psoriasis, etc.

"As of November 30, 2018, there have been more than 93,000 reports of measles vaccine reactions, hospitalizations, injuries and deaths following measles vaccinations made to the federal Vaccine Adverse Events Reporting System (VAERS), including 459 related deaths, 6,936 hospitalizations, and 1,748 related disabilities. However, the numbers of vaccine-related injuries and deaths reported to VAERS may not reflect the true number of serious health problems that occur develop after MMR vaccination."

Here is a stat you may want to remember. The risk of dying from the measles in the United States is 1 in 500,000. The risk of getting autism in the US is 1 in 45. In boys, it's 1 in 36!! Measles is a benign childhood virus that lasts for about a week

and gives you lifelong immunity. Autism lasts for a lifetime. Tell me which one is the real epidemic and which one do you hear about in the media?!

Before continuing further, I suggest you read this page from the National Vaccine Information Center, Measles Vaccine: Injury & Death <https://bit.ly/2tiMFrX> and check out the links below.

1. Which is the Greater Threat, Measles or Measles Vaccine? -- Dr. Jeffrey Dach <https://bit.ly/2T1Fd2B>
2. February 2019 --Measles
  1. Part 1 -- The Outbreak Panic -- Dr John Bergman <https://youtu.be/DuEYCa7PMqU>
  2. Part 2 -- The Stats <https://youtu.be/L9S8nE-USrM> -- Dr John Bergman

What if I told you that doctors have long viewed measles as a childhood ailment and a benign virus that served to strengthen the immune system? This is why parents in the 1950s and 60s would have measles parties -- when a child in the neighborhood had measles, parents would bring over their child so that their child would also catch measles and have lifelong immunity.

Moreover, studies show that measles in childhood helps protect children later in life from certain cancers and even heart disease. In first world countries with clean running water and good sanitation, it was not a serious virus back then and it certainly is not a serious virus today. The only thing that has changed is the fear mongering narrative in the media about measles -- not the virus and not the science!

This is mainstream media propaganda, aka fake news at its finest from mainstream media's biggest advertiser, pharma -- probably the most corrupt industry in the world. This is a PR stunt to get you to vote for childhood mandatory forced vaccinations. This is why it's important to be acutely aware of the media propaganda about all vaccines -- measles, flu, etc., (see #27 above about the flu.)

[https://youtu.be/8v0r\\_JsJWwc](https://youtu.be/8v0r_JsJWwc)
37. Let's look at Merck's MMR II vaccine approval trials from 1978 which has been injected into probably a BILLION people, mostly children over the last 40+ years. Non-profit group Informed Consent Action Network Uncovers MMR Vaccine Approval Trials from 1978 via Freedom of Information Act Request
  1. Article: MMR Vaccine Licensing Called Into Question Following ICAN's Latest FOIA Exposure of FDA Cover-up <https://yhoo.it/2Y99efF> or <https://prn.to/2lZWDrE>
  2. Video: Analysis of Merck's Alarming MMR II Approval Trials from 1978  
<https://youtu.be/GmFX-iQA2nA?t=2565>

**Facts about Merck's 1978 MMR II vaccine approval trials**

- The safety review period only tracked 'adverse events' for 42 days after MMR vaccine injection
- More than half or a significant percent of all participants in each of the eight trials developed gastrointestinal symptoms and upper respiratory infections
- All adverse events were generically described as 'other viruses' and not considered in safety profile of licensure
- None of the control groups received a placebo (an inert substance such as a saline injection) and instead received vaccines for either rubella or measles and rubella. In other words, the MMR vaccine was not tested against a true placebo group, but was tested against groups that received a single vaccine or more than one vaccine and each would likely have its own problems)

Here is Merck's MMR II vaccine trial information obtained from the US government -- Merck's Clinical Investigative Studies of Combined Live Measles-Mumps-Rubella (RA 27/3) Virus Vaccine [www.MMRtrials.com](http://www.MMRtrials.com)

MMR VACCINE Is It Safer Than Measles?

<https://physiciansforinformedconsent.org/wp-content/uploads/2018/05/MeaslesVRS.pdf>

38. California Senator, Dr. Richard Pan, is pretty much responsible for passing California [senate bill 277 \(SB277\)](#), a bill that takes away parental rights by excluding personal belief and religious exemptions for vaccination. SB 277 mandates all California children get all CDC recommended vaccinations before they are allowed to attend public school. Most of Senator Dr. Pan's arguments for mandatory forced vaccination is centered around two lies: herd immunity and "dangerous" measles outbreaks. In the United States and other first world countries with clean running water and good sanitation, measles is a benign childhood infection that, along with other childhood infections such as chickenpox and mumps has been shown in studies to be protective later in life for certain cancers and heart disease. As a practicing pediatrician, don't you think Dr. Pan should know this, or does he have another agenda?

California lawmakers have received millions from the pharmaceutical industry leading up to SB 277. Like all good politicians, Senator Pan is on the take and has received at least \$147,268.85 from the pharmaceutical industry and \$360,636.41 from the healthcare sector as of April 2019. He is one of the major proponents for mandatory vaccines. No doubt more pharma money is on its way for Senator Pan.

- Source: Richard Pan's Campaign Finances  
<https://votesmart.org/candidate/campaign-finance/120159/richard-pan#.XKo1NJhKjkQ>

During hearings for SB 277, Senator Pan was asked many times about medical exemptions and several times, Senator Pan stated that medical exemptions will stay in effect from family physicians and that physicians would not be targeted by the medical board for allowing vaccine exemptions. These exemptions are critical and allows children who have a genetic defect, autoimmune disease, have been previously injured from vaccines, etc.

HOWEVER, Senator Pan has gone back on his word and introduced SB 276, a bill that would eliminate medical exemptions from a family's pediatrician thus removing their involvement and putting the ultimate decision onto the California Dept. of Public Health, a government agency. Senator Pan has outright lied to the people of California with the introduction of SB 276 and is interfering with the doctor-patient relationship. What's more, CDC contraindications for medical exemption are different than FDA contraindications.

The CDC Contraindications For Medical Exemptions are the following:

- Anaphylaxis (life threatening allergy)
- Anaphylactic allergy to egg or yeast
- Encephalopathy (coma reduced consciousness)
- Severe immunodeficiency (ex: cancer, organ transplant)
- Intussusception -- a rare intestinal disorder when one portion of the bowel slides into the next, much like the pieces of a telescope.(For the Rotavirus vaccine only.)

Here is a list of vaccine reactions according to FDA package inserts that would likely not be included as medical exemptions should a child already have had one or more of these reactions from a vaccine or vaccines. Thus, any child with any of these previous reactions, would be exempt from receiving a medical exemptions. Many of these reactions are extremely severe and some have permanently disabled the child!

- This video shows Senator Pan promising that medical exemptions would not be taken away during the SB 277 hearings  
<https://youtu.be/CQsUdtv6chl>
- April 11, 2019 -- Rally to Oppose SB 276 Sacramento, CA  
<https://youtu.be/sYcBRoJQz6A>

Senator Pan is clearly a liar! In fact, this is not the first time that Senator Pan has lied. Senator Pan has lied many times in public talks about vaccines to promote his mandatory vaccination agenda.

1. **Senator Pan Lie #1: "There have been no confirmed deaths from the measles vaccine."**

TRUTH: There have been 459 reported deaths in the United States from the MMR vaccine as of October 2018. <https://bit.ly/2FRhZDX>

2. **Senator Pan Lie #2: "The United States takes vaccine safety very seriously."**

TRUTH: As discussed in #5 above, US Health and Human Services (HHS) violated the [National Childhood Vaccine Injury Act \(NCVIA\) of 1986](#) that states that a special task force must be assigned for vaccine safety and reports issued every two years. HHS has not assessed vaccine safety and has issued no reports in over 32 years!! No media outlet has reported this unbelievable information. For more on safety, see Senator Pan Lie #5 below.

3. **Senator Pan Lie #3: "Vaccines are NOT made from aborted fetal cells."**

TRUTH: Many vaccines are made from aborted fetal cells. Vaccine developer Dr. Stanley Plotkin testified under oath (video link below) that one study used 76 aborted fetuses (all over three months old and all healthy and normal), to make vaccines. Organs were cut into pieces and cultured – the pituitary gland, lungs, skin, kidney, spleen, heart, and tongue were used to develop vaccines.

- Video of vaccine maker Dr. Stanley Plotkin discussing aborted fetal tissue in vaccines while under oath <https://youtu.be/NACBhtFMIIA>

4. **Senator Pan Lie #4: "You know what's the most dangerous substance in a vaccine? Water."**

TRUTH: Vaccines contain aluminum, formaldehyde, polysorbate 80, detergent and many other toxic substances. The quadrivalent flu vaccine contains mercury. Mercury has been detected in vaccines that were supposed to be mercury free. Vaccines have been found to be contaminated with the carcinogenic weedkiller glyphosate, radioactive uranium and lead. Vaccines have also been found to be contaminated with human fetal DNA fragments and a retrovirus. This is discussed in #6 above and there is section devoted to ingredients in vaccines below.

5. **Senator Pan Lie #5: "Vaccines are safe and efficacious."**

TRUTH ABOUT VACCINE SAFETY:

- The CDC childhood vaccine schedule has never been tested or studied.
- The CDC made it up. The practice of injecting multiple vaccines in one doctor's visit has also never been tested or studied.
- The US Government, CDC and pharma refuse to do a vaccinated vs. unvaccinated study to assess which population is healthier. No vaccine has gone through a double-blind placebo controlled study using an inert (saline) placebo.
- All vaccine studies are done by the pharmaceutical companies themselves and are tested against another vaccine, vaccines or toxic adjuvant.
- These same pharma companies have been convicted of fraud and fined billions of dollars.
- Pharmaceutical companies are not liable for injury or death that their vaccines cause.
- Vaccines have never been tested for mutagenicity (being known or suspected of causing mutations in our DNA, which can lead to cancer), carcinogenicity (being known or suspected of being able to cause cancer) or impairment of fertility.
- The following list of conditions/diseases and causes of death are listed on vaccine inserts as complications or adverse events from vaccines: *Autoimmune disease, food allergies, eczema, juvenile diabetes, asthma, ADD/ADHD, autism, speech delays, narcolepsy, seizure disorder, neurodevelopmental disorder, SIDS - sudden infant death syndrome*. The US government vaccine injury program has paid out over \$4 billion (and counting) to vaccine injured victims. Do you agree with Richard Pan and think vaccines are safe and have been proven to be safe?
- Vaccine "Safety", Big Pharma, and Scientific Fraud at the CDC  
<https://youtu.be/RfkCdG2830>
- Introduction to Vaccine Safety Science & Policy in the United States  
<http://icandecide.org/wp-content/uploads/whitepapers/VaccineSafety-Version-1.0-October-2-2017.pdf>

TRUTH ABOUT VACCINE EFFICACY: Vaccines can prevent certain illnesses for a period of time, but will not infer lifelong immunity. This is why booster shots are often needed. Each vaccine has its own failure rate. The Cochrane Review evaluated the effectiveness of the flu vaccine and found that it failed 99% of the time. The DTaP vaccine (diphtheria, tetanus and pertussis) was shown to kill 10 times more babies than pertussis (whooping cough) killed. Merck is being sued for releasing fraudulent data overstating the effectiveness of the mumps portion of their MMR vaccine. The HPV vaccine has shown to actually cause cervical cancer as well as collapsed uterus. There is speculation that it is causing infertility. "Are Vaccines Effective?" – Are We Asking the Right Question?

<https://bit.ly/2OSfUvn>

***"The more it [vaccination] is supported by public authorities, the more will its dangers and disadvantages be concealed or denied."***

**-M. Beddow Bayly**

Below are videos and articles about mandatory vaccination

1. Pediatrician Dr. Bob Sears has been outspoken as to why mandatory vaccination laws are a complete sham <https://youtu.be/61MjmbELI84?t=3323>
2. Mandatory vaccination laws violate the Nuremberg Code <https://bit.ly/2UR77MR>
3. April 15, 2015 Senate Education Committee hearing to voice their support or opposition to California SB277 <https://youtu.be/SjZPoPaOk0s>

If you decide you want to take the risk of possible vaccine injury by vaccinating, before you do, I would have your doctor (i), or doctor and vaccine manufacturer (ii), sign one or both of these two forms:

1. Physician's Warranty of Vaccine Safety <https://bit.ly/2Ex2YIY>
2. Agreement Between Vaccine Providers and Vaccinated Party <https://bit.ly/2Si1QeS>

Pharma has over 200 new vaccines in the pipeline and they want us all vaccinated as much as possible. The US government will be coming after all adults to make sure you're caught up on ALL your vaccines. They're already partially doing this in hospitals, corporations, law enforcement government jobs, etc. Don't be fooled. This has nothing to do with public health whatsoever! Herd Immunity via vaccination is a hoax and is another ploy for you to be complacent when mandatory forced vaccinations come to your state or county. More on herd immunity in the section below: *The Herd Immunity Hoax: Why Herd Immunity Is Total BS and is the Secret Sham Behind Forced Vaccine Mandates*

Imagine not being able to go to your gym, or being able to get on an airplane or attend an event like a concert or your daughter's play or go to temple or church because you or your child isn't caught up on ALL your vaccines. This is what's coming to the United States of America (it's called 'Healthy People 2020') unless we take action by spreading this information, going to rallies, contacting our Senators, Governor and State Legislators -- who are all pretty much indoctrinated and completely uneducated about vaccines.

