Deceiving the Entire World - Nukes, Nations, and the NWO

This may be the most dangerous thing I have ever written. Before I begin, please read this. And this. At least read the analysis of the photos.

The nuclear bomb is a hoax. I know it's hard to accept. Harder than 9/11. It requires courage to commit this level of "thought crime". You're just going to have to man up and do it. Understanding the "nuclear bomb" psy-op is crucial to understanding what is going on in the world, and recent history. Don't read any further until you grasp this essential point.

In 1945, the allies who won WW2 established the United Nations and got all countries to join. The US and USSR were never really enemies - they were best friends, co-victors in WW2, cooperating together on the Security Council. The USSR didn't "take" Eastern Europe, it was *given* to them as the spoils of war. The Cold War was theater for the citizens of both countries. And the nuclear bomb was propaganda designed to scare the entire world into believing that war was pointless. The US and Russia had millions of nukes and could destroy the whole world in seconds!

"World peace." As long as everyone believed there were nukes, and the masses were terrified of war, you didn't have to worry about countries going their own way - setting up Christian kings, for instance. Better for the entire world to live in deception, than war.

So they made up the nuclear threat, which was the first of a long list of successful psy-ops using film, to trick the dumb masses. Moon landing, JFK assassination, 9/11, all the recent ones... the list goes on.

Thus it was thought necessary to dupe the whole world, in the interests of "peace". Machine guns and other modern weapons of war produced tragic results, as the millions of dead soldiers from WW1 and 2 can attest to. Do we really want to send our boys into a meat grinder just so some despot can enlarge his borders or whatever?

But think about what we have lost. Before the NWO, we had:

- Land that we owned! Passed down to our children. No mortgages. We weren't disenfranchised tenant farmers. Most people didn't have to work, other than grow their own crops. No personal debt, or national debt. No usury.
- Morality. People believed in God. It took a lot of time and money for TPTB to steal our faith.
- Freedom. We used to have "rights", and if not at least we knew what the rules were, without them changing constantly. Everyone was regarded as a child of God, and equal in a way because of that.

And what did we get? Empty lives of futility. Debt slavery. The family, ruined. Hard drugs. Millions of abortions. The forced ascendancy of "Enlightenment" "scientific" ideology. Debasement of our children by the state. Mass propaganda 24/7. Being forced to live and believe a lie. Completely powerless, individually and collectively. The world's a big factory, and you and I have been on the assembly line since birth. Played for fools, programmed like robots, humanity subverted.

Was it worth it? Maybe in the 50's. Before the UN went to war against God.

The NWO is an abomination. Does anyone have the faith, and necessary courage, to secure our freedom?
