

The Fed is propped up in college, they are painted as a necessary entity. Don't believe me? Go ask a political major their thoughts on the fed, they'll tell you the fed is necessary so it doesn't become plagued with politics.

Its sad, but these political majors simply regurgitate the same points pushed across in class. No critical thought processes being applied to the subject matter what-so-ever.

I reject the false claims being made about the Fed, the claims that a separate entity (private corporation with unknown share-holders) is necessary to avoid a political storm reeking havoc on our currency system.

It became apparent to me that the fed is the epicenter of our banking systems stranglehold on market demand patterns, they guide the demand of markets in nefarious ways to benefit the few that hold power.

Why should our government pay any interest for the US dollar? Why not allow our government to print money, free of interest, with the values being tied to precious metals?

As an MBA grad and a PolySci undergrad, I confirm that you speak the truth. All my econ professors taught that the Fed was necessary to smooth out the business cycle with minimal political influence. This is one of those damned lies that continue to be taught. The Fed is not necessary and is in actuality the mechanism used to siphon wealth out of a nation's economy. There is absolutely no reason the government itself cannot control money supply similar to the Fed but without paying interest and fees to outside parties.

- [link](#)
- [parent](#)
- [reply](#)
- [...](#)

[\[-\] 20086365?](#) 2.9 hours ago

Right? They say "it's necessary to smooth out the business cycle" but in reality, it's the *sole entity responsible* for the boom/busts cycles that siphon up our wealth!

Not true. You need to take all the evil cabal to justice, and make them pay for their crimes. Justice is key.

Why?

If you don't take them out, then if you take out the fed....the evil cabal will just find another way to control the money supply and print print print.

(((Their))) control of the Fed and every major bank and corporation through their lending has allowed them to seed the corporate boards of every major corporation. They have mandated affirmative action hiring and thrown out merit based achievement throughout corporate America. This action has hurt mainly Whites and Asians, but it also makes those companies forced into it less competitive and thus less profitable. The economy under these burdens slowly grinds to a halt which is their goal for America.

The western democracies must be destroyed to usher in their new world order with a central government under the banksters.

The Federal Reserve is neither Federal, nor a Reserve, but a private corporation incorporated in 1916. Learn how it operates and realize the fraud, which is bigger than Obama.

<https://youtu.be/TmYtPfdwYtY>YouTubeYouTube

Read "The Creature from Jekyll Island."

A VERY simplified explanation of the Fed and the National Debt.

The Treasury prints the Federal Reserve notes. They sell the notes at cost to the Fed. The Fed turns around and loans all those notes back to the Treasury at face value plus interest, meaning all your money already has negative value.

It is not possible to pay off a debt if all you have is borrowed money. The National Debt is simply all the money in circulation and the interest that has accrued. That's why it keeps going up and never down.

Once you get past that red pill, all the rest pretty much falls into place, although the blatant audacity of the scheme is almost unbelievable until you objectively analyze the behavior in the District of Criminals.