Many politicians are also on the take from pharma, while many also feel threatened by their peers or powerful pharma lobbyists. Watch former Congressman Dr. Dave Weldon, MD speak about this pharma lobbyist coercion in this one minute clip <https://bit.ly/2TTv6tM>. The full story is in this 11 minute video <https://bit.ly/2GYhEmA>

When medical journalist and producer of the movie *Vaxxed*, Del Bigtree wanted to interview Senator Pan to discuss the CDC whistleblower/MMR fraud story and its impact on SB 277, California's new mandatory vaccine law removing personal belief and religious exemptions to vaccination, Pan's administrative staff lied stating that Senator Pan was not there. However, when Pan saw Del Bigtree and others waiting outside his office, he ran, and like a coward and someone who has something to hide, hurried down two hallways and two flights of stairs to avoid being interviewed. Del's cameraman, Joshua Coleman caught it all on video <https://youtu.be/KzvHgikbQUI>

39. *"From 1989 to 1991, Kaiser Permanente, along with the L.A. County Dept. of Health and the CDC, injected over 700 "mostly minority" babies with unlicensed experimental vaccines with fraudulent consent from their parents. One of the vaccines used, Edmonston-Zagreb high-titer, had already obtained a notorious reputation overseas for killing almost one out of every 13 babies in closely controlled studies in the Third World. In particular, use of the vaccine had been closely associated with an increased death rate among infants in Senegal, Guinea Bissau and Haiti before their second birthday."*

<https://bit.ly/2v3luBZ>
2. How Babies Were Used As Guinea Pigs in LA County Vaccine Experiment  
<https://bit.ly/2BHvBQT> and <https://bit.ly/2S91Gq5>

40. On October 11, 2018, Dr. Shannon Kroner and Britney Valas organized a public debate about vaccines in Atlanta, Georgia called *One Conversation: Public Health and Immunity*. Experts on vaccines were invited on all sides of the debate. Seven pro-vaccine doctors who strongly adhere to the CDC vaccine schedule all accepted and agreed to attend. Seven experts on the other side of the debate vocal about vaccine risks also accepted. Dr Bob Sears, a pediatrician who is in the middle, also accepted. Everything was all set and all the panel experts were excited to participate. However, when the panelists on all sides were announced on the [One Conversation website](#) the emails started pouring in from doctors on the pro-vaccine side.

- **Dr. Jubilee Brown, MD, FACOG -- CANCELLED**

- Dr. Mosley, PhD – **CANCELLED**
- Dr. Wilbur Chen, MD, MS, FACP, FIDSA – **CANCELLED**
- Dr. Harold Stringer, Jr., MD – **CANCELLED**
- Dr. Michael Kinch, PhD – **CANCELLED**
- Dr. Catherine Roe, PhD – **CANCELLED**
- Dr. David Hawkes, PhD – **CANCELLED**
- Dr. Stanley Plotkin, M.D. – **DECLINED TO ATTEND** Known as the Godfather of vaccines. Plotkin wrote the textbook on vaccines. He is a vaccine developer and vaccine advisor to clinical practices, academia, vaccine policy, and the vaccine industry.
- Dr. Peter J. Hotez, M.D., Ph.D. – **DECLINED TO ATTEND** Depts. of Pediatrics and Molecular Virology & Microbiology Baylor College of Medicine. Hotez is a vaccine developer, and president and director of the Sabin Vaccine Institute Product Development Partnership (PDP). He has partnered with Merck (the largest vaccine manufacturer) through its MilliPoreSigma. He is a consultant to the Bill and Melinda Gates Foundation who funded Hotez's labs with \$52 million. Hotez has been described as an "advocate" and "spokesperson" for the vaccine industry. He is also the author of the 2019 book, *Vaccines Did Not Cause Rachel's Autism* about his daughter's autism. Hotez states why he wrote his book, "I felt I was losing the battle to the anti-vaccine lobby. I felt it was a public service or duty to do everything I can to slow down the anti-vaccine movement."

*Every pro-vaccine panelist who originally accepted, canceled!!*

The organizers state on their website, "Due to heavy outside influences and coercion from respected national medical organizations (whose main concern is maintaining only one message of vaccine importance and safety to ensure public compliance), several panelists have since chosen to withdrawal from to the event." However, the One Conversation event still went forward with the eight panelists vocal about vaccine risks including pediatrician, Dr Bob Sears. All experts answered questions from the moderator, Shelley Wynter, a well known Atlanta radio talk show host, as well as the audience in attendance.

**The next section will blow your mind and hopefully open your mind -- lies, deception, and fraud abound!! Shills, Trolls, Front Groups, PR Smear Tactics & More: How Big Pharma, CDC, FDA, the Food Industry & Mainstream Media Deceive and Manipulate You**

## **Shills, Trolls, Front Groups & More: How Big Pharma, Big Food, CDC, FDA, and the**

# Mainstream Media Deceive and Manipulate You

The purpose of this section is to show you how the largest pharmaceutical, chemical and food industry corporations in the world are wielding their enormous power by influencing policy and public opinion and by controlling government officials (both Democrats and Republicans), government agencies (FDA, CDC, HHS, WHO, EPA, etc.), your doctor and the mainstream media. You will see that covert, unconscionable tactics are being used to deceive and manipulate you that you might not ever believe could be true, except sadly they are true! Don't take my word for it. See for yourself below.

**Subsections below:**

1. **Front Groups (with list of known vaccine front groups)**
2. **Shills and Trolls (with list of known pharma, vaccine shills)**
3. **Pharma-Government-Media Manipulation and Collusion**
4. **PR Smear Tactics**
5. **Fraud - Misconduct - Manipulation**

*"If we've been bamboozled long enough, we tend to reject any evidence of the bamboozle. We're no longer interested in finding out the truth. The bamboozle has captured us. It's simply too painful to acknowledge, even to ourselves, that we've been taken. Once you give a charlatan power over you, you almost never get it back."*

**-Carl Sagan**

## 1. FRONT GROUPS

What is a front group? "A front group is an organization that purports to represent one agenda while in reality it serves some other party or interest whose sponsorship is hidden or rarely mentioned. For example, the Center for Consumer Freedom (CCF) claims that its mission is to defend the rights of consumers to choose to eat, drink and smoke as they please. In reality, CCF is a front group for the tobacco, restaurant and alcoholic beverage industries, which provide all or most of its funding." <https://bit.ly/2p2iS7q> Patient advocacy groups such as Every Child By Two and the American Academy of Pediatrics are just two examples of front groups for vaccinations and big pharma. In fact, one could say that the CDC, a government public health organization that is supposed to protect the people is also a front group for pharma. See #4 below.

1. Great video >>> How Front Groups Are The Hidden Persuaders <https://www.youtube.com/watch?v=V8ke31HfhRU>

## 2. SHILLS AND TROLLS

### SHILLS

What is a shill? A shill is a person, company or website engaged in covert advertising or interests. Shills endorse a product or take a particular stance on a topic and attempt to spread a buzz via social media, television, newspapers, websites, magazines, journals, etc. Shills do this with the pretense of sincerity, when in fact he/she is being paid or rewarded for their services to push their agenda. Shill organizations or front groups

may use astroturfing – an attempt to create the impression of grassroots support for a policy, individual, or product -- to promote a product or message.

Pharmaceutical and medical device companies often hire doctors as influencers or what is called key opinion leaders (KOL) to persuade other doctors to prescribe their products. KOL's are shills who are trusted experts (pretending that they are unbiased and/or not revealing they are paid) and can have significant impact on behavior. Celebrities such as comedians and television talk show hosts are often used in this capacity since they are easily recognizable, well-liked and many are even revered. Media trained doctors like CNN's Sanjay Gupta, who have also become celebrities, are perfect for this role as well.

Television networks use their celebrity hosts as shills to covertly promote vaccines -- *Live with Kelly and Ryan* (ABC), *The Ellen Show* (CBS), Anderson Cooper (CNN), John Oliver (HBO), Jimmy Kimmel (ABC), etc. In 2019, *The Golden Globe Awards* (NBC) did a skit to give the audience a flu vaccine. Both John Oliver and Jimmy Kimmel devoted entire monologues about vaccines, insulting and mocking those that choose not to vaccinate. ALL OF THESE are stunts and tactics, cleverly designed to influence, sway public opinion and behavior.

Then there are the shill websites that Google favors in search results and Wikipedia uses as "credible" sources. Websites such as [respectfulinsolence.com](http://respectfulinsolence.com), [sciencebasedmedicine.com](http://sciencebasedmedicine.com), [skepticalaptor.com](http://skepticalaptor.com), [vaxopedia.org](http://vaxopedia.org), etc. all have one thing in common -- they aren't interested in the truth, and instead bash, mock and discredit natural treatments or alternative forms of healthcare and those that may favor them -- anything that isn't pharmaceutical-based or fits in with the agenda of the mainstream medical establishment of the CDC, FDA, American Medical Association.

These shill websites often use language such as quack, quackery, pseudoscience, crank, kook, loon or antivaxer to discredit, mock and belittle chiropractors, naturopaths, homeopaths, acupuncturists and integrative medical doctors who use nutrition, herbs and other natural remedies as part of their practice. Almost all the time, they lie, censor and spin stories to promote their agenda. They even use each other's articles as "credible" references to further support their point of view.

To the uninformed or uninitiated, the information on these websites can be compelling and sometimes they do make good points. However, you must know that ALL of these websites exist to sway you away from non-GMO/organic food and natural treatments for your health and push pharmaceuticals. Journalist Sharyl Attkisson in her [TEDx talk](https://www.ted.com/talks/sharyl_attkisson_why_i_dont_take_vaccines) warns of agendas and misinformation from shills who are astroturfing and uses Wikipedia.com as her main example. She says, "to recognize astroturfing messages look for inflammatory language such as crank, quack, nutty, lies, paranoid, pseudo and conspiracy.... Instead of questioning authority, astroturfers [or shills in this case] question those who question authority."

8. Our medical schools must not become shills for big pharma <https://tgam.ca/2UG3Aju>

## LIST OF KNOWN PHARMA, VACCINE SHILLS

1. Respectfulinsolence.com is owned by Dr. David Gorski, also known as Orac. To his readers Gorski states... *"Use emotional warfare on anti-vax blogs. Tell emotional stories full of tears and sobbing and unbearable grief and terror, about people in your own family or people you read about, who were sick with or died of terrible diseases. Don't hold back details about bodily fluids and suchlike: the more gross the better. This stuff has a way of infiltrating the minds of readers and subtly influencing their decisions, in a manner similar to advertising."* Source: <https://bit.ly/2Q7VJbX>. The basis of his website as he states is, *"refuting pseudoscientific claims made by quacks, cranks, and anti-vaxers."*
  1. David Gorski's Financial Pharma Ties: What He Didn't Tell You <https://bit.ly/1C2Gq91>
  2. About David Gorski <http://www.truthwiki.org/orac-david-h-gorski/>
  3. Pro-vaccine Shill Dr. David Gorski Publishes Deceitful Entry in Wikipedia About Vaxxed Film Documentary <https://bit.ly/2VT23lr>
2. Dr. Peter J. Hotez, MD, PhD is Director of the Texas Children's Hospital Center for Vaccine Development. He is a vaccine developer, and president and director of the Sabin Vaccine Institute Product Development Partnership (PDP). Hotez partnered with Merck (the largest vaccine manufacturer) through its MilliPoreSigma. He is a consultant to the Bill and Melinda Gates Foundation who funded Hotez's labs with \$52 million. Hotez has been described as an "advocate" and "spokesperson" for the vaccine industry. He is also the author of the 2019 book, *Vaccines Did Not Cause Rachel's Autism* about his daughter's autism. Hotez states why he wrote his book, *"I felt I was losing the battle to the anti-vaccine lobby. I felt it was a public service or duty to do everything I can to slow down the anti-vaccine movement."*
  1. Dr. Peter Hotez: "Snuff Out" Anti-Vaccine Movement <https://bit.ly/2DS750B>

  3. Dr. Peter Hotez Interview by Joe Rogan Analyzed and Challenged <https://youtu.be/3GAmHscgtEs>
3. Dr. Paul Offit is infamous for publicly stating, *"babies can tolerate as many as 10,000 vaccines at once."* He has also falsely stated, *"Parents can be reassured that the trace quantities of aluminum in vaccines can't possibly do harm."* And as stated by Dr Suzanne Humphries, *"Paul Offit makes outrageously, unscientific claims in an attempt to calm down parents who are wary of the aluminum in infant"*

vaccines. He has taken the safety message to a ludicrous level of ignorance claiming that aluminum plays an important role in the development of a healthy fetus." Offit is also a defender of the fraudulent autism research by convicted felon Danish scientist Dr. Poul Thorsen who is supposedly on the run after stealing money from the CDC.

