

Besides 9/11, the Sandy Hook hoax is what opened my eyes. I would dig for days, start to feel crazy, stop for a few months, then start digging again. Looking back, it's like watching 80's CGI. How the fuck can anyone be fooled by this shit?

One of the aerial photos I saw had all the body bags laid out neatly in rows. I'll admit that I don't know if body bags are one size fits all or they shape around each individual body. Every single body was the exact same length and width. They were all placed in perfect sequence and orderly was the only word I could think of.

The thoughts that went through my head were "how the fuck could anyone be so perfect in this situation. School children have just been murdered and here they lay perfectly in rows. Who is ensuring they are placed perfectly on ground tarps?"

Let's not even talk about the onsite medical examiner who pronounced them all dead at the school. Why were ZERO taken to hospital. If I was a first responder the first thing I would do is begin taking them to an ambulance (blood loss) before checking for breath or a pulse. As a grown man it might take what 10-20 seconds to pick a 50 pounder up and run to the nearest ambulance? Remember everyone's adrenaline is pumping so picking up a lifeless 50 pound individual would not be difficult.

A trained trauma crew would lay body bags in orderly, neat rows. They would have child and adult sizes and no, they don't conform to the body.

Why would you take an obviously dead body to an ambulance when it belongs in the coroner's wagon? A trained first responder would not react in the manners you propose.

The censorship, particularly on YouTube was just beginning when we issued WNTTASH. But it was still shocking how fast it was censored from YouTube, then Vimeo, then Internet Archive.

Based on pure public data one can attribute most of the censorship to Lenny Pozner. But a more comprehensive analysis and reasonable speculation would lead most to suspect some larger agency was responsible. After all, in YouTube's own childish bylaws, when referring to hate speech it prohibits, only Antisemitism and Sandy Hook are mentioned specifically.

Hey Peter. What would you say to someone who hasn't seen any valid evidence for "Sandy Hook" being a hoax? Is there one piece of strong evidence that isn't just something you watch on a 'theorist' channel? I've seen some of the videos by the crazies, mostly because crazies can often be entertaining. (Like the "*space lasers were used to burn a path across California for a high speed train*" people.) Got anything plausible for an agnostic?

No. The problem with SH is the same for all of these curious events. Only authorized individuals are able to see the uncensored evidence. And even they are compartmentalized. This is partly why they say we now live in a, "low trust society."

What I've found most intriguing is the plethora of circumstantial evidence. For example...

- 1.) Adam Lanza was said to be so sensitive that he couldn't touch metal door knobs. The landscapers couldn't run their weed whackers near the Lanza house because it would disturb Adam. Etc. Yet he was able to commit such a purportedly violent multiple murder.
- 2.) Adam was in possession of Ryan's driver's licence at the time of the event, yet Ryan hadn't lived with him for at least 2 years.
- 3.) The current account for why 3 state troopers are filmed racing into the woods behind the school is that they were in pursuit of individuals seen there and turned out to be reporters. But close analysis of the footage reveals that there are 7 individuals in the woods seen in that footage. Some simply emerge from behind trees and start walking with the others. But it's clear that nobody is running from anybody and nobody is running after anybody. It's as if they all slowed down and stopped acting once they thought they were under the canopy of trees.

I could go on, but it's been so long.

I'm from Ct, I was living in Waterbury at the time this happened,,,,,I know a state trooper that was there, high rank, however he never went in the school, maybe he showed up later then the fastest cars,,or he was in a town farther away, he doesn't like to talk about it, I believe it was carpmentilized where the first arrivals saw and closed everything off. Strange thing people say is how quick the FBI was there. Didn't make sense,,,they are all the way in New Haven. Also for me was the sign for road work on the road near the fire station was programmed to tell people where to go, also porta potty's where there and there was no construction at the time Or planned. This is all fuckery here in our state and more people are questioning it. I personally think 100%

this was a classic no kill false flag and they were all in on it like a show. Old days u would see crime scenes and today they won't show especially if kids are dead. I think they knew that and target children. Can't show the public dead kids right?

# Who is **DAVID HOGG?**

## FACT -

David Hogg is a Crisis Actor. He was recorded forgetting & being fed his lines in a YT interview regarding the Parkland incident. His father is Ex-FBI, admittedly. His group is perpetrating a psyop deception on the American people, with MSM, in order to steal donations & take away our 2ND AMENDMENT rights.

## MIS-INFO

The California video was not about a shooting.. it was about a disagreement between a lifeguard and a surfer about a surfboard. David Hogg did not graduate from Redondo Beach HS, CA. He is a student at Stoneman Douglas High School in Parkland, FL, per the 2017 yearbook.