Offit is a well-known vaccine advocate and doctor at the Children's Hospital of Philadelphia (CHOP), where he is director of the Vaccine Information Center. Offit is a paid vaccine spokesperson and is co-inventor of Merck's rotavirus vaccine, (estimated profits for Offit were around \$29 million.)

He has been able to get placed in influential positions to promote his rotavirus vaccine and vaccines in general. Offit was a former member of ACIP, the CDC Advisory Committee on Immunization Practices, who votes on what vaccines are approved to be on the CDC vaccine schedule. He's also a board member of *Every Child By Two (Vaccinate Your Family)*, whose mission is to get every child vaccinated according to the CDC schedule -- over 30 vaccines by 18 months! He's also co-founder with Alison Singer of Autism Science Foundation. Offit vigorously defends vaccines in the media, often with half-truths and outright lies.

Here's are four super short videos and an article about Dr. Paul Offit

12. Dorit Rubinstein Reiss, Attorney – a vocal proponent of vaccines and investor of GlaxoSmithKline stock
  1. "Not Paid To Post?" Dorit Rubinstein Reiss, UC Hastings College of Law and Kaiser Permanente <https://bit.ly/2ulf1Mz>
13. Amy Pisani - works with Paul Offit at Every Child by Two and Vaccinate Your Family and is also involved with Families Fighting Flu
14. Snopes.com
  1. Snopes Outed as Unfit to Discern Fake News from Truth <https://bit.ly/2Oh6Dw2>
  2. The Daily Mail Snopes Story And Fact Checking The Fact Checkers <https://bit.ly/2s3Cmau>
  3. Snopes Entry on Truthwiki <http://www.truthwiki.org/snopes-snopes-com/>
15. Every single media doctor is a pharmaceutical shill and puppet for the network that she/he works for otherwise they would not be allowed to work for the network. This includes Sanjay Gupta (CNN), Natalie Azar, (NBC), Travis Stork, (CBS), Jon Lapook (CBS), etc. In non-election years, about 70% of mainstream media advertising revenue comes from pharmaceutical advertising to the tune of about \$6.4 billion annually in 2018. (In election years it's around 50%.) Therefore, each media doctor must push the agenda of their biggest advertiser, pharma while simultaneously either not disclosing or downplaying the tremendous corruption and harm PHARMA is famous for.
  1. The Young Turks Reports: How US Drug Companies Completely Owns The Mainstream Media <https://youtu.be/giVY-Qnqd5Q>
  2. How Big Pharma Owns Corporate Media, And Is Killing People <https://youtu.be/q3lviBkaEUc>
16. Google.com – Google used to be known for search relevancy. But since changing its algorithm, it now gives favorable search results to pro-vaccine, pro-pharma websites like many of the shill websites mentioned above (almost always in the first five positions on page one of search results.) By favoring pro-pharma websites on various search terms, Google covertly participates in swaying public opinion towards the promotion of vaccines and pharmaceuticals and in doing so, thwarts the unsuspecting public away from information on more relevant websites that may be about natural treatments or expose problems, fraud and corruption with vaccines, pharmaceuticals, government agencies, etc., by giving these websites lower page ranking.
17. Wikipedia.com – Wikipedia is *not* the free encyclopedia that anyone can edit. It is a pro-establishment, partial to the left, shill website to promote various political agendas, and supports big food, big pharma, big agricultural, GMO foods, chemical, oil and gas and other large industries.
  3. Must-Watch Video >>> Wikipedia, Astroturf and Manipulation of Media Messages <https://youtu.be/-bYAO-ZZtEU>

## TROLLS

What is a troll? A troll is a disruptor. It is someone who deliberately posts provocative messages, usually on social media or message boards, with the intention of attacking,

or causing maximum disruption, argument and/or to change opinion or cast doubt on a particular subject. Monsanto as well as pharmaceutical companies have hired armies of internet trolls to sway public opinion on social media.

1. Identifying online trolls calms emotions and allows for a higher consciousness <https://bit.ly/2HyAdxQ>

In this video at the 14:39 mark, Bill Faloon Founder of The Life Extension Foundation and Dr. Brian Clement of Hippocrates Health Institute, talk about hired trolls, pharmaceutical-congressional collusion, control and payouts, manipulation, lies and false smear tactics, government raids, hidden GMOs in our food, and more. <https://youtu.be/Tc71p6WmH94?t=879>
11. **Must-Watch Video >>> How Big Pharma Owns Corporate Media, And Is Killing People** <https://youtu.be/q3lviBkaEUc> *"With the exception of CBS, every major media outlet in the United States shares at least one board member with at least one pharmaceutical company. To put that into perspective: These board members wake up, go to a meeting at Merck or Pfizer, then have their driver take them over to a meeting with NBC, (or ABC, FOX, CNN, etc.) to decide what kind of programming that network is going to air. Drug companies spend about \$5 billion a year on advertising with these corporate media outlets, so when Pfizer or Merck or Eli Lilly, or any of the drug companies, kill or cripple Americans with defective drugs, do you really think these board members are going to allow their story to be told on the air? It can take anywhere from three days to a full week before the media reports on a drug or a medical device recall, if they report at all. It's as if they don't understand things like the link between crony capitalism and the revolving door between the FDA and the drug industry, but the media is only one side of the story here. Big pharma knows that if it wants to continue manipulating the public it has to start with our elected officials in Washington DC. According to OpenSecrets, big pharma spent more than \$58 million on politicians just in 2016, the most amount they've spend on a direct contribution in the last quarter century. When it comes to lobbying, few industry spend more than big pharma did last year. They spent a staggering \$244 million dollars to influence our elected leaders in Washington DC. It looks like things are about to get much worse, you see, big pharma understands that the ridiculous ... their price gouging is starting to draw negative attention from the American public, and no matter how much they spend advertising or buying our politicians, they can't keep the public anger down forever.*

**4. PR SMEAR TACTICS**

*"The further a society drifts from the truth, the more it will hate those who speak it."  
-George Orwell*

A smear tactic called the 'Wrap-up Smear', [explained here by politician Nancy Pelosi](#) is when a particular industry creates a false story and then colludes with the mass media to publicize it through various media channels (television, print, radio, internet, etc.) so that the fabricated story spreads swiftly reaching millions of people. This unscrupulous scheme was used against Jenny McCarthy, Dr. Andrew Wakefield and Dr. Judy Mikovits to discredit them, and destroy their lives and careers. Smear tactics are also being used to discredit those who are exposing the risks of vaccines. The media has called them "anti-vaxxers", a smear term used to disparage and discredit them.

Talk show host and former Playboy model, Jenny McCarthy's son was diagnosed with autism after a vaccine. She went on various shows as an autism advocate speaking about the possible dangers of vaccines. She was also able to heal her son from autism

and wanted to give other parents hope. A PR smear campaign was launched against her fueled by the American Academy of Pediatrics and she was ridiculed in the media. She lost several acting and talk show host roles.

In 2011, scientist Dr. Judy Mikovits discovered that about 30% of our vaccines were contaminated with gamma retroviruses. She was threatened to keep quiet or lie about her findings. She refused and was arrested without cause. Judy spent five days in jail and was silenced for four years while the US government and media covered up her discovery and spread lies, trashing her name, reputation and career. Meanwhile, unbeknownst to the public, the tainted vaccines went into the marketplace and were injected into millions of people.

In 1998, Dr. Andrew Wakefield, a leading British gastroenterologist was one of 13 doctors conducting research on the MMR vaccine and possible gastrointestinal issues, not autism, as the mainstream media continues to falsely report. (Wakefield was a prominent gastrointestinal physician in the UK who has authored (or co-authored) more than 140 published peer reviewed scientific papers. He knew nothing about autism and none of his 140+ papers were ever questioned.) Journalist Brian Deer was hired to create a hit piece against Wakefield and along with media mogul Rupert Murdoch, owner of the *London Times*, orchestrated a smear campaign to publicly discredit and shame Wakefield and his work. They also colluded with the British Medical Journal (partly owned by Merck and GlaxoSmithKline, makers of the MMR vaccine.) Wakefield lost his medical license and to this day, 20 plus years later, is the infamous doctor often [ridiculously blamed for measles outbreaks](#).

These are just three examples of how the media has colluded to run smear campaigns against those that speak out to do the right thing. More details about each one is below.

1. Jenny McCarthy

1. Jenny McCarthy talks about the smear campaign concocted against her by pro pharma organizations including the American Academy of Pediatrics (a pro pharma/vaccine front group) [https://youtu.be/pz\\_td2pcMco?t=1445](https://youtu.be/pz_td2pcMco?t=1445)

2. Dr. Judy Mikovits. PhD

1. Vaccines, Retroviruses, DNA, and the Discovery That Destroyed Dr. Judy Mikovits' Career <https://bit.ly/2reRaoh>
2. Vaccines and Retroviruses: A Whistleblower Reveals What the Government is Hiding <https://bit.ly/2CB7ZxW>
3. 20 Million Americans Likely Infected With Retrovirus Found In Vaccines At The Root Of Multiple Chronic Diseases <https://bit.ly/2EHNEcQ>

3. Dr. Andrew Wakefield, MD

When Dr. Andrew Wakefield, MD and 12 other doctors wrote a case series paper – concluding "*We did not prove an association between measles, mumps, and rubella vaccine and the syndrome described. Virological studies are underway that may help to resolve this issue*", the pharmaceutical industry knew they had a problem. Why? Even though the authors did not prove an association, they called for more research, and that threatened the lucrative multi-dose vaccine market that was necessary if the pediatric vaccine schedule was to continue to grow. When asked if he would recommend the MMR vaccine, Dr. Wakefield said that

until further safety studies could be done, he recommended parents choose the single dose shots instead of the 3-in-one shot. For that, his career was assassinated, and vaccine makers pulled the single dose vaccines so parents couldn't choose them, thus leaving only the multi-dose combination vaccines to use. Anytime anyone questions anything about vaccine safety, Dr. Wakefield is falsely accused and held up as a warning.

2. Part 2: Murdoch Newspaper's Deceptive Tactics Infect the British Medical Journal <https://bit.ly/2EwhdMZ>
3. In 2011, the British Medical Journal published a special series authored by journalist Brian Deer (he is not a doctor) titled "How the case against the MMR vaccine was fixed." In the piece, Deer makes claims of fraud and data manipulation against Andrew Wakefield in his 1998 Lancet paper, "Ileal-lymphoid-nodular hyperplasia, non-specific colitis, and pervasive developmental disorder in children." The cornerstone of the claim of fraud made against Wakefield relates to 'Patient 11' and the timing of his vaccination and onset of autism.

A letter from the father of 'Patient 11' has come to light which proves Wakefield did not alter the data as claimed by Deer. In addition, this letter proves that 'Patient 11' was not selected by solicitors, but rather through a request made by the father. You can see these important new pieces of evidence at

[www.patient11.com](http://www.patient11.com)

- You can help Andrew Wakefield. Please sign the petition to retract BMJ's fraudulent write-up by journalist Brian Deer <https://www.change.org/p/british-medical-journal-bmj-retract-fraudulent-write-up>

20. Wakefield Turncoat Authors Committed The Research Fraud

<https://www.autisminvestigated.com/wakefield-turncoat-authors/>

4. It has become known that if you question vaccines in any way, your career and life could be destroyed. Therefore, many doctors, scientists and journalists are fearful, remain silent and avoid or censor anything related to the topic of vaccines. Some speak out, but remain anonymous under a pseudonym: *"Under the current circumstances where publication of any information critical of vaccines can have serious personal repercussions, the author has chosen to publish under this pseudonym."* -Lars Andersson, Medical scientist
5. Dr. Chris Exley, PhD -- (April 2019) History seems to be repeating itself after the Dr. Andrew Wakefield media charade. In April 2019, the brilliant scientist Dr. Chris Exley, PhD is being attacked in the media. He has a long and highly respected career researching aluminum. He knows more about aluminum than probably anyone else on the planet. His studies and conclusions have never before been questioned and have withstood rigorous peer-review.