Jesus... [EVEN SNOPE'S DOESN'T PROVIDE ANY EVIDENCE](#)

If you read it carefully, they write like 8 paragraphs calling people crazy conspiracy theorists, and then they use a 2 logical fallacies to explain exactly everything away.

Logical fallacy #1: [Argument from fallacy](#) They cherry pick one piece of evidence (the fact that the city didn't report the deaths in crime statistics) and then pretend to "disprove" that piece of evidence by pointing out that the state DID report the deaths. This could be a double fallacy because not only does disproving that one piece of evidence not disprove the conclusion, but it also doesn't make any sense for violent crime statistics to show up in the state report but not the city report. They are regional reports, one is more specific (by region) than the other, that means the deaths should show up in BOTH reports!

Logical fallacy #2: [Appeal to probability](#)

Of course, had the Newtown, Connecticut, school shooting been staged deliberately to separate Americans from their guns, one would expect the FBI to be complicit.

They are essentially saying "The FBI isn't likely to be evil, and for sandy hook to be a hoax the FBI would need to be evil, therefore sandy hook hoax can't be true" Which is absolute horse shit.

I have done extensive research into the free houses theory and decided long ago that it was a canard. BUT.....during that process I discovered something interesting about Newton and home sales. This triggered an investigation that ended after only a month. Our (IMS) private Google Drive account was hacked and its full contents published to the web. The project folder was entitled, "The Maple Drive Report."

To encapsulate the discoveries we focuses on a single street, Maple Drive. One SH family lived on that street driving the period in question. There are 16 homes on the street. But get this. There were 211 (as I recall) home sales on that street during only a 3 year period. Based on mortgage and real estate people we consulted and Fannie Mae stats, that was excessively high. We only showed them anonymized data to prevent tipping off the crooks.

I thought at first, maybe it was just a fluke until I noticed something. The transactions didn't make sense sometimes. For example couple A would sell their home to couple B. Then, 2 weeks later couple B would sell the home back to couple A for \$50,000 more than they paid for it. Then 6 months later couple A would sell the home to a third party.

The anomalies indicated at minimum mortgage fraud. But I'd bet my bottom dollar it's evidence of institutional corruption where the home sales were used to generate money for corrupt purposes.

I was almost relieved to give up looking into it. Can't imagine how widespread the issue is it was so bad on a single street in Newtown.

They had color coded "mass casualty" triage tarps spread out....no bodies taken out, no EMS allowed in. The whole thing stinks to high heaven.

There were too many inconsistencies and if anyone dare question them, you are swiftly branded a hateful conspiracy theorist. I remember watching the overhead News12 helicopter footage showing what was supposed to be parents coming out of the back of the firehouse, milling around in the parking lot, working their way to the front of the firehouse and entering only to exit out the back again and repeat the whole thing. Dash cam footage from a police car pointed in the direction of the front entrance of the school never showed any students being evacuated. If it actually happened, they would have crossed the line of the sight of the video cam. The only thing it captured were cops stacking cases of bottled water and snacks on top of the police car's hood as they stood around and waited. And one other thing, the road going in and out of the school was completely packed with first responder vehicles -- no one could drive in or out of there. EMTs said all they could do was wait away from the scene and found it strange that none of the so-called victims were given a fighting chance to survive by being transported to the local hospitals while EMTs perform resuscitating/sustaining procedures.

The whole stunk. The state decided to demolish and remove the entire school to a secret location and build a brand new school to the tune of \$25 million, courtesy of the taxpayers.

I lost most of the friends and family I hadn't lost already by speaking the truth after talking about Sandy Hook. When I die there won't be a single member of my own family who would even attend my funeral because I tried to wake some people up over the years.

I'm at the point now where I keep my mouth shut and keep to myself because it's not worth it anymore. I hope they all end up in a concentration camp someday. Or worse. I could give a fuck about any of the dumb ass sheep anymore.

One way to continue research of this topic is to isolate the elements. For example, you could just assume that a multiple murder occurred at SH and the victims purportedly killed were killed. Then, look into the Lanza family by itself. The neighbors all claimed not to know them or that they lived in the house they purportedly lived in. Peter Lanza was a high level employee of GE and could apparently afford to pay over \$200,000 per year in alimony to Nancy in the preceding years. Etc.

Maybe Adam Lanza did exist and maybe he did have some involvement. I don't think he was alive on the day of the shooting, but who knows?

The media initially reported multiple gunmen (as always). Then it changed to Ryan Lanza. Then it magically became Adam, who to this day only a few heavily photoshopped images (rectangle mouth) even exist of afaik.

Similarly, the media reported Sunil Tripathi and Mike Mulugeta as the suspects in the Boston Marathon Bombings, then magically changed to Tsarnaev brothers for convenience (anons blew holes in the Tripathi/Mulugeta story in wee hours of morning while monitoring police scanners.)

Let me get this straight since this is news to me. They claim 20 kids and 6 adults plus the shooter all died, and you can name them, they were real people, yet they all may as well be alive somewhere?

What about funerals, graves, estates, how does extended family get around all this do they know? How is it possible nobody is dead. Explain it like I'm retarded.

- [link](#)
- [reply](#)
- [...](#)

[\[-\]](#) [20323680?](#) 2.4 hours ago

Is it possible that they were all killed in different circumstances (car wrecks, terminal illness, house fires, etc) in the two or three years prior to the Sandy Hook event and the families agreed to use their death to commit treason against their fellow countrymen? I'd buy that, but I don't know the circumstances of the houses being paid for, and did they move into the area shortly before the shooting? That would make sense (because you couldn't expect that kind of death rate to be concentrated in that small of an area naturally).

I agree that something is fucked up about the whole mess, but maybe that's how we cope with things that are too fucked up to wrap our heads around.

There used to be a video that showed the alleged victims years later, and singing in a youth choir at a football game. There were comparison photos...then & the current choir. It was obvious that they were the "victims", just older versions. This was pre-sauce-saving for me...now it has been pulled from YT. While looking for it I did run across this website with a lot of info. If I can find the video I mentioned I will come back and edit my comment.

I live in the next town over. Here's my take on it:

The children absolutely died. I have met the mother of one, know people closely connected to one of the families, know people have treated the police and EMTs that had to go in there afterwards... it absolutely happened. Those kids were sacrificed for the gun control narrative. Were the families involved? With the exception of that father that was caught on camera laughing, I really don't think so.

The father of one of the children committed suicide recently. Did he know the jig was up if he was involved? That would certainly seem to make sense. Or, as we were told, he succumbed to the nightmare of losing a child. I really don't know.

What I do know: the people I've met are not faking it. Not 5 years out, consistently. Except maybe for that father. That was definitely very odd.

What I also know: Q mentioned SH once and he did not say it was fake. He said to follow the money. That's where anon diggers should be digging. There is shitloads of money floating around this town since then. I have seen some things I find very fishy. I would encourage you who have time to do research to dig there instead of inflicting more pain on people who have suffered the unimaginable.

Mark Barden is a parent who purportedly lost a child at Sandy Hook. He is a guitar player and has performed live. He has many musician friends. He is the co-founder of Sandy Hook Promise. Mark's blog at one time had a biography indicating at no time did he live in England.

When researching him I came across the late '70s band, Vile Bodies. When their original drummer died in a car crash, a Mark Barden stepped in. This was 1977 I believe.

When I found images of the English Barden, I was blown away...

<https://www.boredteenagers.co.uk/VILE%20BODIESPAGE2.htm>

Assuming it IS the Mark Barden of Sandy Hook fame, why no mention of this in his bio? That could be overlooked, so I was stymied. Then I noticed the band had scheduled a reunion show in NY and saw some comm between band members about the gig. All BUT Mark attended. No mention of him in either their band communications or social media promotion of the event.

Hey, I'm internet famous! So let me get this straight. Anyone who can't see a fake shooting in those ludicrous stories by the theorists can only be a paid obfuscator? It's "evidence" like this that supports my belief that many-to-most of you are mentally unbalanced.

Some of the channels I watch would probably have you running around and pulling out your hair.

The tactics haven't changed for nearly a decade. You niggers glow in the dark.

I am the one seeking evidence, do you care to provide any?

The hand signal interview it what started the dig. Watched them all. Her “parents” were creepy. Remember the one with the mom going behind the camera man after the interview was done?

Hand signal interview and walk behind the camera man? I've not seen these to my knowledge. What would I search for to see these?

I can't find these anymore and back then I didn't archive offline. They were up when TY was only soft censoring. Used to be able to type those keyword and SH to find them. I can describe it. A news reporter was interviewing a girl and mom, the girl was standing in front of her mom had her arm wrapped around the girl. With every question the mom would move her hand or pat the girls head. girl answers question: "I felt sick to my stomach" as her mom presses her stomach. Like scripted lines using cues. The entire interview is like this with answers only from moms cues.

The other one was also a mom and daughter walking down the road from the school and stop to answer a question from a reporter. After they answer with their rushed demeanor the camera accidentally followed them as they walked off but instead of continuing their path they go left behind the reporter.

I'm inclined to believe it was faked, although I have to admit this is the one event that I had no time to research into, so I don't have any substantial foundation for believing one way or another. Would like to see someone present a real case with lots of examples on this incident.

Just surface the unredacted police pictures.

Someone died there. Maybe multiple people. We wont know without those pictures. Easier to just go with the narrative otherwise.

Someone died there.

What are you basing this on?

Fuck the narrative.