But now his research about *injected* aluminum in vaccine adjuvants (which is 100% absorbed compared to just 0.3% of *ingested* aluminum) threatens the CDC's pediatric vaccine schedule. And so the vaccine industry, and public health agencies dedicated to protecting their vaccine program, are attempting to discredit his work. His funding at the Institutional level has been halted and now

Gofundme has shut down his page to study aluminum in vaccines!

This is the very dangerous world we live in -- the world of the "regulatory vacuum" described by Supreme Court Justice Sonia Sotomayor, where nobody is responsible to ensure current science is integrated into vaccine design. And many profit from silencing inconvenient truths.

21. Funding halted for Professor Chris Exley, who links vaccines to autism <https://bit.ly/2uQ8mQK>
22. Robert F. Kennedy Jr. speaks out about Dr. Chris Exley and vaccine science censorship <https://bit.ly/2JnZ5sd>

3. Modern Medicine, Organized Crime and Peter Gotzsche <https://bit.ly/2umnzsz>
4. The Takedown of Dr. Carolyn Dean, MD, ND -- "After my appearance on *The Dini Petty Show, Death By Sugar, on Dec 11, 1990*, a sugar lobby group complained to the College of Physicians and Surgeons of Ontario that I was saying bad things about sugar. The College, who is supposed to protect the public, actually upheld the lobbyist complaint and admonished me for speaking out about sugar! Yes, that's right folks. I was a whistle blower on sugar and I was too dangerous to be allowed to continue.  
The College then sent a young man as a plant into my office. He denounced me for "not giving him a homeopathic remedy on his first visit for his allergies." Yes, if I'd given him a remedy on his first visit, I'm sure that would have been his complaint! Finally, in 1995 after I had gone to New York to do AIDS research, without me being "invited" to the trial, my license...which I dropped in 1994...was stolen from me, to send a message to any other doctors who practiced alternative medicine.  
This is the way lobby groups, drug companies and allopathic medicine "controls" doctors who don't follow the standard practice of medicine: drugs and surgery. See my whole story in my Kindle edition of *Death by Modern Medicine: Seeking Safe Solutions* and in an article I wrote for NaturalNews.com (below)."

# The True History of Infectious Disease and Vaccines (with Charts)

Look at the chart below. "Deaths per 100,000" is on the vertical Y axis. "Year" is on the horizontal X axis starting in the year 1900 and marked every three years all the way to 1963. Look at when the diphtheria, pertussis (whooping cough) and MMR vaccines were introduced in the United States as compared to the number of deaths. Look at the graphed lines and their trends. When you see a vaccine being introduced keep in mind that it is being used at first on a small percentage of the population until its use becomes more widespread.

## **Why Herd Immunity Is Total BS and is the Secret Sham Behind Forced Vaccine Mandates**

*"We were headed toward natural herd immunity for many viruses, like measles, until the introduction of the vaccine. Today in the US, we have natural herd immunity for scarlet fever without a vaccine. Vaccines actually disrupted natural immunity for certain viruses since live virus vaccines like the MMR vaccine actually spread the very illness they are supposed to stop via what is called vaccine shedding. Vaccines also fail at a fairly high percentage rate and only last for 2 to maybe 10 years. In addition, the current vaccine program has perpetuated other illnesses such as shingles, asthma, diabetes, cancer, multiple sclerosis, rheumatoid arthritis, ALS, autism and other developmental disorders. These truths the agenda driven, pharmaceutical backed media will never report! People need to know that the concept of herd immunity via vaccines doesn't work and has become a hoax for the purpose of increasing vaccine uptake. The herd immunity idea is designed to make you think that you are not only vaccinating to protect yourself, but also vaccinating for the greater good. It's also a perfect ploy for pharma to align those who believe in the propaganda surrounding vaccines against those who are informed and do not, and make those who do not, look like the "bad guys!"*

### **Are Childhood Infectious Diseases Protective Against Cancer Later in Life?**

1. How Childhood Infectious Diseases Protect Us From Cancer Later In Life  
<https://bit.ly/2S94fgy>
2. Studies show: Natural Mumps, Measles, Chicken Pox & Influenza viruses protect against cancer <https://bit.ly/2RHwEVV>
3. Do childhood diseases affect on-Hodgkin lymphoma (NHL), Hodgkin lymphoma (HL) risk? "A case-control study from northern and southern Italy  
<https://bit.ly/2WIHjmW> "Our findings provide additional support to the hypothesis that infections by most common childhood pathogens may protect against HL or, at least, be correlated with some other early exposure, which may lower the risk of HL in adulthood. In addition, our study shows that measles may provide a protective effect against NHL."
4. Febrile infectious childhood diseases in the history of cancer patients and matched controls <https://www.ncbi.nlm.nih.gov/pubmed/9824838> "The study consistently revealed a lower cancer risk for patients with a history of FICD (febrile infectious childhood diseases.) The strongest associations were found between patients with non-breast cancers and rubella respectively chickenpox. A strong association was also found with the overall number of FICD both 'classical' (measles, mumps, rubella, pertussis, scarlet-fever and chickenpox) and 'other'. "
5. Childhood infectious diseases and risk of leukaemia in an adult population  
<https://www.ncbi.nlm.nih.gov/pubmed/23575988> "Our study is aimed at investigating the association between common childhood infectious diseases (measles, chickenpox, rubella, mumps and pertussis) and the risk of developing leukaemia in an adult population... The number of infections was strongly inversely associated with the risk of chronic lymphoid leukaemia (CLL)... Our results pointed out a protective role of childhood infectious diseases on the risk of CLL in adults."
6. Early life exposure to infections and risk of childhood acute lymphoblastic leukemia <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3165002/> "Evidence of a protective role for infection-related exposures early in life is supported by findings in both the non-Hispanic white and Hispanic populations within the Northern California Childhood Leukemia Study (NCCLS).

# Fraud at the CDC, Part 1

## MMR Vaccine Fraud and the CDC Whistleblower

**Must watch film >>> *Vaxxed: From Cover-up to Catastrophe*** -- *Vaxxed* is the true story about five CDC scientists who committed scientific fraud by destroying 4 years worth of data (about 10,000 documents) that linked Merck's MMR vaccine to a statistically significant increase in autism in black boys. In the Fall of 2014, 10 years later, CDC scientist Dr. William Thompson blows the whistle and exposes this mind-blowing cover-up! To this day, this unbelievable story has been censored by the mainstream media, which is why you need to watch this film!

## **Fraud at the CDC, Part 2**

### **Statement from Dr. Gary Goldman, Ph.D. Research Analyst Working with the CDC**

*"In 1995 I was hired as an Epidemiology Analyst on the Antelope Valley Varicella Active Surveillance Project—a joint project of the Los Angeles County Department of Health Services (LACDHS)—Acute Communicable Disease Control Unit and the Centers for Disease Control and Prevention (CDC, Atlanta, GA).*

*Initially, I considered it an honor to be part of a team that was to study the effect of the varicella vaccine on the 300,000 residents comprising the Antelope Valley region. While all positive effects of the vaccine were readily approved for publication, it appeared the deleterious effects (e.g., increases in shingles incidence among unvaccinated children and adults that had natural varicella) were being suppressed.*

*After 8 years, I resigned from my employment so as to publish all the results and not be a party to what I perceived as research fraud—with the sponsors of the research seemingly squashing objective research and dictating published outcomes. I was served a notice to "cease and desist" publication of the results in a medical journal, but overcame that objection and the studies were indeed published.*

*Both the LACDHS and CDC continued (unsuccessfully) to interfere and attempt to prevent publication of manuscripts after they had already been accepted and approved for publication by various medical journal editors. Intervention of my attorney was necessary in some cases." —Gary Goldman, Ph.D.*

Source: <https://physiciansforinformedconsent.org/leadership/gary-goldman-phd/>

### **Convicted Criminal Dr. Poul Thorsen**

In April 2011, Thorsen was indicted for stealing millions of dollars in grant money from the CDC and used the money to cover up vaccine dangers. Thorsen was heavily involved in producing a stream of fraudulent studies that supposedly disproved the now-evident link between vaccines and autism. Even still, the CDC conveniently cites Thorsen's fraudulent studies as "evidence" that vaccines are safe and don't cause autism, declaring the debate to be over in light of their findings.

Robert F. Kennedy, Jr. Demands the Office of the Inspector General and Congress Investigate Dept of Justice for Fraud and Obstruction of Justice  
<https://prn.to/2ruxkm0>

January 6, 2019 - The [New] Vaccine Debate by Sharyl Attkisson, former CBS Journalist  
*"Now—we have remarkable new information: a respected pro-vaccine medical expert used by the federal government to debunk the vaccine-autism link, says vaccines can cause autism after all. He claims he told that to government officials long ago, but they kept it secret... Dr. Zimmerman was the government's top expert witness and had testified that vaccines didn't cause autism. The debate was declared over. But now Dr. Zimmerman has provided remarkable new information...."*

*On June 15, 2007, he took aside the Department of Justice—or DOJ lawyers he worked for defending vaccines in vaccine court. He told them that he'd discovered "exceptions in which vaccinations could cause autism". "I explained that in a subset of children, vaccine induced fever and immune stimulation did cause regressive brain disease with features of autism spectrum disorder."*

*[As Robert F. Kennedy explains], "This panicked the two DOJ attorneys and they immediately fired Zimmerman. That was on a Friday and over the weekend they called*

*Zimmerman and said his services would no longer be needed. They wanted to silence him. Days after the Dept. of Justice lawyers fired Dr. Zimmerman as their expert witness, he alleges, they went on to misrepresent his opinion to continue to debunk autism claims."*

The Clear Legal Basis That Vaccines Cause Autism <https://bit.ly/2Noq2i6>

## **129+ Reasons Why You Cannot Trust Pharma or the FDA (A Seven Year Sampling of Fraud, Cover-ups and Corruption, 2010- 2017)**

This section is to show you the MASSIVE amount of corruption and criminal behavior that almost all pharmaceutical companies engage in, especially the big ones – Merck, GSK (GlaxoSmithKline), Pfizer, Johnson & Johnson, Eli Lilly, Abbott, AstraZeneca, Amgen, Allergan, Bristol-Myers Squibb, Novartis and Purdue, makers of Oxycontin – all who have been found guilty and have agreed to huge settlements related to criminal and illegal civil behavior related to their drugs such as off-label promotion, failure to disclose safety data, paying kickbacks to physicians, making false and misleading statements. Many of these companies are involved in vaccine manufacturing. These settlements are widely seen to be written into pharma's cost of doing "business as usual" and have no deterrent effect on the company or how they continue to operate in the future making billions upon billions. The below examples of corruption and criminal behavior are just the tip of the iceberg and are just the ones where pharmaceutical companies have been caught! Over the years, and in 2019, pharma has gained even more control over the US government, (Democrats and Republicans are equally to blame) and other governments around the world. In the US government, pharmaceutical companies control the CDC, FDA, HHS, NIH and likely other agencies. Unfortunately, the public trusts these agencies as watchdogs because that is how they are purported. However, it's really a front. A ploy. A con.

With around \$6.4 billion spent annually and about 70% of the advertising revenue coming from pharmaceutical companies, they also manipulate and control the US mainstream media (television, radio, and their websites) as well as the major websites, Google, YouTube, Twitter, Instagram, Pinterest and Facebook. They do this by controlling the narrative around their drugs and vaccines. They dictate what is and isn't reported (censored, retracted and covered-up), how its reported (often falsely spinning facts) and how much coverage a story gets. Pharmaceutical companies also manipulate and control some of the biggest named medical journals that doctors rely upon for accurate and truthful information. Once respected medical journals have been corrupted with most medical research being a farce!

Note: I don't expect you to read all the articles in the section below, or any of them for that matter. You don't have to. Scan through the headlines and excerpts as these have been provided to make it easy for you to peruse and understand the real picture and its enormity. Keep in mind that the enormity of this corruption affects you. It affects us all

in many, many ways - too numerous to go into right now. (If I have time at a later date I will address this topic.)

Hopefully by now you've read through the sections [40 Shocking Facts About Vaccines](#) and [Shills, Trolls, Front Groups, PR Smear Tactics & More](#). If you haven't yet, I highly suggest you do because these sections will explain a lot to you. If you already have, then skim through the article headlines and excerpts in the first section below 'Fraud at the FDA' and further down. Keep in mind that this list mostly represents only seven years worth of corruption (2010 - 2017). I guarantee, in fact I know, there's a heck of a lot more, and sadly more to come unless "we the people" do something about it!!

### **Subsections below:**

1. **Fraud at the FDA**
2. **Fraud in Research & Clinical Trials**
3. **Johnson & Johnson Fraud**
4. **GlaxoSmithKline (GSK) Fraud**
5. **Pfizer Fraud**
6. **Merck Fraud**
7. **Payouts, Bribery and Kickbacks**
8. **Price Fixing and Profiteering**
9. **Marketing Fraud**
10. **Pharma General Misconduct and Fraud**

### **Fraud at the FDA**

What the FDA is supposed to do according to their website [www.fda.gov](http://www.fda.gov), "The Food and Drug Administration (FDA) is an agency within the U.S. Department of Health and Human Services. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation."

From Attorney [Jonathan Emord](#) "The FDA's whole system of drug review is bogus. It's designed to protect and advance the interests of the drug industry. A lot of people don't realize this, but FDA never tests the drugs it approves. FDA does NO independent testing at all. It relies entirely on the testing done by the drug advocate, the proponent of the drug application that has a self-interest and a conflict of interest. That party is looked to for all the drug testing. They do their own testing. There have been multiple instances of corruption in this process where false information or negative information has been kept away from the FDA so the FDA will approve the drug." FDA Lawyer Jonathan Emord has defeated the food and drug administration more times in federal court than any other attorney in America.

### **Here is how the FDA really operates:**

A great video on the real goal of the medical system <https://bit.ly/2BIXIUC>

## **Merck: A History of Criminal Misconduct, Fraud and Cover-ups at the 2nd Largest Vaccine Maker in the World**

1. The Vioxx Scandal – Merck are the makers of the arthritis drug Vioxx. Merck KNEW from their own studies that Vioxx was lethal and caused heart attacks and strokes, hid the data and still chose to aggressively market it to doctors! The doctors trusted Merck and prescribed it like candy. Merck's Vioxx ended up causing somewhere between 88,000 and 139,000 strokes and heart attacks, and killed at least 55,000 people – more Americans than the Vietnam War – and no one from Merck went to jail.
  1. Article: Legal Murder <https://bit.ly/2Cs7Exq>

2. Merck even made a "hit list" of doctors who criticized Vioxx, according to testimony in a Vioxx class action case in Australia. The list, emailed between Merck employees contained doctors' names with the labels "neutralise," "neutralised" or "discredit" next to them. One email said, "we may need to seek them out and destroy them where they live..."  
<http://www.cbsnews.com/news/merck-created-hit-list-to-destroy-neutralize-or-discredit-dissenting-doctors/>
2. 72 Page Document Shows Merck Paid Doctors at Least \$18.8 million (\$18,810,495.52) – Document Shows Heavy Vaccine Promotion  
<https://bit.ly/2Ap0alv>
3. 2016 – Judge finds Merck lied in patent trial, overturns \$200-million verdict

5. The Vytorin Cholesterol Drug Scam
  1. Vytorin Fraudulent Marketing Class Action Lawsuit  
 "Merck and Schering-Plough knew the results of its Vytorin study would be negative and hid them for months in an attempt to mislead shareholders"  
<https://www.lawyersandsettlements.com/lawsuit/vytorin-fraudulent-marketing.html>
  2. Vytorin Ad Shame Taints Entire Marketing Industry  
<https://adage.com/article/news/vytorin-ad-shame-taints-entire-marketing-industry/123228/>
    - Reports that Merck & Co. and Schering-Plough Corp. kept under wraps for more than a year findings that Vytorin does not deliver results

- *"Nobody knows if Vytorin is safe or effective, but with enough scientific fraud, we can sure make it looks like it is."*
  - Sen. Chuck Grassley of Iowa, wrote that the companies budgeted at least \$3.5 million to entertain doctors to persuade them to prescribe Vytorin
  - *The scientific study conducted... did not reduce the build-up of fatty plaque in the arteries as promised in the companies' marketing.*
  - *The two-year study was completed in April 2006, but Merck and Schering didn't make it public until last week. The reasons they cited were complexity of the data and their own scientific concerns, which led them to do more research. In the interim, the drug was reaping billions in sales.*

## **97 Doctors Brave Enough to Speak Publicly About Vaccines**

*"The further a society drifts from the truth, the more it will hate those who speak it"*  
**George Orwell**

Sadly, it has become known in the medical community that if you speak out against vaccines or even question vaccines in any way, your career and life could be destroyed. Therefore, many doctors, scientists and journalists are fearful, remain silent and avoid anything related to the topic of vaccines. Some speak out, but choose to remain anonymous under a pseudonym. We applaud these doctors and researchers that have had the guts to speak honestly about vaccines.

Medical Doctors Opposed to Forced Vaccinations – Should Their Views be Silenced? <https://bit.ly/2TcA0B1>

## **Ingredients in Common Vaccines, Their Risks and Safety**

Note: As you research and learn about vaccine ingredients, continually keep in mind what was stated above (and repeated below) by Dr. Toni Bark and many other vaccine experts – *route of entry is critical when looking at toxicity*. Any doctor or journalist who states that mercury, aluminum, formaldehyde, MSG or any toxin in vaccines is fine and compares it to ingesting aluminum or mercury from breast milk, fish or Chinese food (MSG), or anything else, is either ignorant or isn't telling you the truth (lying to you!) [In this video, Dr. Toni Bark, medical doctor and long time vaccine researcher explains the importance of 'route of entry'](#). Digestion is an open system from mouth to anus and

excretion is relatively easy. Injection via the circulatory system is a *closed* system and is 100% taken up by the body. *Injection* of mercury, aluminum or any toxin into the bloodstream is very different than *ingesting* it. Here is a video – Ethyl Mercury vs. Methylmercury, Ingestion vs. Injection <https://youtu.be/qx7fW52rHtM>

Excipients Included in U.S. Vaccines, by Vaccine - June 2018 <https://bit.ly/2ieyaRv>

In addition to weakened or killed disease antigens (viruses or bacteria), vaccines contain very small amounts of other ingredients – excipients or media.

Some excipients are added to a vaccine for a specific purpose. These include:

**Preservatives**, to prevent contamination. For example, thimerosal.

**Adjuvants**, to help stimulate a stronger immune response. For example, aluminum salts.

**Stabilizers**, to keep the vaccine potent during transportation and storage. For example, sugars or gelatin.

Others are residual trace amounts of materials that were used during the manufacturing process and removed. These include:

**Cell culture materials**, used to grow the vaccine antigens. For example, egg protein, various culture media.

**Inactivating ingredients**, used to kill viruses or inactivate toxins. For example, formaldehyde.

**Antibiotics**, used to prevent contamination by bacteria. For example, neomycin.

The following table lists all components, other than antigens, shown in the manufacturers' package insert (PI) for each vaccine. Each of these PIs, which can be found on the FDA's website (see below) contains a description of that vaccine's manufacturing process, including the amount and purpose of each substance. In most PIs, this information is found in Section 11: "Description."

All information was extracted from manufacturers' package inserts.

If in doubt about whether a PI has been updated since this table was prepared, check the FDA's website at:

<http://www.fda.gov/BiologicsBloodVaccines/Vaccines/ApprovedProducts/ucm093833.htm>

2017 - Dirty Vaccines: Every Human Vaccine Tested Was Contaminated With Metals & Debris <https://bit.ly/2jzJ8mo>

- Aluminum – a known neurotoxin that can affect the brain (encephalitis), kidneys and other organs
- Aborted fetal tissue or animal tissue
- Live viruses which can be from aborted fetal tissue, or animal organs monkey kidneys, etc.
- Mercury contained within thimerosal (49% mercury). Mercury is one of the most toxic substances on the planet and is added to vials of vaccines that contain more than one dose. Mercury is a neurotoxin that acts on the nervous system including the brain.
- Formaldehyde -- a chemical preservative that is carcinogenic, often used as embalming fluid for cadavers
- Monosodium glutamate (MSG) and 2-phenoxy-ethanol
- Antibiotics
- Egg protein is found in influenza and yellow fever vaccines, which are prepared using chicken eggs
- Polysorbate 80

- Contamination issues with the following ingredients not listed on the vaccine insert:
  - Glyphosate – a carcinogen and the key ingredient in Monsanto’s weed killer RoundUp. Glyphosate can also eat away at bone and has been found in some vaccines. (Although not listed in the ingredients, glyphosate was found in all five vaccines that were tested.) <https://bit.ly/2RoTqGg>
  - Lead – a carcinogen
  - Nickel – a carcinogen
  - Uranium – a carcinogen and along with mercury is one of the most toxic substances on the planet
-

## **Mercury**

FAQ's About Mercury (Thimerosal) in Vaccines <http://www.nvic.org/faqs/mercury-thimerosal.aspx>

"Ten Lies" Told About Mercury in Vaccines - Trace Amounts

<http://traceamounts.com/ten-lies-told-about-mercury-i-vaccinesn/>

In this congressional hearing video below, Indiana Congressman Dan Burton questions why mercury is still being used in vaccines despite the fact that there have been NO studies on mercury containing thimerosal since 1929. The only study in 1929, was by the pharmaceutical company Eli Lilly themselves; the patent holder for thimerosal. They only tested thimerosal on 22 patients with meningococcal meningitis and of those patients died. Congressional Hearing with CDC September 8, 2004 <https://youtu.be/fDsdmJ8l3ks>

## **50 Studies Questioning Vaccine Safety**

There is a robust, worldwide body of published science from highly esteemed scientists questioning the safety of many different aspects of vaccines-how come we never hear from them? The majority of the most compelling science has been published since 2010.

However, the American Academy of Pediatrics (AAP) who is heavily supported by pharma, made representations to President Trump in a [letter](#) dated 02/7/2017 that are utterly indefensible and inaccurate, as any rational review of the studies quickly demonstrates. For example, the AAP wrote: *"Claims that vaccines are unsafe when administered according to expert recommendations have been disproven by a robust body of medical literature...we write to express our unequivocal support for the safety of vaccines."*

The AAP's statements to the President are baseless, reckless, and easily refuted. [They are a lie!]

Note: Just like the [tobacco industry manipulated UNICEF](#), a children's rights agency, for more than a dozen years, pharmaceutical companies, food companies and others control and manipulate the American Academy of Pediatrics who receive massive donations from these industry companies. In fact, in actuality, AAP behaves like a [deceptive front group for big pharma, big food and others](#). After all, what sane, rational human being wouldn't support the desire to create a Vaccine Safety Commission to do all we can to make vaccines as safe as possible? Apparently the doctors at the American Academy of Pediatrics!

1. [The American Academy of Pediatrics Refuses to Back Vaccine Claims with Science](#) <https://bit.ly/2E63HPY>

Note that these 50 studies only represent a portion of the published work implicating vaccinations in a wide variety of negative health outcomes. [Click here for a list of all 50 Studies Questioning Vaccine Safety](#).

# The Flu Vaccine

Flu Vaccine Fails 99% in New Cochrane Review <https://www.drbrownstein.com/flu-vaccine-fails-99-in-new-cochrane-review>

*"On February 1, 2018, the Cochrane group released its latest findings on the flu vaccine. They included 52 clinical trials of over 80,000 people assessing the safety and effectiveness of flu vaccines in healthy adults. The authors found that flu vaccines probably reduced influenzas in healthy adults from 2.3% without vaccination to 0.9% with. That means that the difference between the vaccinated and the unvaccinated is 1.4% or 0.014. Therefore, 71 people would need to be treated with the flu vaccine to prevent one case (1/1.4%). In other words, the flu vaccine did nothing for 70 out of 71 who received it. That means this study found the flu vaccine failed 99% (71/72)."*

Cochrane Collaboration: Flu Vaccines of No Benefit <http://ahrp.org/cochrane-collaboration-flu-vaccines-of-no-benefit/>

*"This review includes 15 out of 36 trials funded by industry (four had no funding declaration). An earlier systematic review of 274 influenza vaccine studies published up to 2007 found industry funded studies were published in more prestigious journals and cited more than other studies independently from methodological quality and size. Studies funded from public sources were significantly less likely to report conclusions favorable to the vaccines. The review showed that reliable evidence on influenza vaccines is thin but there is evidence of widespread manipulation of conclusions and spurious notoriety of the studies. The content and conclusions of this review should be interpreted in light of this finding."*

## **Merck's HPV Vaccine Gardasil - Why It May Be The Most Dangerous Vaccine Ever**

Posted by [Allison Fujito March 2 at 8:57pm](#)

*"On March 2, I spoke to the Allegheny County Board of Health at their bi-monthly meeting. After trying to mandate Gardasil for all 11-year-olds, they decided last year to aggressively market it in an effort to increase uptake of this vaccine, in spite of its extremely troubling safety record.*

*I gave them packets that included a transcript of my speech, 2 pages of the Gardasil HPV vaccine package insert, and 2 pages of the Materials Safety Data Sheet on polysorbate 80, which is only one of several troublesome ingredients in Gardasil.*

*Here is what I said:*

"The more closely I look at the science on Gardasil/HPV vaccine, the more concerned I am, and I'd like to make sure that you've been made aware of all the problems.

Turn to the 4th page in your packet, that's actually page 12 from the Gardasil package insert <https://bit.ly/2KxeQKH>

Look at section 13.1. It says "GARDASIL 9 has not been evaluated for the potential to cause carcinogenicity, genotoxicity or impairment of male fertility."

IT HAS NOT BEEN EVALUATED FOR THE POTENTIAL TO CAUSE CANCER!

Please turn back one page in your packet, to section 11, at the bottom of page 11, where it lists the ingredients, also highlighted.

It says that Gardasil contains "50 mcg of polysorbate 80."

I've attached 2 pages of the Materials Safety Data Sheet for polysorbate 80.

<http://www.sciencelab.com/msds.php?msdsId=9926645>

Please flip to the last page in your packet, and look at section 11, where it says, "Special Remarks on Chronic Effects on Humans." It says,

"May cause adverse reproductive effects based on animal test data. No human data found. May cause cancer based on animal test data. No human data found. May affect genetic material (mutagenic)."

So, Gardasil contains an ingredient that may cause cancer. And Gardasil ALSO contains antigens from 9 strains of a virus that we are told causes cancer.

Yet, it's never been evaluated for its potential to cause or trigger cancer.

What if the vaccine does not perform the way it's expected to?

What if it's capable of causing cancer?

What if the children being vaccinated have immune systems that don't react the way you expect?

According to The American Autoimmune Related Diseases Association, one in five suffer from autoimmune disease

THAT MEANS THAT THEIR IMMUNE SYSTEM DOESN'T REACT THE WAY YOU'D EXPECT.

What if those 11-year-olds being given Gardasil have already received 41 other vaccines that have ALSO not been assessed for carcinogenicity?

Because, that's what the CDC schedule calls for now: 41 vaccines by age 11.

ALL the package inserts for ALL the other vaccines also say that they have never been assessed for carcinogenicity.

Or mutagenicity.

Or impairment of fertility.

Every time we find evidence of a new problem, we're accused of "shifting the goalposts."

It's not shifting the goalposts to point out that there are even MORE problems than we originally thought."

2019 – Cervical Cancer Rates Increase Despite Widespread Use of the HPV Vaccine

<https://thetruthaboutcancer.com/cervical-cancer-hpv/>

2019 – RFK, Jr.: Merck's HPV Vaccine Gardasil "The Science" Video and Other Facts --

<https://bit.ly/2HyqLHQ> This must-watch video details the many problems with the development and safety of Merck's third-highest grossing product, Gardasil and its clinical trials leading up to its release upon an unsuspecting public. Children's Health Defense (CHD) and Robert F. Kennedy, Jr., Chairman and Chief Legal Counsel, ask that you watch and share this video so that you, and others, may make an informed decision of whether or not to give your child, boy or girl, a Gardasil vaccine. It can also be a useful tool for

*pediatricians who are trying to understand how this vaccine, that is actually causing health problems with young people, could have been approved by FDA and then recommended by CDC.*

Mass HPV Vaccination Plan for the U.S. <https://thevaccinereaction.org/2018/11/mass-hpv-vaccination-plan-for-the-u-s/>

*"Research has shown that women vaccinated with Gardasil have a higher incidence of HPV infection with HPV strains that are not covered by the vaccine... Health issues associated with HPV vaccination include nervous and immune system disorders such as postural orthostatic tachycardia syndrome (POTS), chronic fatigue syndrome, blood clots, acute respiratory failure and cardiac arrest. Also widely reported are menstrual abnormalities and premature ovarian failure. Using the MedAlerts search engine, as of April 30, 2018, the federal Vaccine Adverse Events Reporting System (VAERS) contained more than 58,992 reports of HPV vaccine reactions, hospitalizations, injuries and deaths including 430 related deaths, 794 hospitalizations, and 2,773 disabling conditions. Over 45 percent of the reported serious adverse events occurred in children and teens 12-17 years of age."*

Gardasil does not reduce the rate of cervical cancer or any other type of cancer. It reduces the rate of neoplasia. However, about 90% of those who get neoplasia, (abnormal growth of tissue), clear without any incident. For the remaining 10%, there is a cream that shuts down HPV. There are 209 strains of the human papillomavirus or HPV that have been identified. The Gardasil 9 vaccine covers nine of these strains. Of the 200 or so strains the vaccine doesn't address, some of these strains are rare and there is a possibility that the vaccine can increase their prevalence, which can make the

vaccinated person as much as 60% more susceptible to HPV. In addition, some of the other HPV strains have been shown to cause cancer. In fact, the FDA has ruled about Gardasil, "Efficacy of high-grade cervical cancer was not established."

### **Merck Covers Up Viral Containing Polio Vaccine that Caused Cancer and AIDS**

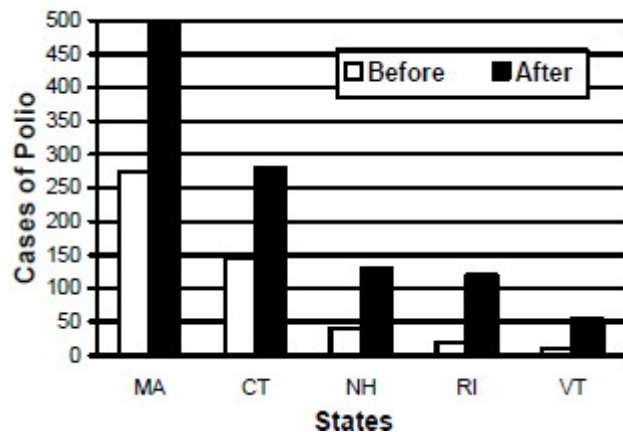

1. The Virus and the Vaccine <https://bit.ly/2LF0TLU>
  - "From 1955 to 1963, the polio vaccine was contaminated with a simian virus known as SV40 and has been associated with a number of rare human cancers." ...
  - "It has been said to have been administered to as many as 98 million Americans." ...
  - "Dozens of scientific studies have found the virus in a steadily increasing number of rare brain, bone and lung-related tumors - the same malignant cancer SV40 that causes cancer in lab animals." ...
  - "Federal health officials see little reason for concern. A growing cadre of medical researchers disagree."
2. Censored television interview leaked – Dr. Maurice Hilleman, explains why Merck's vaccines have spread cancer, AIDS & other plagues <https://youtu.be/1-XZs53vZzw>
  1. Transcript of above audio interview with Merck vaccine scientist who discusses presence of SV40, AIDS and cancer viruses in vaccines [https://www.naturalnews.com/033584\\_Dr\\_Maurice\\_Hilleman\\_SV40.html](https://www.naturalnews.com/033584_Dr_Maurice_Hilleman_SV40.html)
3. The Polio Vaccine Cancer Cover-up <https://thetruthaboutcancer.com/polio-vaccine-cancer/>
4. Cancer risk associated with simian virus 40 contaminated polio vaccine. <https://www.ncbi.nlm.nih.gov/m/pubmed/10472327/>

"CONCLUSIONS: These data suggest that there may be an increased incidence of certain cancers among the 98 million persons exposed to contaminated polio vaccine in the U.S.; further investigations are clearly justified."
5. The SV40 Virus: Has Tainted Polio Vaccine Caused An Increase in Cancer? [www.nvic.org/vaccines-and-diseases/Polio-SV40/BLFTestimonySV40.aspx](http://www.nvic.org/vaccines-and-diseases/Polio-SV40/BLFTestimonySV40.aspx)

### **Can the Polio Vaccine Create New Cases of Polio?**

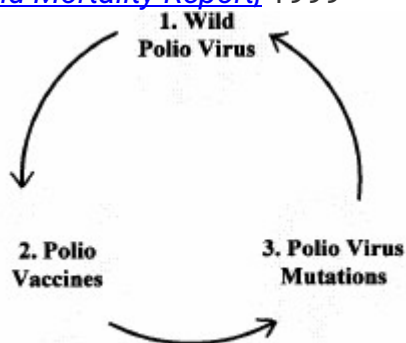

"In 1995, the [New England Journal of Medicine](#) published a study showing that children who received a single injection within one month after receiving a polio vaccine were 8 times more likely to contract polio than children who received no injections." –Neil Z Miller - [The Polio Vaccine: A Critical Assessment of its Arcane History, Efficacy, and Long-term Health-related Consequences](#), 2004

"The live attenuated strains used in the oral poliovirus (OPV) ... strains replicate in the human gut and are excreted for several weeks after immunization... This may, in rare cases, cause vaccine-associated paralytic poliomyelitis (VAPP) in vaccinees or result in transmissible and neurovirulent circulating vaccine-derived poliovirus (cVDPV) strains." - [Vaccine](#), 2009

So, let's take a look at the data. Did the cases of polio decrease after the vaccine? Well, in fact, no. The chart to the left shows 5 states (MA, CT, NH, RI, VT) that were sampled show a whopping increase in polio after the vaccine ranging from 266% - 642%! –Neil Z Miller [The Polio Vaccine: A Critical Assessment of its Arcane History, Efficacy, and Long-term Health-related Consequences](#), 2004 via [US Government Statistics](#)

In fact, according to CDC figures, every case of polio in U.S. since 1979 was caused by the polio vaccine or from foreigners bringing wild polio into the U.S. – [CDC - Morbidity and Mortality Report](#), 1999

The wild polio virus brought about the development of polio vaccines, which spawned mutations of the polio virus, resulting in new “vaccine-derived” polio viruses. – [The Lancet](#), 2001; [CDC – Poliomyelitis Prevention in the United States](#), 1990

On September 24, 1976, [The Washington Post](#), 2006 reported Dr. Jonas Salk’s assertion that the live oral virus vaccine of Dr. Albert Sabin had been the cause of reported polio cases in the US since 1961. (Reposted from above, here is a rare video interview with Dr. Jonas Salk <https://youtu.be/eE3CQmsU4Ek>)

“Vaccine-derived polioviruses (VDPVs), strains of poliovirus mutated from the oral polio vaccine, pose a challenge to global polio eradication. Immunodeficiency-related vaccine-derived polioviruses (iVDPVs) are a type of VDPV which may serve as sources of poliovirus reintroduction after the eradication of wild-type poliovirus.” - [Vaccine](#), 2015

“The oral vaccines are inexpensive, costing about 12 cents per dose, and simple to administer. But they are not foolproof. In one out of every few million recipients, they cause polio paralysis. Immune-impaired individuals can become long-term shedders of the virus.” - [Center for Infectious Disease Research and Policy](#), 2008

## Documentary Films About Vaccines

*Vaxxed: From Cover-up to Catastrophe* - *Vaxxed* is the true story about how five scientists at the CDC committed scientific fraud by destroying 4 years worth of data (about 10,000 documents) that linked Merck's MMR vaccine to a statistically significant increase in autism. However, what none of these scientists knew was that one of them did not destroy his documents and saved everything. In the Fall of 2014, 10 years later, CDC senior scientist Dr. William Thompson blew the whistle and exposed this mind-blowing cover-up! To this day, this *unbelievable* story has been censored by the mainstream media, which is why you need to watch this film!!

## Social Media Posts and Miscellaneous Notes

*"As a physician, trained at an Ivy league medical school and residency, I am acutely aware of how ties to the pharmaceutical industry influence almost every level of teaching, training and research. This is done by sponsoring educational events, supporting the academic salaries of professors, and by giving research grants, thereby driving research agendas. Pharma also influences physicians directly, which is currently being investigated by Propublica.*

The influence of corporate pharmaceutical financial motivations cannot be underestimated and it is a piece of our medical system that ordinary citizens simply do not understand. This plays out in several ways with regard to the vaccine industry. First, SCIENTIFIC STUDIES and DATA (published in mainstream, peer-reviewed journals) that suggest serious safety concerns with vaccines are simply ignored and not integrated into public policy recommendations.

Second, vaccine safety studies are woefully inadequate and often conducted by the pharmaceutical industry--those studies cherry pick the healthiest children, administer only one vaccine, and follow children for a matter of days. Third (this is related to the second point), vaccines have never been studied in combination and certainly never studied in combinations of 4-5 vaccines at a time, the way they are administered today. NEVER EVER.

This is important for several reasons: the immune system is more complex than we had ever imagined when vaccines were developed and the immune system intersects with immune and neuroimmune system in important ways, so stimulating the immune system this intensely has implications. In addition, we know from toxicology studies that toxins act synergistically, so that metals (aluminum and sometimes mercury) as well as preservatives (some of them known cancer-causing agents) may, in combination, produce a toxic burden that some children are not able to clear. There is ANIMAL DATA to support neurotoxic effects of current vaccination protocols. Data that has been ignored by policy makers.

Those of us who rightfully question the safety of current vaccination policy are often denigrated (see comments above) but I assure you my concerns are based in SCIENCE, not only data about adverse outcomes in animals and HUMANS (autoimmune reactions, narcolepsy, developmental issues) but also about the emerging complexity of the immune and inflammatory systems. I hope this investigation continues. Finally, I would like to add that many many physicians share my concerns about vaccination but feel constrained to speak out in academic circles. This is the ultimate compromise of true science and free thinking. Questions should be asked, investigated and answered. To that end, studies of vaccinated vs. unvaccinated outcomes are imperative as are more studies about vaccine safety (a conclusion the Institute of Medicine made in their last position paper on vaccination, where they noted that the current vaccination schedule had never been studied)."

=====

**From Kimberly Ann**

"People who say vaccines work, and are safe and effective haven't researched shit. They're simply indoctrinated to the medical community and probably worship doctors (and the media.) Doctors know less than I do about toxic vaccines. Guess what? I'm not vaccinated and I had all of the "deadly" childhood diseases.

Beware of people so indoctrinated that they believe what they're told without doing independent research. If vaccines were safe, why is there a rapidly growing antivax movement? Why?... Because babies and children are DYING and being injured at an alarming rate. "Vaccines save lives." is ignorance at its finest.

For the record, I became anti-vax when my husband was diagnosed with cancer and I started researching toxins. There are many documentaries out there. I suggested the

provaxxers get educated, especially if there is a cancer diagnosis. You want cancer and chronic illness? Get vaccinated."

=====

The "science" on vaccines has been completely corrupted!! In 1st world countries, vaccination is unnecessary. We have clean running water, good hygiene and sanitation. Artificial immunity is not the same as natural. You must know that. You want your kids to get some of these infectious diseases. They will have lifetime immunity and there is good evidence that shows it may protect them from various cancers. You just need to be prepared with natural medicine and not pharmaceuticals!!! or any OTC!!! Here is a great example. <http://drsuzanne.net/2017/10/sodium-ascorbate-vitamin-c-treatment-of-whooping-cough-suzanne-humphries-md/> Dr Suzzane Humphries also has great videos on vaccines.

=====

"I am not anti-vaccine. I am just against injecting myself, or children, or any human being or animal with known neurotoxins like aluminum and mercury; or cancer causing substances like formaldehyde and glyphosate, or DNA from animal tissue and aborted human fetal tissue; or vaccines contaminated with retroviruses that could lead to cancer, autoimmune disease or AIDS! This is abuse and it is criminal!

When pharma takes on liability for injury or death, makes vaccines that don't contain any toxins and does independent, double-blind, randomized, inert placebo controlled safety studies over a minimum of 3 years, the Gold standard for drug approval, I'll research the subject even further and reconsider. So, I'm not anti-vaccine. I'm just pro-science, pro-health, pro-transparency, pro-informed consent and pro-doing my own damn research!!"

=====

I try not to listen to Alison Singer. I try desperately to put my own head in the sand so I don't scream at my computer with disgust. But for some reason, I had to read the quotes by Alison. Something in my heart was hoping she would say something that made sense to my brain. That simply didn't happen. My son was not only vaccine injured, but his doctors agreed that he "shouldn't receive any further vaccines". hmmm, why would they say that?? When my son was put under general anesthesia for five hours and came out of surgery almost catatonic.. didn't anyone argue that it was the toxic and noxious chemicals used? Why didn't anyone tell me that I was naive? Why did the doctors say, "oops, we shouldn't use certain chemicals on certain children?" What makes vaccines any different? As soon as you inject toxins, chemicals, foreign bodies or clones of foreign bodies into the bodies of compromised children.. you're setting them up to fail. To mutate. To cause harm. Alison, you have no idea how much damage you are doing by espousing the trivia you call science as fact. Now my heart and my brain are hurting.

=====

The reasons those kids died has NOTHING to do with not getting vaccines. This "news" is a fancy bit of spin doctoring written for the sole purpose to fear monger and promote the uptake of DTP vaccine during pregnancy!!! Dr Chavez is a liar in his statements – "the infant deaths highlight the need for pregnant women to receive a pertussis vaccine during the third trimester. Vaccination of pregnant women is the most important thing that can be done," said Chavez, citing "good scientific evidence" showing that infants whose mothers are vaccinated against pertussis have the maximum protection against the disease. He is an f---ing liar. There is ZERO evidence because the vaccine has NEVER

*BEEN TESTED FOR SAFETY ON PREGNANT WOMEN!!!!*

And one more thing that few people realize.... the fact that these kids died is the mostly fault of the doctors, hospitals and pHARMA industry who don't know how to cure because drugs never do! Drugs only mask and suppress symptoms and break down the body. You're looking for a scapegoat? it's pharma! Its doctors. It's the system! Here's how to cure whooping cough btw...

Treatment of Whooping Cough by Suzanne Humphries, MD

<http://drsuzanne.net/2017/10/sodium-ascorbate-vitamin-c-treatment-of-whooping-cough-suzanne-humphries-md/>

I have an aunt that had "polio"... and as a traditionally trained biologist it's hard to believe such deception... at the same time it's very real now too. We are injecting poisons now... because of deception between science and medicine. Thank you for sharing your story so we can learn and try to stop the damage to more beautiful people from repeating. Bless you and stay well <3

### **Why physician's think vaccines are important**

My thoughts on why physician's think vaccines are important are multifold. One, they've been sold lies by pharma and our government agencies that vaccines are necessary for public health in First World countries and have not been shown the real charts of history, vaccines and the diseases.

Number two, these doctors know nothing about the importance of childhood infectious diseases in boosting immunity and giving children lifetime immunity against infectious diseases. Through propaganda dished out by the partnership of pharma and government agencies, in the last 40 years, they've been taught to fear these infectious diseases and that fear is passed on to their patients.

Three, they don't understand that vaccination is not the same as immunization. Vaccines create artificial immunity and actually propagate disease, not only through their damaging of the immune system and not only through shedding, but because they do not confer lifetime immunity and that immunity cannot be passed on from mother to fetus. So infectious diseases persist and people's immune system become weaker. I'll say it again a little differently, people's immune system become weaker and infectious diseases persist because of vaccines!

Fourth, allopathic pharmaceutical-based medicine has no cure for viral infectious diseases. Their drugs do nothing and they will rarely, if ever, admit that! The fact is, their drugs often do tremendous harm and can lead to death - properly prescribed drugs are the third leading cause of death in the United States!

Their profession also belittles and scorns natural medicine -- vitamins, herbs, homeopathy, naturopathy, etc., which can be used with effective protocols to assist in the healing process of these infectious diseases. Natural medicine and even something as simple as healthy eating is something they are clueless about!

In addition, their all too often God complex and combined with their conflict of interests

and ties to pharma with pharmaceutical advertising everywhere and FREE marketing for all doctors, buying their staff lunches every day, sending them on education vacations, paying for dinners, concerts, theatre, etc. all of this and more, have them hook, line and sinker into falsely believing that pharmaceutical drugs and surgery are the be-all end-all of healthcare!

=====

There are online forums dedicated to the pharmaceutical industry. You can see how those who work for pharma communicate with one another often devising ways to trick an unsuspecting public for profit, regardless of harm. Scientists, CEOs, politicians, even your friendly neighborhood doctor are on these boards. There is a board for every manufacturer and subcategory of the pharma industry. The Insys Therapeutics forum link is below. Their sense of ethics will likely horrify you.

<http://www.cafepharma.com/boards/forums/insys-therapeutics.267/>

<https://www.medtechy.com>

The Tdap or whooping cough vaccine for pregnant women? Also without any real data showing its safety or effectiveness, *in addition* to the flu vaccine, the CDC is recommending the whooping cough vaccine (Tdap) for pregnant women.

Here are the CDC's marketing posters for pregnant women to get the whooping cough (Tdap) vaccine <https://bit.ly/2omSP6W> and <https://bit.ly/2QyVDPD>

In the first whooping cough marketing poster the CDC states, "Yes. *The whooping cough vaccine is very safe for you and your baby.*"

Very safe? Really? I say CDC show me those studies! Well they cannot because they don't exist!

[www.Vaccinetransparency.com](http://www.Vaccinetransparency.com)

Dicegirl723 years ago

I've been a pharmacist for nearly 20 years. Do not buy the vaccination lie, I cannot emphasize this enough. Not only is the vaccination schedule 3 times more aggressive than when I was a baby, there are many inactive ingredients in the vaccines that are poisonous, carcinogenic, and obviously are at least in part, responsible for the exponential increase in autism seen since the eighties. It's all about the money, honey. Profit for the vaccine manufacturers and other entities

As an E.R. nurse, I have seen the cover up. Where do you think kids go when they have a vaccine reaction?

They go to the E.R.

They come to me.

I cannot even begin to guess how many times over the years I have seen vaccine reactions come through my E.R. Without any exaggeration, it has to be counted in the hundreds.

Sometimes it seemed like it was one or two cases in a single shift, every shift, for weeks. Then I would get a lull, and I wouldn't catch one for a week or two, then I'd catch another case per night for a couple weeks. This was common.

Once, I was training a nursing student, about to graduate, on their E.R. experience rotation in nursing school. This student and I floated up to triage to cover the triage nurse for a break. I was quizzing them on what to ask and look for as a triage nurse on pediatric kids that came through. I made a point about asking about immunizations right out the gates. The student was puzzled, and asked why, and I told the student because we see vaccine reactions every day and it's their job to catch it, alert the doctor and the parents, and report it to VAERS.

Some higher power apparently smiled on my attempt to open the eyes of another nurse I guess, because not even ten minutes later, a woman brought her child up to the counter. Sudden onset super high fever and lethargy. I asked if the child was up to date on vaccination.

The mother replied he had them just a few hours ago.

I glanced at the student, who looked shocked and looked back at me in disbelief. I nodded, told them to remember this, and then took the mom and her child to finish the triage in back. When I was done I came back and sat down with the student, and asked what he learned that night so far.

The first response: "What I was told about vaccines wasn't true".

I couldn't have said it better. That student is going to go on to be like me, advocating for his patients with his eyes wide open.

The cases almost always presented similarly, and often no one else connected it. The child comes in with either a fever approaching 105, or seizures, or lethargy/can't wake up, or sudden overwhelming sickness, screaming that won't stop, spasms, GI inclusion, etc.

And one of the first questions I would ask as triage nurse, was, are they current on their vaccinations? It's a safe question that nobody sees coming, and nobody understands the true impact of. Parents (and co-workers) usually just think I'm trying to rule out the vaccine preventable diseases, when in fact, I am looking to see how recently they were vaccinated to determine if this is a vaccine reaction.

Too often I heard a parent say something akin to "Yes they are current, the pediatrician caught up their vaccines this morning during their check up, and the pediatrician said they were in perfect health!"

If I had a dollar for every time I'd heard that, I could fly to Europe for free.

But here's the more disturbing part.

For all the cases I've seen, I have NEVER seen any medical provider report them to VAERS. I have filed VAERS reports. But I am the ONLY nurse I have EVER met that files VAERS reports.

Mind you, I have served in multiple hospitals across multiple states, alongside probably well over a hundred doctors and probably 300-400+ nurses.

I've worked in big hospitals (San Francisco Bay Area Metro 40 bed ER, Las Vegas NV Metro 44 bed ER) and small hospitals (Rural access 2 bed ER, remote community 4 bed ER) and everything in between.

When I say NEVER, I mean NEVER.

I have even made a point of sitting in the most prominent spot at the nurses station filling out a VAERS report to make sure as many people saw me doing it as possible to generate the expected "what are you doing" responses to get that dialog going with people.

And in every case, if a nurse approached me, their response was "I've never done that" or "I didn't know we could do that" or, worse "What is VAERS?" which was actually the most common response.

The response from doctors? Silence. Absolute total refusal to engage in discussion or to even acknowledge what I was doing or what VAERS was.

The big take away from that?

VAERS is WOEFULLY under reported.

I am PROOF of that. ([Read the full blog post here.](#))

## Blog Post

(Re-posted with his permission)

"As an E.R. nurse, I have seen the cover up. Where do you think kids go when they have a vaccine reaction?

They go to the E.R.

They come to me.

I cannot even begin to guess how many times over the years I have seen vaccine reactions come through my E.R. Without any exaggeration, it has to be counted in hundreds.

Sometimes it seemed like it was one or two cases in a single shift, every shift, for weeks. Then I would get a lull, and I wouldn't catch one for a week or two, then I'd catch another case per night for a couple weeks. This was common.

I was quizzing them on what to ask and look for as a triage nurse on pediatric kids that came through. I made a point about asking about immunizations right out the gates. The student was puzzled, and asked why, and I told the student because we see vaccine reactions every day and it's their job to catch it, alert the doctor and the parents, and report it to VAERS [Vaccine Adverse Effects Reporting System: <https://vaers.hhs.gov/index> ].

Some higher power apparently smiled on my attempt to open the eyes of another nurse I guess, because not even ten minutes later, a woman brought her child up to the counter. Sudden onset super high fever and lethargy. I asked if the child was up to date on vaccination.

The mother replied he had them just a few hours ago.

I glanced at the student, who looked shocked and looked back at me in disbelief. I nodded, told them to remember this, and then took the mom and her child to finish the triage in back. When I was done I came back and sat down with the student, and asked what he learned that night so far.

The first response: "What I was told about vaccines wasn't true".

I couldn't have said it better. That student is going to go on to be like me, advocating for his patients with his eyes wide open.

The cases almost always presented similarly, and often no one else connected it. The child comes in with either a fever approaching 105, or seizures, or lethargy/can't wake up, or sudden overwhelming sickness, screaming that won't stop, spasms, GI inclusion, etc.

And one of the first questions I would ask as triage nurse, was, are they current on their vaccinations? It's a safe question that nobody sees coming, and nobody understands the true impact of. Parents (and co-workers) usually just think I'm trying to rule out the vaccine preventable diseases, when in fact, I am looking to see how recently they were vaccinated to determine if this is a vaccine reaction.

Too often I heard a parent say something akin to "Yes they are current, the pediatrician caught up their vaccines this morning during their check up, and the pediatrician said they were in perfect health!"

If I had a dollar for every time I'd heard that, I could fly to Europe for free.

But here's the more disturbing part.

For all the cases I've seen, I have NEVER seen any medical provider report them to VAERS. I have filed VAERS reports. But I am the ONLY nurse I have EVER met that files VAERS reports.

I also have NEVER met a doctor that filed a VAERS report.

Mind you, I have served in multiple hospitals across multiple states, alongside probably well over a hundred doctors and probably 300-400+ nurses.

I've worked in big hospitals (San Francisco Bay Area Metro 40 bed ER, Las Vegas NV Metro 44 bed ER) and small hospitals (Rural access 2 bed ER, remote community 4 bed ER) and everything in between.

When I say NEVER, I mean NEVER.

I have even made a point of sitting in the most prominent spot at the nurses station filling out a VAERS report to make sure as many people saw me doing it as possible to generate the expected "what are you doing" responses to get that dialog going with people.

And in every case, if a nurse approached me, their response was "I've never done that" or "I didn't know we could do that" or, worse "What is VAERS?" which was actually the most common response.

The response from doctors? Silence. Absolute total refusal to engage in discussion or to even acknowledge what I was doing or what VAERS was.

The big take away from that?

VAERS is WOEFULLY under reported.  
I am PROOF of that.

The number one place parents bring their kids in the event of a vaccine reaction is the E.R., and as an E.R. staffer, I have NEVER met anyone who filed one, in spite of seeing hundreds of cases of obvious vaccine associated harm come through.

What does that say about reported numbers?

The CDC/HHS admits that VAERS is under-reported, and probably only representative of 1/10th the actual number of injuries. I contest that, and from personal experience, I would say the numbers in VAERS are more like 1/1000th the actual numbers, not 1/10th.

And the final part of that, is that I have, first hand, seen blatant cover ups from doctors. I have seen falsification of medical records and documentation via intentional omission.

I have challenged doctors who refused to put in the chart that the child was vaccinated 4 hours ago and was in perfect health, and now suddenly they are non-responsive, seizing, febrile at 105, and that labs, LP, and imaging confirms cerebral edema/encephalitis.

I reminded the doctor as they are writing their report that the child was vaccinated mere hours before. And at the end, there is total omission of this fact, and the physician pass-off notes state encephalitis of unknown origin.

I ask the doctor if they will file a VAERS report, and they argue that this has nothing to do with it, its purely coincidental, and nothing should be filed, they are safe and effective.

I remind them that VAERS is a reporting body for ANY symptoms that are contemporaneous to vaccination, whether causation is believed to be associated or not, and I get the dismissal that they are not filing it because it has nothing to do with it.

No one brings it up to the parents.

It's this giant rug-sweep that happens, and any mention of the vaccination is systematically removed or withheld from the record.

A perfect example of this was an ambulance crew that came in with a pass-off report that included the fact the child had been vaccinated only hours prior to onset of symptoms. The physician made sure this pass-off sheet disappeared mysteriously and could not get filed with the patient medical record.

So yes, I have seen the vaccine damage cover up first hand. I know that it is intentional and active in the medical community. I know that it is happening.

And on top of total denial of any association, and total cover up, they also refuse to report to VAERS which is supposed to be reported to for ANYTHING that is even in NO WAY SUSPECTED to be associated with the vaccine. This is a systemic suppression of information and statistics.

And yes, in the cases described above, I did approach the parents, and I did tell them about VAERS, and I did start a case for them and file a report. I did force the issue through my charting, although it will most likely be buried and overlooked.

I have experienced the corruption and suppression of the truth in the medical community about vaccines first hand from the provider perspective. It does happen. Every day.

I am neither pro-vax or anti-vax. I am an informed consent person.

I believe that you, as a parent, should know the risks involved, and they ARE real.

I believe that you should be aware that, for whatever reason, some seemingly random smaller subset of the population IS in fact susceptible to these horrific adverse reactions that can be life-long debilitating in nature.

Yes the numbers are low. Yes I saw A LOT of cases, but I worked in BUSY very LARGE POPULATION areas. The nasty reactions are, in my opinion, probably down around the 0.5% chance range on the average vaccinations. The exception being Gardasil, that thing is horrible in my opinion and seems to have serious adverse reactions rates, I would guess maybe as high as 5 to 7% across the series. But that's another subject in itself.

I wish I could tell what would make a child likely to be that 0.5% so I could see that trait and tell that parent to really consider it heavily, but I can't. No one can. It truly seems random. Sometimes its a fragile sickly weak kid, and that makes sense that they would have a significantly higher risk of a serious adverse event. But sometimes its a perfectly healthy full term strong infant with no morbidities.

Although the boys do tend to get the reactions more often. Probably 2/3 of the serious reactions I've seen were boys.

But the truth is, you can't tell by looking. Either at the kid, or their health history, or their family history. It comes down to chance. For some reason, every now and then, a child is just more susceptible to those injections than everyone else is.

Do I believe in vaccinations? For the most part. I believe that often times, the concept is good. I take issue with the use of adjuvants in the way they are currently used, and with how the FDA is suppressing additional adjuvants that have been tested successfully with fewer adverse reactions and better immune responsiveness going back decades.

But I can't change that.

I think that they do work, kind of.

I have read about the way it can shift how the immune system functions. Shifting humoral and intracellular responsiveness so one is over-reactive and the other underreactive so the vaccine literally can make you more susceptible to certain illnesses (again, other adjuvants have mostly fixed this, but they have still not been approved 15 years later).

I have seen where the vaccine actually gave the subject the illness it was designed to prevent. (I am talking controlled studies. For an example, look at the Canadian Institute of Health ferret swine flu study).

I have seen people come in to my E.R. with the mumps in spite of being fully vaccinated against the mumps.

Same with chickenpox.

And whooping cough.

And on and on.

I have also seen the manufacturers engaged in fraud (see the federal case U.S. and two virologists vs Merck, regarding blatant fraud in MMR and forced cover-up) or the pharmaceutical industry intentionally giving people illnesses that will knowingly kill them just to turn a profit (see New York Times uncovering internal Bayer pharmaceuticals memos on their HIV-tainted hemophiliac medication where they continued to sell it AFTER they discovered they were giving people HIV by selling it, and then, when ordered to stop sales by a court in the US, they continued to sell it overseas).

But, I do acknowledge that, for the lucky few, these things do work. Although the numbers are hardly stellar, they do tend to grant some kind of protection in the majority of individuals. So yay. Yes, I do believe there is something to them.

But the truth is somewhere in the middle of the road. Not as bad as they are made out to be, but far less effective and nowhere near as safe as they would have you believe either.

In an industry that is rocked on a monthly basis by horrible medication scandals, if you didn't question everything they told you, I would look at you funny. And it's my job to give these medications to people.

Just to note, on a recent scandal, I have been warning people about Zofran use in pregnancy for 5 years. The information was right there in the insert. It was right there on the manufacturing website. It was right there in the PDR. As well as on every downloadable app and printed IV drug book.

The information is there.

It is the medical professionals that are failing the general public.

Now suddenly it's all over the news, there are commercials about it, and everyone is running around in hospitals acting like they had no clue. No, we knew. We all knew. We just didn't hold the line.

This comes back to informed consent.

As I said, I'm for informed consent. Absolutely everything we do has risks. Absolutely every medication we use has risks.

You can take Advil and have your skin scarify and blister and peel away from third degree burns originating below the surface of your skin. Is it common? Heck no. It's darn right rare as heck. But is it possible? You betcha. And we know it.

How many nurses and doctors have told you that one?

Same goes for Benadryl.

And Tylenol studies have been shown to do liver damage at any dose in children. Any.

How many nurses and doctors have told you that?

We lie. As a profession. (I don't.) But as a profession, we lie, we rug sweep the risks, and we sugar coat it. We do it every day with every interaction. That is the truth of it.

And if you have to be lucky enough to get one that isn't lying to you, they are probably simply ignorant of the truth and never read the insert or the PDR or the warnings on the manufacturers website.

That covers about 99.9% of everyone in healthcare. Well, allopathic health care anyway.

Now talk with another E.R. nurse. Are we saying the same things? No. Why? Because I have read more on the subject, because I have a strong sense of ethical and moral obligation to my patients, and because I will not simply take an order and follow it, even if it costs me my job. That is unusual.

You have to remember, pushing drugs makes hospitals money. Challenging doctors is a good way to make your work life suck, and bring down wrath of the administrators on you.

While that CT scan may not be the best thing for you, or warranted, or necessary by any yardstick, it will make the hospital several thousand dollars, imagine what happens to the easily replaceable nurse that stands in the way of it.

Profit.

The truth is that this is what it boils down to. Call me jaded. I am. I'm fine with that. I am the salty old dog in the trenches. I have earned my battle scars in the E.R., and I have a reputation that precedes me.

I have taken every award from every hospital I have gone to, including awards, honors, and recognitions that were previously only ever given out to Social Workers and Doctors. It gives me a certain level of immunity from persecution, and that gives me the ability to speak the truth, even if it costs the hospital money. Because I'm too valuable as a P.R. piece.

So you want the truth from the inside? There you have it, from probably one of only a handful of people you are ever going to hear it from.

Know the risks. Acknowledge that IF you do it, you roll the dice. And YES your child's number CAN come up. You are NOT immune.

I can't predict why some kids are susceptible and others aren't. I don't know why it is this why. I wish I did. No one does in this field.

It is actively covered up. It is known. This is real. Vaccines do help. They do have risks. As a parent, you have to make that choice on your own and live with it.

But think about this hypothetical situation. You come in and see me and ask me to vaccinate your child, I hand you a stack of papers an inch thick and tell you to start reading, and in in twenty minutes I'll be back with 100 sided dice (yes, they make them, from the role playing game days of dungeons and dragons).

It's a simplification, but it is a profound one that makes the situation real. I'll hand that 100-sided dice to you and tell you to roll it.

If it comes up on number 1, your child is going to have a seizure and possibly suffer potential neurological harm, but if it comes up on any of the other 99 numbers, your child is fine.

If you can take the dice in hand and own that potential outcome, then I will inject your child. But you have to KNOW and ACCEPT the risks before I am going to do it.

I really just believe in standing up for my patients. I don't know what happened to this industry, but, it is supposed to be the nurses job to stand between the patient and the system, to protect them from the system.

I guess I'm getting fed up with nurses and doctors just "going along" to get along. There is no big secret to any of this. I read the journals of infectious diseases, toxicology, pediatrics, emergency medicine, BMJ, Lancet, etc., and I research on PubMed through the NIH.

Everything I'm saying is public domain knowledge.

It's stuff we SHOULD be telling you.

I am sorry we are not.

I try to take a stand where I can, but at the end of the day, I'm only one nurse."

~GuerillaRN

RN, CEN, EMT

Highly commended and credentialed EMT and Nurse with 6 years emergency department experience across multiple hospitals and former police officer
